[92] Editor's note in *The Trilobite Papers*: "Please keep in mind that The Trilobite Papers is not a formal publication and should never be cited. If you wish to use information in this series for a formal publication, please contact the author of the information and then it could be cited only as 'personal communication'. This is particularly important for the sections on 'Field Notes' and 'Taxonomic Notes'." Items from this serial cited in THE GRAND CANON are *historical records of contemporary activities* in the Grand Canyon region. (Later issues omit the editor's note.)

1885	21.6921	The age of the world. *Kansas City Review of Science and Industry*, 8(10) (February): 570-575. [See p. 574: “A very noted example of river erosion is exhibited by the Grand Cañon of the Colorado River, which is 300 miles long and from 2,000 to 6,000 feet deep. But we have no data from which to estimate the time required for the river to cut its way through this distance of rock. We do not know the present rate of recession, nor do we know but the river simply followed and enlarged a crevasse that had been formed by some convulsion of nature. As all such data are unreliable, all conclusions drawn from them must be fallacious.” (ENTIRE NOTE)]

Ward’s Natural Science Establishment

NO DATE 21.5809 *Grand Canyon relief model kit.* Monterey, California: Ward’s Natural Science Establishment, Inc. [Description of this kit is in Choncoff (1976, ITEM NO. 1.281): “Ten relief models of a square area nine miles on a side, with the Canyon running through the center at a scale of 2” for 1 mile with a 20% vertical exaggeration. Models vacuum formed of unbreakable beige plastic and measuring 18” × 18” × 4”. Kit includes: geological map of Canyon, 20 sets of four 1” × 1” rock specimens, set of 27 color slides, student project work sheets, manual.”]

NO DATE 21.5810 *Abridged Grand Canyon model set.* Monterey, California: Ward’s Natural Science Establishment, Inc. [Description of this set is in Choncoff (1976, ITEM NO. 1.281): “Contains 5 of the Grand Canyon relief models and the geologic map.” (refer to the relief model kit [Ward’s Natural Science Establishment, no date, ITEM NO. 21.5809]).]

1891 21.5190 *Catalogue of geology and lithology. Ward’s Natural Science Establishment, Rochester, N. Y.* [No place]: Robert W. Lace, book and job printer, 48 [52] pp. [Wrapper title.] [Title-page: *Catalogue of systematic collections and individual specimens of geology and lithology. (Second edition.)*] [See illustration, p. 12; “No. 8. Relief Map of the Grand Canon of the Colorado of the West, and the Cliffs of Southern Utah.”, p. 13 (not illustrated); and illustration, back wrapper.]

THE GRAND CANON

A WORLDWIDE BIBLIOGRAPHY OF THE GRAND CANYON AND LOWER COLORADO RIVER REGIONS
IN THE UNITED STATES AND MEXICO

22

HYDRAULICS AND HYDROGEOLOGY OF THE COLORADO RIVER IN LOWER GLEN, MARBLE, AND GRAND CANYONS

Hydrological and sedimentological studies of the Colorado River mainstem from Glen Canyon Dam to the beginning of Lake Mead

GO TO VOLUME CONTENTS PAGE
GO TO BIBLIOGRAPHY TABLE OF CONTENTS

PART 22. HYDRAULICS AND HYDROGEOLOGY OF THE COLORADO RIVER IN LOWER GLEN, MARBLE, AND GRAND CANYONS

OVERVIEW. This part encompasses all physical studies of the water flow of the Colorado River, applied research on its carried and bottom sediment, and the effects of the river's fluctuating flow on the distribution of sediment on the banks of the river.

RELATED MATERIAL

PART 3. *THE NEW YORK TIMES* for additional items that relate to this part of the bibliography (which are not repeated in this part)

PART 11, SECTION 2. LOWER COLORADO RIVER—GEOLOGY for items relating to geological and hydrogeological studies and investigations in Lake Mead and the lower Colorado River downstream from Hoover Dam

PART 19. BIOLOGY AND ECOLOGY for items relating to effects on biological resources as the result of hydrogeological processes in the Colorado River through Grand Canyon

PART 21. GEOLOGY for items relating to modern groundwater in the Grand Canyon region and to hydrogeological studies of tributaries

NOTES FOR PART 22

SOME citations from publications produced by the Geological Society of America include references to supplementary material in the Geological Society of America's Data Repository. Originally, this material could be requested by mail application to the society, and in the early 1990s a compilation of Data Repository items was available on microfiche, but today all of it is accessible online at https://www.geosociety.org/datarepository/).

By convention, mileages on the Colorado River are measured both up- and down-stream from the U.S. Geological Survey's stream gauge at Lees Ferry (see a detailed historical and technical overview by Topping *et al.*, 2003, ITEM NO. 22.572). However, due to the methods of tying together the surveys of the upper Colorado (1921) and lower Colorado (1923)—see Birdseye and Gerdine, 1922, ITEM NO. 22.1171, and Birdseye, 1924, ITEM NO. 22.52, respectively—there remains a gap of 0.63 mile between the two respective Mile 0 points, as shown here (from Birdseye, 1924, Sheet A); this may be called "Mile Null", or the "shortest mile in the world", as it were:

Abbe, Cleveland, Jr.

1899 22.949 A general report on the physiography of Maryland. *In: Maryland Weather Service. Volume One.* Baltimore: The Johns Hopkins Press, pp. 38-216. [See p. 141: "The famous cataracts of the Nile are due to the fact that the river, cutting down along a course taken on the surface of Cenozoic deposits, has reached a completely buried, irregular surface of granitic rocks. . . . it deepened its channel until the granitic ledges became barriers to further downward cutting at those points. A very similar case is that of the rapids in the Grand Canyon of the Colorado. The Paleozoic and younger strata forming most of the canyon walls buried beneath them the Archaean gneisses and granites which the Colorado has now uncovered after cutting down through the softer mantle." (ENTIRE NOTE) (Of course, this does not take into account the Colorado River rapids that occur in the reaches where Paleozoic strata constitute the exposed bedrock. —*E.E.S.*)]

B., W. W.

1882 22.1096 "Physics of the Earth's Crust." By the Rev. Osmond Fisher. *In:* Literature [SECTION]. *The Engineer* (London), 53 (June 9): 420-421. [See p. 421: Regarding Fisher's postulation (quoted) that "ocean basins are not caused by depressions in the upper surface of a crust of the same density as that beneath the continents, but that they are due to a greater density and general depression of the sub-oceanic crust." (This quotation is from p. 179 of Fisher.) W. W. B. then independently observes: "Why the crust should be of so much or any greater density under the ocean than at the same depth under continents is not shown; but it is assumed [by Fisher] that it is so, otherwise the waters of the ocean, it is argued, would be so attracted by the northern continents as to make the mean level of the sea greater there than at the south. We have never seen it proved that this is not the case, nor has it been shown that the Colorado river is much higher at its edges than in the middle where it runs through canons several thousands of feet in depth." (Fisher does not mention the Colorado River in this context.)]

Bogart, Robert; Flick, Lillian; Brinkhuif, Sheryl; Possen, Beverly; Ringhiser, Sheila; AND Kuhl, Martin

1988 22.53 Topographic changes on selected beaches in the Grand Canyon, 1986-1987. *In: Colorado River Investigations VI : July/August, 1987* (supervised by Stanley S. Beus, Steven W. Carothers, and Frank B. Lojko). Flagstaff, Arizona: Northern Arizona University, *for* U.S. National Park Service, Grand Canyon National Park, pp. 16-41.

Bracken, Cameron; Rajagopalan, Balaji; AND Prairie, James

2010 22.1186 A multisite seasonal ensemble streamflow forecasting technique. *Water Resources Research*, 46: W03532, doi:10.1029/2009WR007965, 12 pp. [Colorado River basin. Study sites include Lees Ferry, Arizona.]

Brandenburg, Frederick H.

1919 22.545 The Colorado River. *Monthly Weather Review*, 47 (May): 309-311.

≡ CROSS-LISTINGS |CITED» GCNHA Monograph 8: page 1-13|

Breedlove, Michael J.; Hazel, Joseph E., Jr.; Kaplinski, Matt; Schmidt, John C.; Topping, David J.; Rubin, David M.; Fuller, A. Elizabeth; Tusso, Robert; AND Gonzales, F. Mark

2005 22.591 Using an integrated, remote-sensing methodology to evaluate the effects of dam operations on fine-grained sediment storage and sand bar restoration in the eastern Grand Canyon [ABSTRACT]. *In: Colorado River Ecosystem Science Symposium 2005. Abstracts. October 25-27, 2005, Fiesta Inn Resort, 2100 South Priest Drive, Tempe, AZ.* [Flagstaff, Arizona]: [U.S. Geological Survey, Grand Canyon Monitoring and Research Center], p. 51.

2005 22.915 Using an integrated, remote-sensing methodology to evaluate the effects of dam operations on fine-grained sediment storage and sand bar restoration in Marble Canyon [ABSTRACT]. *Eos* (American Geophysical Union, Transactions), 86(52, Fall Meeting Supplement), Abstract H53B-0470.

Bridenbecker, Bruce, AND Stewart, Allen

1991 22.1180 Sedimentary structures in failed and nonfailed beaches and bars of the Colorado River in the Grand Canyon. *In: Colorado River Investigations #9 : July/August, 1990* (supervised by Stanley S. Beus, Lawrence E. Stevens, and Frank B. Lojko). Flagstaff, Arizona: Northern Arizona University, *for* U.S. National Park Service, Grand Canyon National Park, pp. 123-140.

Brod, Chris, AND Mathews, Jim

1992 22.54 Beach Survey Group II. *In: Colorado River Investigations XI : July/August, 1992* (supervised by Stanley S. Beus, James N. David, Frank B. Lojko, and Lawrence E. Stevens). Flagstaff, Arizona: Northern Arizona University, *for* U.S. National Park Service, Grand Canyon National Park, pp. 31-37.

Brogdon, Linda; Gilbreath, Mark; Hermanson, Martha; Rankin, Mary Lou; AND Robertson, Susan

1989 22.55 Topographic changes on selected beaches in the Grand Canyon, 1988-89. *In: Colorado River Investigations VIII : July/August, 1989* (supervised by Stanley S. Beus, Lawrence E. Stevens, and Frank B. Lojko). Flagstaff, Arizona: Northern Arizona University, *for* U.S. National Park Service, Grand Canyon National Park, pp. 35-61.

Brouder, Mark J.

1996 22.999 Number and area of backwaters. *In:* Arizona Game and Fish Department, *The effects of an experimental flood on the aquatic biota and their habitats in the Colorado River, Grand Canyon, Arizona.* Phoenix: Arizona Game and Fish Department, pp. 4-1 to 4-7.

1997 22.1000 Changes in the number, morphology, and sediment composition of backwaters and their recovery in the Colorado River, Grand Canyon, following the 1996 experimental habitat/beach building flood. *American Fisheries Society, 127th Annual Meeting, "Fisheries at Interfaces: Habitats, Disciplines, Cultures", 24-28 August 1997, Monterey, California, Abstracts: A-K*, p. 24.

Brouder, Mark J.; Speas, David W.; AND Hoffnagle, Timothy L.

1999 22.1001 Changes in number, sediment composition, and benthic invertebrates of backwaters. *In:* Webb, Robert H., Schmidt, John C., Marzolf, G. Richard, and Valdez, Richard A. (eds.), *The controlled flood in Grand Canyon.* Washington, D.C.: American Geophysical Union, pp. 241-248. (*American Geophysical Union, Geophysical Monograph 110.*)

Brower, David R.

1967 22.1264 Sedimental journey: Grim prospect for the Colorado. *From:* Statement of David Brower, Executive Director of the Sierra Club. *In: Colorado River Basin Project : hearings before the Subcommittee on Water and Power Resources of the Committee on Interior and Insular Affairs, United States House of Representatives, Ninetieth Congress, First Session, on H.R. 3300 and similar bills to authorize the construction, operation, and maintenance of the Colorado River Basin Project, and for other purposes; S. 20 and similar bills to provide for a comprehensive review of national water resource problems and programs, and for other purposes : March 13, 14, 16, and 17, 1967 : Serial No. 90-5.* Washington, D.C.: U.S. Government Printing Office, pp. 417-436 (with discussion following, pp. 454-479). [Written in the context of the proposed Grand Canyon dams.]

1967 22.1263 Sedimental journey: Grim prospect for the Colorado. *From:* Statement of David R. Brower, Executive Director, Sierra Club, San Francisco, Calif.; accompanied by Jeffrey Ingram, Southwest Representative, Sierra Club, Albuquerque, N. Mex. *In: Central Arizona Project : hearings before the Subcommittee on Water and Power Resources of the Committee on Interior and Insular Affairs, United States Senate, Ninetieth Congress, First Session, on S. 1004, S. 1013, S. 861, S. 1242, and S. 1409, bills to authorize the construction, operation, and maintenance of the Central Arizona Project (Arizona-New Mexico); and Colorado River Project, and for other purposes : May 2-5, 1967.* Washington, D.C.: U.S. Government Printing Office, pp. 521-526. [Written in the context of the proposed Grand Canyon dams.]

1967 22.673 Sedimental journey; grim prospect for the Colorado. *Sierra Club Bulletin*, 52(9) (October): 60-68, 85-88. [Written in the context of the proposed Grand Canyon dams.]

Brown, David, AND Reeder, Ben

2019 22.1209 Science, policy and dam operations: the process of building beaches. *Boatman's Quarterly Review*, 32(4) (Winter 2019-2020): 21.

2022 22.1269 How low can they go? *Boatman's Quarterly Review*, 35(2) (Summer): 12. [Lake Powell water levels and dam releases.]

Brown, Dave; Reeder, Ben; AND Hamilton, Lynn

2023 22.1278 Rite of spring, right in time: High Flow Experiment, April 24-27, 2023. *Boatman's Quarterly Review*, 36(2) (Summer): 4-5. [Administrative and environmental issues pertaining to the HFE during the present extreme conditions in the Colorado River basin.]

Brown, Kristin; Noble, Tommy A.; Collins, Brian; Matthews, Neffra A.; AND Kayen, Robert

2005 22.592 3D laser scanning (LiDAR surveying) and oblique photogrammetry assessment during the 2004 high flow test [ABSTRACT]. *In: Colorado River Ecosystem Science Symposium 2005. Abstracts. October 25-27, 2005, Fiesta Inn Resort, 2100 South Priest Drive, Tempe, AZ.* [Flagstaff, Arizona]: [U.S. Geological Survey, Grand Canyon Monitoring and Research Center], p. 52.

Bruce, Breton W.; Clow, David W.; Maupin, Molly A.; Miller, Matthew P.; Senary, Gabriel B.; Sexstone, Graham A.; AND Susong, David D.

2015 22.1002 U.S. Geological Survey National Water Census: Colorado River Basin Geographic Focus Area study. *U.S. Geological Survey, Fact Sheet 2015-3080*, 4 pp.

Budhu, Muniram

NO DATE 22.57 Mechanisms of erosion and a model to predict seepage-driven erosion due to transient flow. *In:* Beus, Stanley S., and Avery, C. C. (compilers), *The influence of variable discharge regimes on Colorado River sand bars below Glen Canyon Dam: Draft final report.* Northern Arizona University, Chapter 2 (75 pp., separately paginated). [1992.]

Budhu, Muniram, AND Contractor, D. N.

1991 22.58 Phreatic surface movement in a beach due to rapidly fluctuating water levels [ABSTRACT]. *Eos* (American Geophysical Union, Transactions), 72(44, supplement): 223-224.

Budhu, Muniram, AND Gobin, Roger

1994 22.59 Instability of sandbars in Grand Canyon. *Journal of Hydraulic Engineering*, 120(8): 919-933. [See also Erratum (*sic*), 120(12) (December): 1496; with five corrections. (Also seen with heading, "Errata"; a later version.)]

1995 22.60 Seepage erosion from dam-regulated flow: case of Glen Canyon Dam, Arizona. *Journal of Irrigation and Drainage Engineering*, 121(1): 22-33.

1995 22.61 *Monitoring of sand bar instability during the interim flows: a seepage erosion approach : final report.* University of Arizona, Department of Civil Engineering and Engineering Mechanics, report to Glen Canyon Environmental Studies, cooperative agreement 2-FC-40-13270, 125 pp.

1995 22.62 Seepage-induced slope failures on sandbars in Grand Canyon. *Journal of Hydraulic Engineering*, 121(8) (August): 601-609.

1996 22.63 Slope instability from ground-water seepage. *Journal of Hydraulic Engineering*, 122(7): 415-417.

Budhu, Muniram; Contractor, D. N.; AND Wu, Chang S.

1994 22.64 Modelling groundwater changes due to fluctuating dam discharge. *Applied Mathematical Modelling*, 18: 665-671.

Buishand, T. A.

1984 22.65 Tests for detecting a shift in the mean of hydrological time series. *Journal of Hydrology*, 73(1/2) (July): 51-69.

Bull, William B.

2007 22.950 *Tectonic geomorphology of mountains: A new approach to paleoseismology.* Malden (Massachusetts), Oxford (United Kingdom), and Carlton (Victoria, Australia), 316 pp. [Colorado River in Grand Canyon, see pp. 4-5, 53-54, 66.]

Burfield, Cynthia L. [Burfield, Cindy]

1987 22.67 Sedimentary structures of beaches and bars in the Grand Canyon. *In:* Weiss, Gayle C. (ed.), *Colorado River Investigations V : July/August, 1986* (supervised by Stanley S. Beus and Steven W. Carothers). Flagstaff, Arizona: Northern Arizona University, *for* U.S. National Park Service, Grand Canyon National Park, pp. 53-80.

Burfield, Cindy, AND Thompson, Kelcy

1991 22.66 Beach failure. *In: Colorado River Investigations #9 : July/August, 1990* (supervised by Stanley S. Beus, Lawrence E. Stevens, and Frank B. Lojko). Flagstaff, Arizona: Northern Arizona University, *for* U.S. National Park Service, Grand Canyon National Park, pp. 51-61.

Burkham, Durl E.

1986 22.68 Trends in selected hydraulic variables for the Colorado River at Lees Ferry and near Grand Canyon, Arizona—1922-1984. *Glen Canyon Environmental Studies report GCES/07/87 : National Technological Information Service accession no. PB88-216098*, 58 [65] pp. [Based on the Lees Ferry and Phantom Ranch gages.]

≡ CROSS-LISTINGS |CITED» GCNHA Monograph 8: page 3-101|

1987 22.1072 *Review of USBR/USGS sediment-transport and beach-erosion reports—Glen Canyon Environmental Studies.* [No place]: U.S. National Park Service, *for* Glen Canyon Environmental Studies, 46 pp. [U.S. Bureau of Reclamation, U.S. Geological Survey.]

1988 22.1063 Trends in selected hydraulic variables for the Colorado River at Lees Ferry and near Grand Canyon, Arizona, 1922-84. *In:* U.S. Bureau of Reclamation, Glen Canyon Environmental Studies, *Glen Canyon Environmental Studies : executive summaries of technical reports : November 1988.* [No place]: Glen Canyon Environmental Studies, pp. 67-74. [Based on the Lees Ferry and Phantom Ranch gages.]

Burr, Devon

2000 22.1073 *Turbidity in the Colorado River through Grand Canyon National Park, July 1998 to July 1999.* Tucson: University of Arizona, *for* U.S. Geological Survey, *in cooperation with* Grand Canyon Monitoring and Research Center, 29 pp.

Buscombe, Daniel D.

2016 22.1017 Spatially explicit spectral analysis of point clouds and geospatial data. *Computers and Geosciences*, 86 (January): 92-108. [Describes developed software, PySESA (Python program for Spatially Explicit Spectral Analysis). Includes (pp. 100, 101) example of “a bathymetric point cloud, obtained using multibeam echosounder, of a 60 × 80 m patch of the Colorado River bed in Western Grand Canyon, around river mile 224.”]

2017 22.1039 Shallow water benthic imaging and substrate characterization using recreational-grade sidescan-sonar. *Environmental Modelling and Software*, 89 (March): 1-18.

Buscombe, Daniel D., AND Grams, Paul E.

2014 22.1147 Topographic and acoustic estimates of grain-scale roughness from high-resolution multibeam echo-sounder: Examples from the Colorado River in Marble and Grand Canyons [ABSTRACT]. *American Geophysical Union, 2014 Fall Meeting, San Francisco, California, 15-19 December*, Abstract EP44B-02.

Buscombe, Daniel D., AND Kaplinski, Matthew

2018 22.1108 Patterns in the sand: Bedforms of the Colorado River in Grand Canyon [ABSTRACT]. *Geological Society of America, Abstracts with Programs*, 50(5): Final Paper 14-2, doi:10.1130/abs/2018RM-313937.

Buscombe, Daniel D.; Grams, Paul E.; AND Kaplinski, Matt A.

2013 22.882 Acoustic scattering by an heterogeneous river bed: Relationship to bathymetry and implications for sediment classification using multibeam echosounder data [ABSTRACT]. *American Geophysical Union, 2013 Fall Meeting, San Francisco, California, 9-13 December*, Abstract EP41E-06. [Colorado River in Grand Canyon.]

2014 22.1031 Characterizing riverbed sediment using high-frequency acoustics: 1. Spectral properties of scattering. *Journal of Geophysical Research: Earth Surface*, 119(12): 26674-2691.

2014 22.954 Characterizing riverbed sediment using high-frequency acoustics: 2. Scattering signatures of Colorado River bed sediment in Marble and Grand Canyons. *Journal of Geophysical Research: Earth Surface*, 119(12): 2692–2710.

2017 22.1244 Compositional signatures in acoustic backscatter over vegetated and unvegetated mixed sand-gravel riverbeds. *Journal of Geophysical Research: Earth Surface*, 122: 1771-1793 + U.S. Geological Survey data release https://doi.org/10.5066/F7B56HM0 (Buscombe, Grams, and Kaplinski, 2018, Acoustic backscatter—data and Python code). [Six study sites on Colorado River through Glen, Marble, and Grand Canyons: River Miles –4, 30, 32, 61, 87, 225.]

Buscombe, Daniel D.; Grams, Paul E.; Kaplinski, Matt A.; AND Tusso, Robert

2018 22.1114 Constructing a 260-km long, 25-cm resolution map of Colorado River bed sediment in Glen, Marble, and Grand Canyons [ABSTRACT]. *Geological Society of America, Abstracts with Programs*, 50(5): Final Paper 41-2, doi:10.1130/abs/2018RM-314171.

Buscombe, Daniel D.; Grams, Paul E.; Kaplinski, Matt A.; Tusso, Robert; AND Rubin, David M.

2015 22.966 Hydroacoustic signatures of Colorado riverbed sediments in Marble and Canyons using multibeam sonar. *In: JFIC2015 : Sustainable Water Resources in a Changing Environment : proceedings of the Joint Federal Interagency Conference 2015 : proceedings of papers of the 5th Federal Interagency Hydrologic Modeling Conference and the 10th Federal Interagency Sedimentation Conference, Reno, NV, April 19-23, 2015*, pp. 1066-1077.

Buscombe, Daniel D.; Grams, Paul E.; Melis, Theodore S.; AND Smith, Sean M. C.

2015 22.958 Large river bed sediment characterization with low-cost sidescan sonar: Case studies from two settings in the Colorado (Arizona) and Penobscot (Maine) Rivers. *In: JFIC2015 : Sustainable Water Resources in a Changing Environment : proceedings of the Joint Federal Interagency Conference 2015 : proceedings of papers of the 5th Federal Interagency Hydrologic Modeling Conference and the 10th Federal Interagency Sedimentation Conference, Reno, NV, April 19-23, 2015*, pp. 1273-1277.

Buscombe, Daniel D.; Grams, Paul E.; AND Smith, Sean M. C.

2016 22.1016 Automated riverbed sediment classification using low-cost sidescan sonar. *Journal of Hydraulic Engineering*, 142(2): 06015019, 7 pp. [Includes Colorado River in Grand Canyon.]

Buscombe, Daniel D.; Kaplinski, Matt A.; Grams, Paul E.; Ashley, Thomas; McElroy, Brandon; AND Rubin, David M.

2017 22.1155 The sand dunes of the Colorado River, Grand Canyon, USA [ABSTRACT]. *In:* Lanzoni, Stefano, Redolfi, Marco, and Zolezzi, Guido (eds.), *RCEM 2017—Back to Italy : the 10th Symposium on River, Coastal and Estuarine Morphodynamics : Trento-Padova, 15-22 September 2017 : book of abstracts*. [No place]: University of Trento—Italy, Department of Civil, Environmental and Mechanical Engineering; Università degli Studi de Padova, Dipartimento de Ingegneria Civile, Edile e Ambientale, p. 161.

Butterfield, Bradley J.; Grams, Paul E.; Durning, Laura E.; Hazel, Joseph; Palmquist, Emily C.; Ralston, Barbara E.; AND Sankey, Joel B.

2020 22.1246 Associations between riparian plant morphological guilds and fluvial sediment dynamics along the regulated Colorado River in Grand Canyon. *River Research and Applications*, 36(3 (March): 410-421 + Supporting Information online with https://doi.org/10.1002/rra.3589. [Also, "Data availability statement: The remotely sensed vegetation classification data are published by Durning et al. (2018). The digital elevation model data are available from the USGS ScienceBase-Catalog (Grams et al. 2020)." (No links provided.)]

C

Cain, Joseph, IV; Kaplinski, Matt; Hazel, Joseph E., Jr.; Manone, Mark; Parnell, Roderic; AND Souter, John

2000 22.1071 *Monitoring channel margin fine-grained sediment deposits in the Colorado River ecosystem downstream of Glen Canyon Dam : draft report.* Flagstaff, Arizona: Northern Arizona University, Department of Geology, *for* Grand Canyon Monitoring and Research Center, 19 [43] pp. (Cooperative Agreement CA 1425-98-FC-40-22630.)

Carlowicz, Michael

1996 22.1168 Controlled flood of Colorado River creates stream of data. *Eos* (American Geophysical Union, Transactions), 77(24) (June 11): 225, 230.

Cantor Monroy, Miguel Mauricio

2010 22.1258 *Modelación del transporte de solutos en condiciones de flujo no permanente con alta dispersión y zonas muertas en canales de baja pendiente—Aplicación al caso del río Bogotá en el tramo de Puente Vargas-Puente La Virgen.* Master's thesis, Universidad Nacional de Colombia, Bogotá, 166 pp. [See Chapter 4, "Aplicación Río Colorado—implementación del marco de modelación en flujo no permanente" (pp. 56-73).] [In Spanish.]

Carothers, Steven W., AND Brown, Bryan T.

1991 22.69 *The Colorado River through Grand Canyon : natural history and human change.* Tucson: University of Arizona Press, 235 pp. [Hardbound and paperbound states. Also later released through “Arizona Books on Request” on-demand publishing program.]

2013 22.885 Analyzing sediment impacts for the Glen Canyon Long-term Experimental and Management Plan EIS [ABSTRACT]. *American Geophysical Union, 2013 Fall Meeting, San Francisco, California, 9-13 December*, Abstract H31B-1153. [Environmental Impact Statement.]

Russell, William H.

1967 22.1018 Conservation. *The Texas Caver* (Texas Speleological Association), 12(11) (November): 149. [Article opens with remarks that "[t]he recent conservation decision not to build a dam in the Grand Canyon will only slightly delay irrevocable changes in the canyon." Dams upstream will stop floods and "soon the Colorado will be dammed by rockpiles at every tributary." Also includes a quotation from John Wesley Powell. The article segways immediately into comments on overgrazing having affected the underground web of caves, particularly two "biologically important" caves in Texas. Thematically confused.]

Ryan, Tom

2001 22.513 gcpba Newswire—Glen Canyon Dam flow update, October 1, 2001. *In:* Newswire Quarterly Review [SECTION]. *The Waiting List* (Grand Canyon Private Boaters Association), 5(3) (Fall): 39. [Originally distributed electronically via gcpba Newswire.]

2023 22.1297 Les preses: una avaluació de l'impacte ecològic. Las presas: una evaluación del impacto ecológico. Dams: an ecological impact assessment. *Biologia on-line*, 12(1) (February), 14 pp. [See pp. 6-7, including the following note in its entirety: "La presa del Grand Canyon, acumula 66 milions de tonelades de sediment a l'any, el que equival al 95% de l'aportament total." (*transl.* 'The Grand Canyon Dam accumulates 66 million tons of sediment a year, which is equivalent to 95% of the total contribution.") A conflated statement, inasmuch as there is no "Grand Canyon Dam"; but the tonnage figure is ascertained here as pertaining to the gage record at the river gage designated "near Grand Canyon", which is the informally named Phantom Ranch gage. Apparently cited as an example, as there is no ecological discussion of the Colorado River or the Grand Canyon.] [In Catalan, with item title and abstract also in Spanish and English.]

THE GRAND CANON

A WORLDWIDE BIBLIOGRAPHY OF THE GRAND CANYON AND LOWER COLORADO RIVER REGIONS
IN THE UNITED STATES AND MEXICO

23

GEOLOGICAL FIELD GUIDES IN THE GRAND CANYON REGION

Geological field guides (including road logs) for the Grand Canyon and vicinity, and for the Colorado River corridor in Grand Canyon

GO TO VOLUME CONTENTS PAGE
GO TO BIBLIOGRAPHY TABLE OF CONTENTS

PART 23. GEOLOGICAL FIELD GUIDES IN THE GRAND CANYON REGION

INCLUDING GEOLOGICAL GUIDES ON THE COLORADO RIVER

OVERVIEW. This part includes all publications that are intended to serve as geological field guides to routes and specific localities in the Grand Canyon and vicinity. Included among them are all geological guides to the Colorado River through the Grand Canyon.

RELATED MATERIAL

PART 10. COLORADO RIVER GUIDES for non-geological guides to the Colorado River through Grand Canyon

PART 11, SECTION 2. LOWER COLORADO RIVER—GEOLOGY for geological guides in the lower Colorado River region

PART 21. GEOLOGY AND PALEONTOLOGY for "field guides" that are primarily textual chapter treatments of the geology of specific areas, as opposed to directional guides for use in the field

PART 23. GEOLOGICAL FIELD GUIDES IN THE GRAND CANYON REGION

INCLUDING GEOLOGICAL GUIDES ON THE COLORADO RIVER

ANONYMOUS

1971 23.100 Index to road and river logs in Arizona. *Field Notes* (Arizona Bureau of Mines), 1(2) (June): 8-9.

THE GRAND CANON

A WORLDWIDE BIBLIOGRAPHY OF THE GRAND CANYON AND LOWER COLORADO RIVER REGIONS
IN THE UNITED STATES AND MEXICO

24

GEOLOGIC AND SPECIAL TOPOGRAPHIC MAPS IN THE GRAND CANYON REGION

WITH GUIDES TO USGS TOPOGRAPHIC QUADRANGLES

Separately published geologic, geodetic, and special topographic maps of the Grand Canyon region; with summary guides to U.S. Geological Survey topographical quadrangles in the region

Refer now to THE GRAND CANON **Volume 2, CARTOBIBLIOGRAPHY OF THE GRAND CANYON AND LOWER COLORADO RIVER REGIONS, for guides to topographical quadrangles of the U.S. Geological Survey in the Grand Canyon region (see notes in the Appendix to Part 24 in the present volume)**

See PART 11, SECTION 2A for *separately published geologic* maps in the *lower Colorado River region.* Users who wish to examine all of these geological maps in context with all cartographical publications on the Grand Canyon–Lower Colorado River region should consult the *Cartobibliography* (see Part 25 in the present volume for more information).

GO TO VOLUME CONTENTS PAGE
GO TO BIBLIOGRAPHY TABLE OF CONTENTS

PART 24. GEOLOGIC AND SPECIAL TOPOGRAPHIC MAPS IN THE GRAND CANYON REGION

OVERVIEW. This part of the bibliography lists only separately published maps, and selected atlas sheets. Regional maps that embrace the Grand Canyon area are included.

NOTES FOR PART 24

PART 24 is a contiguous listing of *separately published* geologic and special maps for the Grand Canyon region. Maps listed in Part 24 are also cited in Volume 2, *Cartobibliography of the Grand Canyon and Lower Colorado River Regions* (in Volume 1 refer to notes in Part 25). Users who wish to examine these geological maps in context with all cartographical publications on the Grand Canyon–Lower Colorado River region, or in chronological order, should consult the *Cartobibliography*.

Occasional geologic maps are from Utah, but which include a very narrow strip of Arizona along the southern margin of those quadrangles. They are listed both for that narrow strip and for the inclusion of very nearby lands, which thus may pertain to the geographical bounds of this bibliography. The Arizona portion on each map varies but is generally just a matter of yards due to the surveyed boundary not precisely following the 37th parallel (the southern boundary of the quadrangles in question).

Maps that are published as separate sheets within a monographic publication—for example, maps folded into pockets in those volumes, laid in loose, or included in separate volumes or boxes—are not generally cited separately in this bibliography but are considered part of the publications in which they appear, for which see in Part 21. For specific reasons, though, a few sheets in specialized atlases may be cited in within this part (Part 24).

Of note are comprehensive indices to all published geologic maps that do include those that were published as figures and sheets *within* publications—but to 1992 only. These are:

Spamer, Earle E. 1990. Geology of the Grand Canyon: A guide and index to published graphic and tabular data (excluding paleontology). *Geological Society of America, Microform Publication 21*, 674 pp. [See pp. 124-213.]

Spamer, Earle E. 1992. Geology of the Grand Canyon: A guide and index to published graphic and tabular data (excluding paleontology). *Geological Society of America, Microform Publication 22*, 125 pp. [See pp. 20-46.]

[*NOTE*: These microform publications have since been made commercially available as PDFs online through https://pubs.geoscienceworld.org/books/ (note added May 2019).]

Clarence E. Dutton's Tertiary History of the Grand Cañon District (*U.S. Geological Survey Monograph 2*, 1881, 1885), with its great double-folio *Atlas* comprising 23 geologic maps and geologically significant scenic views by William Henry Holmes and Thomas Moran, is one of the most-sought publications by afficionados of the American West—with prices attending to the demand. Many copies of the Atlas have been disbound over the years and its plates reused or made available separately.

With regard to river mileages as measured on the Colorado River, see note in Part 22 of this bibliography.

The following two facing pages reproduce
Edwin E. Howell's scarce, commerically produced geological relief map of the Grand Canyon region

Edwin E. Howell's scarce, commerically produced geological relief map of the Grand Canyon region (no date, ITEM NO. 24.309) [no place]: U.S. Geological Survey, 3-dimensional map, topography with colored time-stratigraphic outcrop markings, vertical and horizontal scales 1 inch = 2 miles (1:126,720). Originally produced in 1875, with different states at later dates. The two small insets at *lower right* depict in relief, to the same scale, "Yosemite Valley" *(left)* and "Niagara Falls and Cañon" *(right)* (see *next page* for detail view). The Library of Congress image is apparently a black-and-white photograph of the actual map, which measures 6 feet, 6 inches by 6 feet 7 inches.

This copy (as illustrated above) in the Library of Congress is shown online in a photograph with notational date of January 22, 1916. (Geography and Map Division, call no. "G4332.G7 191–.G4 TIL".) Downloadable digital views accessible at http://hdl.loc.gov/loc.gmd/g4332g.np000097 (last accessed January 25, 2022).

2006 24.238 **Geologic map of the Valle 30′ × 60′ quadrangle, Coconino County, northern Arizona.** *U.S. Geological Survey, Scientific Investigations Map 2895*, 22 pp., 1 sheet, scale 1:100,000.

Also available only as downloads from U.S. Geological Survey publications website are geologic maps of the thirty-two 7.5′ quadrangles (scales 1:24,000) within the Valle 30′ × 60′ quadrangle, all of which can be accessed directly from this webpage: https://pubs.usgs.gov/sim/2006/2895/24k/images/ (accessed 10 July 2024). Quadrangles are as follows:

2006 24.239 **National Tank quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30′ × 60′ quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895*. [7.5′ quadrangle, scale 1:24,000.]

2006 24.240 **Supai Camp quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30′ × 60′ quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895*. [7.5′ quadrangle, scale 1:24,000.]

2006 24.241 **Hualapai Tank quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30′ × 60′ quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895*. [7.5′ quadrangle, scale 1:24,000.]

2006 24.242 **Baldy Basin quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30′ × 60′ quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895*. [7.5′ quadrangle, scale 1:24,000.]

2006 24.243 **Box K Ranch quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30′ × 60′ quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895*. [7.5′ quadrangle, scale 1:24,000.]

2006 24.244 **Metzger Tank quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30′ × 60′ quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895*. [7.5′ quadrangle, scale 1:24,000.]

2006 24.245 **Tusayan West quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30′ × 60′ quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895*. [7.5′ quadrangle, scale 1:24,000.]

2006 24.246 **Tusayan East quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30′ × 60′ quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895*. [7.5′ quadrangle, scale 1:24,000.]

2006 24.247 **Dike Tank quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30′ × 60′ quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895*. [7.5′ quadrangle, scale 1:24,000.]

2006	24.248	**Supai Camp SE quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30′ × 60′ quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895*. [7.5′ quadrangle, scale 1:24,000.]
2006	24.249	**Hazen Hole Tank quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30′ × 60′ quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895*. [7.5′ quadrangle, scale 1:24,000.]
2006	24.250	**Rosebud Tank quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30′ × 60′ quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895*. [7.5′ quadrangle, scale 1:24,000.]
2006	24.251	**Little Harpo Canyon quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30′ × 60′ quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895*. [7.5′ quadrangle, scale 1:24,000.]
2006	24.252	**Howard Hill quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30′ × 60′ quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895*. [7.5′ quadrangle, scale 1:24,000.]
2006	24.253	**Red Butte SW quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30′ × 60′ quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895*. [7.5′ quadrangle, scale 1:24,000.]
2006	24.254	**Red Butte quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30′ × 60′ quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895*. [7.5′ quadrangle, scale 1:24,000.]
2006	24.255	**Rose Well Camp West quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30′ × 60′ quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895*. [7.5′ quadrangle, scale 1:24,000.]
2006	24.256	**Rose Well Camp East quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30′ × 60′ quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895*. [7.5′ quadrangle, scale 1:24,000.]
2006	24.257	**Black Tank quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30′ × 60′ quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895*. [7.5′ quadrangle, scale 1:24,000.]
2006	24.258	**Tin House quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30′ × 60′ quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895*. [7.5′ quadrangle, scale 1:24,000.]
2006	24.259	**Markham Dam quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30′ × 60′ quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895*. [7.5′ quadrangle, scale 1:24,000.]
2006	24.260	**Miller Tank quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30′ × 60′ quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895*. [7.5′ quadrangle, scale 1:24,000.]

2006 24.261 **Valle Tank quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30′ × 60′ quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895*. [7.5′ quadrangle, scale 1:24,000.]

2006 24.262 **Molly Ann Draw quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30′ × 60′ quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895*. [7.5′ quadrangle, scale 1:24,000.]

2006 24.263 **Rhodes Canyon quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30′ × 60′ quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895*. [7.5′ quadrangle, scale 1:24,000.]

2006 24.264 **Big Bud Tank quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30′ × 60′ quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895*. [7.5′ quadrangle, scale 1:24,000.]

2006 24.265 **Bishop Lake quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30′ × 60′ quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895*. [7.5′ quadrangle, scale 1:24,000.]

Billingsley, George H.; Hamblin, W. Kenneth; Wellmeyer, Jessica L.; Block, Debra; AND Dudash, Stephanie

2001 24.223 Geologic map of part of the Uinkaret Volcanic Field, Mohave County, northwestern Arizona. *U.S. Geological Survey, Miscellaneous Field Studies Map MF-2368*, scale 1:31,680. [Mount Trumbull-Toroweap Valley area.]

Billingsley, George H.; Harr, Michelle; AND Wellmeyer, Jessica L.

2000 24.224 Geologic map of the upper Parashant Canyon and vicinity, northern Mohave County, northwestern Arizona. *U.S. Geological Survey, Miscellaneous Field Studies Map MF-2343*, scale 1:31,680, text 27 pp. [Upper Parashant Canyon-Grassy Mountain area.]

Billingsley, George H.; Priest, Susan S.; AND Dudash, Stephanie L.

2002 24.366 Geologic map of the Clayhole Wash and vicinity, Mohave County, northwestern Arizona. *U.S. Geological Survey, Miscellaneous Field Studies Map MF-2394*, scale 1:31,680, text 20 pp.

Billingsley, George H.; Priest, Susan S.; AND Felger, Tracey J.

2004 24.360 Geologic map of Pipe Spring National Monument and the western Kaibab-Paiute Indian Reservation, Mohave County, Arizona. *U.S. Geological Survey, Miscellaneous Investigations Map I-2863*, scale 1:31,680, 1 sheet.

2007 24.274 **Geologic map of the Cameron 30′ × 60′ quadrangle, Coconino County, northern Arizona.** *U.S. Geological Survey, Scientific Investigations Map 2977*, scale 1:100,000, 1 sheet, 33 pp.

Also available only as downloads from U.S. Geological Survey publications website are geologic maps of the thirty-two 7.5′ quadrangles (scales 1:24,000) within the Cameron 30′ × 60′ quadrangle, all of which can be accessed directly from this webpage: https://pubs.usgs.gov/sim/2007/2977/24k/images/ (accessed 10 July 2024). Quadrangles are as follows:

2007 24.275 **Grandview Point quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30′ × 60′ quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977*. [7.5′ quadrangle, scale 1:24,000.]

2007 24.276 **Grandview Point NE quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30′ × 60′ quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977*. [7.5′ quadrangle, scale 1:24,000.]

2007 24.277 **Hellhole Bend quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30′ × 60′ quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977*. [7.5′ quadrangle, scale 1:24,000.]

2007 24.278 **Coconino Point quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30′ × 60′ quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977*. [7.5′ quadrangle, scale 1:24,000.]

2007 24.279 **Cameron North quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30′ × 60′ quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977*. [7.5′ quadrangle, scale 1:24,000.]

2007 24.280 **Cameron NE quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30′ × 60′ quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977*. [7.5′ quadrangle, scale 1:24,000.]

2007 24.281 **Goldtooth Point quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30′ × 60′ quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977*. [7.5′ quadrangle, scale 1:24,000.]

2007 24.282 **Appoloosa Ridge quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30′ × 60′ quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977*. [7.5′ quadrangle, scale 1:24,000.]

2007 24.283 **Harbison Tank quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30′ × 60′ quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977*. [7.5′ quadrangle, scale 1:24,000.]

2007 24.284 **Peterson Flat quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30′ × 60′ quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977*. [7.5′ quadrangle, scale 1:24,000.]

2007 24.285 **Willows Camp quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30′ × 60′ quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977*. [7.5′ quadrangle, scale 1:24,000.]

2007 24.286 **Coconino Point SE quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30′ × 60′ quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977*. [7.5′ quadrangle, scale 1:24,000.]

2007 24.287 **Cameron South quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30′ × 60′ quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977*. [7.5′ quadrangle, scale 1:24,000.]

2007 24.288 **Cameron SE quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30′ × 60′ quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977*. [7.5′ quadrangle, scale 1:24,000.]

2007 24.289 **The Landmark quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30′ × 60′ quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977*. [7.5′ quadrangle, scale 1:24,000.]

2007 24.290 **Gold Spring quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30′ × 60′ quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977*. [7.5′ quadrangle, scale 1:24,000.]

2007 24.291 **Dog Knobs quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30′ × 60′ quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977*. [7.5′ quadrangle, scale 1:24,000.]

2007 24.292 **Lockwood Canyon quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30′ × 60′ quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977*. [7.5′ quadrangle, scale 1:24,000.]

2007 24.293 **Campbell Francis Wash quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30′ × 60′ quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977*. [7.5′ quadrangle, scale 1:24,000.]

2007 24.294 **Gray Mountain.** [As part of 1:100,000 scale] Geologic map of the Cameron 30′ × 60′ quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977*. [7.5′ quadrangle, scale 1:24,000.]

2007 24.295 **Wupatki NE quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30′ × 60′ quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977*. [7.5′ quadrangle, scale 1:24,000.]

2007 24.296 **Badger Spring quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30′ × 60′ quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977*. [7.5′ quadrangle, scale 1:24,000.]

2007 24.297 **Rock Head quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30′ × 60′ quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977*. [7.5′ quadrangle, scale 1:24,000.]

2007 24.298 **Ebert Mountain quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30′ × 60′ quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977*. [7.5′ quadrangle, scale 1:24,000.]

2007 24.299 **Chapel Mountain quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30′ × 60′ quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977*. [7.5′ quadrangle, scale 1:24,000.]

2007 24.300 **SP Mountain quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30′ × 60′ quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977*. [7.5′ quadrangle, scale 1:24,000.]

2007 24.301 **East of SP Mountain quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30′ × 60′ quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977*. [7.5′ quadrangle, scale 1:24,000.]

2007 24.302 **Wupatki SW quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30′ × 60′ quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977*. [7.5′ quadrangle, scale 1:24,000.]

2007 24.303 **Wupatki SE quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30′ × 60′ quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977*. [7.5′ quadrangle, scale 1:24,000.]

2007 24.304 **Standing Rocks.** [As part of 1:100,000 scale] Geologic map of the Cameron 30′ × 60′ quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977*. [7.5′ quadrangle, scale 1:24,000.]

2007 24.305 **White Water Tank quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30′ × 60′ quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977*. [7.5′ quadrangle, scale 1:24,000.]

2007 24.306 **Wupatki NE quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30′ × 60′ quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977*. [7.5′ quadrangle, scale 1:24,000.]

2008 24.316 **Geologic map of the Fredonia 30′ × 60′ quadrangle, Mohave and Coconino Counties, northern Arizona.** *U.S. Geological Survey, Scientific Investigations Map 3035*, scale 1:100,000, 1 sheet, 23 pp.

Also available only as downloads from U.S. Geological Survey publications website are geologic maps of the thirty-two 7.5′ quadrangles (scales 1:24,000) within the Fredonia 30′ × 60′ quadrangle, all of which can be accessed directly from this webpage: https://pubs.usgs.gov/sim/3035/24k/images/ (accessed 10 July 2024). Quadrangles are as follows:

2008	24.317	**Colorado City quadrangle.** [As part of 1:100,000 scale] Geologic map of the Fredonia 30′ × 60′ quadrangle, Mohave and Coconino Counties, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 3035*. [7.5′ quadrangle, scale 1:24,000.]
2008	24.318	**Moccasin quadrangle.** [As part of 1:100,000 scale] Geologic map of the Fredonia 30′ × 60′ quadrangle, Mohave and Coconino Counties, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 3035*. [7.5′ quadrangle, scale 1:24,000.]
2008	24.319	**Kaibab quadrangle.** [As part of 1:100,000 scale] Geologic map of the Fredonia 30′ × 60′ quadrangle, Mohave and Coconino Counties, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 3035*. [7.5′ quadrangle, scale 1:24,000.]
2008	24.320	**Fredonia quadrangle.** [As part of 1:100,000 scale] Geologic map of the Fredonia 30′ × 60′ quadrangle, Mohave and Coconino Counties, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 3035*. [7.5′ quadrangle, scale 1:24,000.]
2008	24.321	**Shinarump Point quadrangle.** [As part of 1:100,000 scale] Geologic map of the Fredonia 30′ × 60′ quadrangle, Mohave and Coconino Counties, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 3035*. [7.5′ quadrangle, scale 1:24,000.]
2008	24.322	**Muggins Flat quadrangle.** [As part of 1:100,000 scale] Geologic map of the Fredonia 30′ × 60′ quadrangle, Mohave and Coconino Counties, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 3035*. [7.5′ quadrangle, scale 1:24,000.]
2008	24.323	**Buck Pasture Canyon quadrangle.** [As part of 1:100,000 scale] Geologic map of the Fredonia 30′ × 60′ quadrangle, Mohave and Coconino Counties, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 3035*. [7.5′ quadrangle, scale 1:24,000.]
2008	24.324	**Coyote Buttes quadrangle.** [As part of 1:100,000 scale] Geologic map of the Fredonia 30′ × 60′ quadrangle, Mohave and Coconino Counties, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 3035*. [7.5′ quadrangle, scale 1:24,000.]
2008	24.325	**Maroney Well quadrangle.** [As part of 1:100,000 scale] Geologic map of the Fredonia 30′ × 60′ quadrangle, Mohave and Coconino Counties, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 3035*. [7.5′ quadrangle, scale 1:24,000.]
2008	24.326	**Pipe Valley quadrangle.** [As part of 1:100,000 scale] Geologic map of the Fredonia 30′ × 60′ quadrangle, Mohave and Coconino Counties, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 3035*. [7.5′ quadrangle, scale 1:24,000.]
2008	24.327	**Pipe Spring quadrangle.** [As part of 1:100,000 scale] Geologic map of the Fredonia 30′ × 60′ quadrangle, Mohave and Coconino Counties, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 3035*. [7.5′ quadrangle, scale 1:24,000.]
2008	24.328	**Clear Water Spring quadrangle.** [As part of 1:100,000 scale] Geologic map of the Fredonia 30′ × 60′ quadrangle, Mohave and Coconino Counties, northern Arizona.

		U.S. Geological Survey, Scientific Investigations Map 3035. [7.5′ quadrangle, scale 1:24,000.]
2008	24.329	**White Sage Flat quadrangle.** [As part of 1:100,000 scale] Geologic map of the Fredonia 30′ × 60′ quadrangle, Mohave and Coconino Counties, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 3035*. [7.5′ quadrangle, scale 1:24,000.]
2008	24.330	**Le Fevre Ridge quadrangle.** [As part of 1:100,000 scale] Geologic map of the Fredonia 30′ × 60′ quadrangle, Mohave and Coconino Counties, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 3035*. [7.5′ quadrangle, scale 1:24,000.]
2008	24.331	**Cooper Ridge quadrangle.** [As part of 1:100,000 scale] Geologic map of the Fredonia 30′ × 60′ quadrangle, Mohave and Coconino Counties, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 3035*. [7.5′ quadrangle, scale 1:24,000.]
2008	24.332	**House Rock Spring quadrangle.** [As part of 1:100,000 scale] Geologic map of the Fredonia 30′ × 60′ quadrangle, Mohave and Coconino Counties, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 3035*. [7.5′ quadrangle, scale 1:24,000.]
2008	24.333	**Wild Band Pockets quadrangle.** [As part of 1:100,000 scale] Geologic map of the Fredonia 30′ × 60′ quadrangle, Mohave and Coconino Counties, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 3035*. [7.5′ quadrangle, scale 1:24,000.]
2008	24.334	**Sunshine Ridge quadrangle.** [As part of 1:100,000 scale] Geologic map of the Fredonia 30′ × 60′ quadrangle, Mohave and Coconino Counties, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 3035*. [7.5′ quadrangle, scale 1:24,000.]
2008	24.335	**Findaly Tank quadrangle.** [As part of 1:100,000 scale] Geologic map of the Fredonia 30′ × 60′ quadrangle, Mohave and Coconino Counties, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 3035*. [7.5′ quadrangle, scale 1:24,000.]
2008	24.336	**Gunsight Point quadrangle.** [As part of 1:100,000 scale] Geologic map of the Fredonia 30′ × 60′ quadrangle, Mohave and Coconino Counties, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 3035*. [7.5′ quadrangle, scale 1:24,000.]
2008	24.337	**Toothpick Ridge quadrangle.** [As part of 1:100,000 scale] Geologic map of the Fredonia 30′ × 60′ quadrangle, Mohave and Coconino Counties, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 3035*. [7.5′ quadrangle, scale 1:24,000.]
2008	24.338	**Warm Springs Canyon quadrangle.** [As part of 1:100,000 scale] Geologic map of the Fredonia 30′ × 60′ quadrangle, Mohave and Coconino Counties, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 3035*. [7.5′ quadrangle, scale 1:24,000.]

2008 24.339 **Jacob Lake quadrangle.** [As part of 1:100,000 scale] Geologic map of the Fredonia 30′ × 60′ quadrangle, Mohave and Coconino Counties, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 3035*. [7.5′ quadrangle, scale 1:24,000.]

2008 24.340 **House Rock quadrangle.** [As part of 1:100,000 scale] Geologic map of the Fredonia 30′ × 60′ quadrangle, Mohave and Coconino Counties, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 3035*. [7.5′ quadrangle, scale 1:24,000.]

2008 24.341 **Heaton Knolls quadrangle.** [As part of 1:100,000 scale] Geologic map of the Fredonia 30′ × 60′ quadrangle, Mohave and Coconino Counties, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 3035*. [7.5′ quadrangle, scale 1:24,000.]

2008 24.342 **Robinson Canyon quadrangle.** [As part of 1:100,000 scale] Geologic map of the Fredonia 30′ × 60′ quadrangle, Mohave and Coconino Counties, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 3035*. [7.5′ quadrangle, scale 1:24,000.]

2008 24.343 **Grama Spring quadrangle.** [As part of 1:100,000 scale] Geologic map of the Fredonia 30′ × 60′ quadrangle, Mohave and Coconino Counties, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 3035*. [7.5′ quadrangle, scale 1:24,000.]

2008 24.344 **Jumpup Point quadrangle.** [As part of 1:100,000 scale] Geologic map of the Fredonia 30′ × 60′ quadrangle, Mohave and Coconino Counties, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 3035*. [7.5′ quadrangle, scale 1:24,000.]

2008 24.345 **Sowats Point quadrangle.** [As part of 1:100,000 scale] Geologic map of the Fredonia 30′ × 60′ quadrangle, Mohave and Coconino Counties, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 3035*. [7.5′ quadrangle, scale 1:24,000.]

2008 24.346 **Big Springs quadrangle.** [As part of 1:100,000 scale] Geologic map of the Fredonia 30′ × 60′ quadrangle, Mohave and Coconino Counties, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 3035*. [7.5′ quadrangle, scale 1:24,000.]

2008 24.347 **Telephone Hill quadrangle.** [As part of 1:100,000 scale] Geologic map of the Fredonia 30′ × 60′ quadrangle, Mohave and Coconino Counties, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 3035*. [7.5′ quadrangle, scale 1:24,000.]

2008 24.348 **Cane quadrangle.** [As part of 1:100,000 scale] Geologic map of the Fredonia 30′ × 60′ quadrangle, Mohave and Coconino Counties, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 3035*. [7.5′ quadrangle, scale 1:24,000.]

Birdseye, Claude H.

NO DATE 24.220 *Plan and profile of Colorado River from Lees Ferry, Ariz., to Black Canyon, Ariz.-Nev., and Virgin River, Nev.* Oakland, California: American River Touring Association, 1 map and 1 profile on 8 sheets, and mileage schedule sheet; scale [*ca.* 1:63,360]. [1966?] [Reproduction from Birdseye (1924) at about one-half original size but without correcting the stated 1:31,680 scale.]

1924 24.46 *Plan and profile of Colorado River from Lees Ferry, Ariz., to Black Canyon, Ariz.-Nev., and Virgin River, Nev.* (Topography by R. W. Burchard and C. H. Birdseye.) U.S. Geological Survey, 21 sheets consisting of 14 plans (maps, sheets A-N, scale 1:31,680, contour interval 50 feet, contour interval on river surface 5 feet; *see key below*) and 7 profiles (sheets O-U, scale 1:81:680, vertical scale 1 inch = 20 feet). [Virgin River, between Colorado River and Muddy Creek, plans on sheets K, M, N.] [Full set displays Colorado River Miles 0-356, and Virgin River Miles 0-28. "Mileage [on Colorado River] is measured [downstream] from U. S. G. S. concrete gage well opposite mouth of Paria River".] [*NOTE*: For continuation of series from Black Canyon to the southern international boundary, see U.S. Geological Survey (1927, ITEM NO. 11.18458) in Part 11/Section 2A.] [Regarding Mile 0, see in notes to Part 22 herein.]

KEY MAP OF PLAN SHEETS

1943 24.829 *Plan and profile of Colorado River from Lees Ferry, Ariz., to Black Canyon, Ariz.-Nev., and Virgin River, Nev.* (Topography by R. W. Burchard and C. H. Birdseye.) U.S. Geological Survey, 21 sheets. [Reprint of Birdseye (1924) but also noting, "Printed 1924".]

Birdseye, Claude H., AND Gerdine, T. G.

1922 24.816 *Plan and profile of Colorado River from Lees Ferry, Ariz[.], to mouth of Green River, Utah; San Juan River to mouth of Chinle Creek, Utah; and certain tributaries.* (Topography by A. T. Fowler and V. E. Leech.) U.S. Geological Survey, 22 sheets consisting of 16 plans (maps, sheets A-P, scale 1:31,680; *see key below*) and 6 profiles (sheets Q-V). [Within the geographical bounds of this bibliography, see plan from Lees Ferry to Mile −15 on sheets A and B (contour interval 20 feet, contour interval on river surface 5 feet); corresponding profile on sheet Q, vertical scale 1 inch = 20 feet). C. H. Birdseye, Chief Topographic Engineer; T. G. Gerdine, Division Topographic Engineer; topography by A. T. Fowler and V. E. Leech; surveyed 1921.] [Full set displays Colorado River Miles 0 to −216, and San Juan River Miles 0-133. Mileage on Colorado River measured upstream from USGS concrete gage well opposite mouth of Paria River; usually by convention indicated as negative numbers.] [Regarding Mile 0, see in notes to Part 22 herein.]

Dutton, Clarence Edward

NO DATE 24.789 [Map of Kaibab Plateau and surrounding country.] [New York]: Globe Stationery and Printing Co., 1 sheet. [1880s?] [Notice by John Ward, Manager, Globe Stationery and Printing Co.; square brackets are part of the quotation: "This Map is copied from Powell's Geological Survey [Tertiary History of the Grand Cañon District, by Clarence E. Dutton, U. S. A.] The Geological contours being followed exactly, only Topographical Map lines are inserted instead of the Geological lines, to show more clearly the elevations, depressions, natural boundaries and sub-divisions."] [General boundaries of quadrangle: White Cliffs, Utah, on the north; Lees Ferry on the east; Kanab Cañon on the west; the Colorado River on the south.]

1882 24.61 The Tertiary history of the Grand Cañon district; with atlas. *U.S. Geological Survey, Monograph 2*, 264 pp. [quarto]; Atlas, 23 sheets [double folio]. [Itemization of geological maps by Atlas sheet number: ***II***: **Geological Map of the Western Part of the Plateau Province** [scale nearly 1:1,000,000; colored] ["The topography of the colored portion is compiled by J. H. Renshawe, from data and surveys by the U.S. Geographical and Geological Survey of the Rocky Mountain Region, J. W. Powell in charge, and by the United States Geological Survey, Clarence King, Director. The topography of the uncolored portion is compiled largely from surveys under the direction of Capt. George M. Wheeler, U.S. Engineers. Geology by C. E. Dutton" (*from* Sheet I, "List of Atlas Sheets")]. ***III***: **Sketch Map of the Western Part of the Plateau Province Showing Faults of the Grand Cañon District and High Plateaus** [scale *ca.* 1:1,000,000] ["The topography is the same as that of the preceding sheet." (*from* Sheet I)]. ***VII–VIII*** (halves of one map): **Map of the Uinkaret Plateau North Half** [scale 1:63,360; colored] [topography by J. H. Renshawe, geology by C. E. Dutton]; **Map of the Uinkaret Plateau South Half** [scale 1:63,360; colored] [topography by J. H. Renshawe, geology by C. E. Dutton]. ***XII–XIV*** (quadrants of one map): **Geologic Map of the Southern Part of the Kaibab Plateau (Part I. North-Western Sheet.)** [scale 1:63,360;

colored] [topography by Sumner H. Bodfish, geology by C. E. Dutton]; **Geologic Map of the Southern Part of the Kaibab Plateau (Part II. North-Eastern Sheet.)** [scale 1:63,360; colored] [topography by Sumner H. Bodfish; geology by C. E. Dutton]; **Geologic Map of the Southern Part of the Kaibab Plateau (Part III. South-Western Sheet.)** [scale 1:63,360; colored] [topography by Sumner H. Bodfish, geology by C. E. Dutton]; **Geologic Map of the Southern Part of the Kaibab Plateau (Part IV. South-Eastern Sheet.)** [scale 1:63,360; colored] [topography by Sumner H. Bodfish, geology by C. E. Dutton]. ***XX–XXIV*** (quadrants of one map; XX/XXI abut East-West; XXI/XXIV abut North-South): **Geologic Map Showing the South-Western Portion of the Mesozoic Terraces and the Vicinity of the Hurricane Fault** [scale 1:250,000; colored] [geology by C. E. Dutton]; **Geologic Map of the Mesozoic Terraces of the Grand Cañon District and the Southern Portion of the High Plateaus** [scale 1:250,000; colored] [geology by C. E. Dutton]; **Geologic Map Showing the Kanab, Kaibab, Paria and Marble Cañon Platforms** [scale 1:250,000; colored] [geology by C. E. Dutton]; **Geologic Map of the Colorado Plateau and San Francisco Mountains** [scale 1:250,000; colored] [geology by C. E. Dutton].

≡ CROSS-LISTINGS |CITED» GCNHA Monograph 8: page "3–Special Section 2–2"|

1885 24.856 Tertiary history of the Grand Cañon district : with atlas. *48th U.S. Congress, 2nd Session, House of Representatives Miscellaneous Document 35*, 264 pp. [text, quarto]; *Atlas*, 24 sheets [folded, laid loose in three-quarter leather folder with cloth ties affixed to boards on three open edges, and spine labels affixed; quarto]. (House series title-page accompanies text volume: *The Miscellaneous Documents of the House of Representatives for the Second Session of the Forty-eighth Congress, 1884-'85. In seventeen volumes. Volume 11.—No. 35. Washington: Government Printing Office. 1885.*) (SPINE TITLE FOR TEXT VOLUME: [top] "HOUSE MISCELLANEOUS DOCUMENTS 2D SESS., 48TH CONG. 1884-'85 VOL. 11"; [bottom] "DUTTON [rule] TERTIARY HISTORY OF THE GRAND CANON DISTRICT [rule] WITH ATLAS". SPINE TITLE FOR ATLAS: [top] "HOUSE MISCELLANEOUS DOCUMENTS 2d SESS., 48th CONG. 1884-'85 VOL. 11"; [bottom] "ATLAS".) • [A re-release of Dutton (1882, ITEM NO. 24.61, *which see for an itemization of the geological maps*). Re-release was a part of the collated series of House Miscellaneous Documents for 1884-1885, not mentioned by Farquhar or in earlier editions of this bibliography. Text and Atlas title-pages are the same as for Dutton (1882), retaining date, but text volume adds the House Miscellaneous Documents series title-page (1885) cited above; atlas does not include a separate House Miscellaneous Documents title-page although it is identifiable from its spine labels. Atlas Sheets differ from 1882 publication in that the double-folio sheets are vertically and horizontally folded to accommodate quarto format (vertical fold in center as in original double-folio state, then folded horizontally to achieve quarto size). Quarto format also corroborated in *Checklist of Public Documents, Second Edition* (U.S. Government Printing Office, Superintendent of Documents, 1895, ITEM NO. 2.27756), p. 76. *Folded* Atlas Sheets each are also stamped with a numeral on the exterior (sheet verso) corner, enumerated 0 to 23, to facilitate identification of Atlas Sheets without having to unfold them: "0" is the title-page, "1" is the "List of Atlas Sheets" (equivalent to Atlas Sheet I), followed by 2-23 (Atlas Sheets II-XXIII, comprising tinted and chromo-lithographic maps and scenic views). Atlas title-page: "Department of the Interior United States Geological Survey J.W.Powell Director Atlas to Accompany the Monograph on the Tertiary History of the Grand Cañon District by Capt. Clarence E. Dutton U.S.A. [vignette] Washington 1882 Julius Bien and Co. Lith. New York".)] [Points relating to physical arrangement are provided with the assistance of Daniel F. Cassidy and Richard D. Quartaroli.] [*NOTE*: Sets of loose Atlas sheets, not folded and not stamped with external numbers on verso, are known..]

≡ CROSS-LISTINGS FARQUHAR (Fretwater Press 2003 reprinting only, *endnote 26* [*i.e.*, Farquhar, 2003, ITEM NO. 1.218; endnote by Daniel F. Cassidy])

Freytag & Berndt [firm]

1926 24.867 *Übersicht von Nord_Amerika nach den geologischen Vermessungen von Canada, der Vereinigten Staaten und anderen Quellen.* (Caption: “Nord_Amerika”.) (“Berghaus’ Physikal. Atlas Nº 13.”) (“Entw. v. Herm. Berghaus 1886, Ausg. 1887.”) (“Nebenkarten gez. v. M. Risch.”) [Geological map. The main map restricts labeling principally to large-scale geographical features and does not label rivers; in the area of interest here only “Colorado Plat.” appears across the Grand Canyon area. An inset map, “*Cañons des Colorado 1:5000 000*” provides some rather antiquated labeling: “Grand Cañon” appears in the western Grand Canyon, while “Marble Cañon” is in the area between the confluences of “Colorado Chiquito” and “Kanab Cañ.” Most physiographic features and the course of “Rio Colorado” are correct but while “Cataract Cr.” is correctly delineated, “Parke” Cr.” parallels it just to the east, passing around the west side of “Red Butte” before turning northeastward to reach the Colorado.] [In German.]

G

G. Freytag und Berndt A. G. [firm]

1926 24.876 *Freytag & Berndt’s Tektonische Schulwandkarte der Erde.* Wien: Druck und Verlag der Kartog. Anstalt G. Freytag & Berndt A. G. (“Bearbeitet von Prof. Dr. Max Fritz.”) (“Laut Erlaß des Bundesministeriums für Unterricht vom 16.Juli 1926 Z. 6445/g-II, für Mittelschulen, Lehrer-u. Lehrerinnenbildungsansalten zulässig erklärt.”) Scale 1:16,000,000. [An early tectonic map of the world, supporting the new theory of plate tectonics. Within the area of interest here two symbols west of the San Francisco Peaks and south of the Colorado River, indicating “Epizentren solcher Erdbeben, welche eine Reichweite von mehr als 4000 km mikroseismisch, beziehungsweise mehr als 300 km makroseismisch aufweisen. (vorwiegend nach A. Sieberg)” (Epicenters of some earthquakes, which have a range of more than 4000 km microseismically or more than 300 km macroseismically. (mainly based on A. Sieberg)). These symbols lie within, and are the only ones within, the delimited area of “Colorado-Plateau”.] [In German.]

Gannett, Henry

1896 24.376 (COMPILER) *United States contour map.* [Washington, D.C.]: U.S. Geological Survey, 1 sheet. ("Edition of Dec. 1896. reprinted Sept. 1899.") [Scale 1 inch = approximately 115 miles. Contour interval 1000 feet, 500-foot supplementary contours.]

Hall, James

1857 24.846 (ASSISTED BY J. P. Lesley) *Map illustrating the general geological features of the country West of the Mississippi River. Compiled from the surveys of W. H. Emory and from the Pacific Railroad Surveys and other sources.* *In:* Emory, William H., Report on the United States and Mexican boundary survey, made under the direction of the Secretary of the Interior. *U.S. 34th Congress, 1st Session, House Executive Document 135* AND *Senate Executive Document 108*. ("Drawn by Th^{s} Jekyll." "Lith. of Sarony. Major & Knapp 449 Broadway New York".) [See the full citations for Emory (1857) as ITEM NOS. 2.2542 and 2.18594.] [Hand-colored map. Not a separately published map as such, but cited here for its portrayal of the Grand Canyon region prior to even the first geological exploration in 1858. The base map depicts "Rio Colorado" from the head of "Gulf of California" northward approximately to the confluence of the Virgin River (not labeled), at which point the line depicting the river becomes dashed, as also is the lower reach of the Virgin. In the Grand Canyon region (largely blank), the Colorado is depicted on a generalized east-west course, connecting directly to, and only to, "Colorado Chiquito", with but two tributaries from the south (both unlabeled), the easterly one of which is Cataract Creek. Geologically, only rocks of igneous centers are depicted in the region, although some generalized, broadly applied shading apears in the area to designate "Devonian" rocks.]

GEOLOGIC AND SPECIAL TOPOGRAPHIC MAPS IN THE GRAND CANYON REGION

APPENDIX

Guides to Quadrangles for Topographic and Geologic Maps in the Greater Grand Canyon Region Produced by the U.S. Geological Survey

THIS APPENDIX IS NOW
SECTION 4A OF THE GRAND CANON **VOLUME 2**

CARTOBIBLIOGRAPHY OF THE GRAND CANYON AND LOWER COLORADO RIVER REGIONS

See information in Part 25 herein or go to https://ravensperch.org

GENERAL INFORMATION ABOUT THE CONTENT OF SECTION 4A FOLLOWS

PART 24. GEOLOGIC AND SPECIAL TOPOGRAPHIC MAPS IN THE GRAND CANYON REGION

APPENDIX — GUIDES TO USGS MAP QUADRANGLES IN THE GREATER GRAND CANYON REGION

SECTION 4A OF THE CARTOBIBLIOGRAPHY provides graphical and itemized guides to the topographic maps of the lower Colorado River region, produced by the U.S. Geological Survey. Both legacy paper map guides and current online guides are referred to. Graphical guides illustrate the geographical arrangement of named topographical quadrangles. Itemized guides list, either alphabetically or by special geographical order, the quadrangle names within the region. These lists provide the names of quadrangles by which researchers may refer to either in physical map collections or in the U.S. Geological Survey's very comprehensive collections of digitized historic and current maps. (Table of contents for Section 4A of the Cartobibliography is on the next page.) The complete Cartobibliography can be accessed at https://ravensperch.org.

The alphabetical lists are provided so that users who wish to acquire complete sets may locate the maps easily by name. ITEM NOS. are added here to the complete alphabetical lists, in order to uniquely identify each map as a discrete publication.

THE GRAND CANON

A WORLDWIDE BIBLIOGRAPHY OF THE GRAND CANYON AND LOWER COLORADO RIVER REGIONS
IN THE UNITED STATES AND MEXICO

25

CARTOBIBLIOGRAPHY

PART 25, as originally composed, was restricted to "general" maps. That content has been transferred to THE GRAND CANON **Volume 2, CARTOBIBLIOGRAPHY, 3rd Edition, downloadable from Raven's Perch Media**

https://ravensperch.org

The CARTOBIBLIOGRAPHY lists all general maps. Added to it now are specialized map products that are cited in other parts and appendices within Volume 1/Part B (for example, geologic and topographic maps that are separately listed therein). The CARTOBIBLIOGRAPHY is a consolidated and comprehensive listing for all maps that relate to the Grand Canyon and Lower Colorado River regions of the U.S. and Mexico.

ABSTRACT

THE CARTOBIBLIOGRAPHY is Volume 2 of THE GRAND CANON : ***A Worldwide Bibliography of the Grand Canyon and Lower Colorado River Regions in the United States and Mexico***. It itemizes and often describes details on maps produced worldwide from the 16th to 21st centuries. Many citations for historical maps before the 20th century are chorographical; attention is on part of the map rather than the whole, in order to describe how the Grand Canyon and lower Colorado River regions are portrayed. Thus the principal purpose of the map may not be mentioned, such as when a map is of wider interest to cartographic historians for content that is unrelated to the physical geography of the Southwest (for example, a map that delineates newly drawn political boundaries in areas that are outside the geographical area of interest here). In some instances, remarks correct or amplify the work of earlier bibliographers. All forms of maps are listed: general, geologic and physiographic, and certain specialized maps; to which is added a complete guide to all scales of topographic map quadrangles in the greater Grand Canyon–lower Colorado River regions in the U.S. and Mexico, produced by the U.S. Geological Survey and Mexico's Instituto Nacional de Estadística y Geografía (as also used by the Servicio Geológico Mexicano). The kinds of maps cited here vary. Many are standalone productions, while others are included in atlases or accompany reports of explorations, some of them as large fold-outs, others as maps loosely laid in or even grouped in separate covers. Maps that appear as illustrations within books and periodicals are not generally considered. Neither are manuscript maps considered, although a few significant ones are cited; those that are of seminal importance in the history of the Grand Canyon and the Southwest. Notes added to these citations provide more detailed information that describe relationships between features of physical geography, for the benefit of users who may thus determine that a map should be more closely examined, or it may suggest to them that a map is not of interest to work at hand. The Cartobibliography divides maps into two major groups: 16th–18th centuries, and 19th–21st centuries; and there is a separate, consolidated chronological list of these maps. The 16th to 18th centuries in this region recorded human interactions that focused on the lower Colorado River, by international parties with interests in the region. Only manuscript maps ventured to embrace the area that now is known to be the Grand Canyon. The 19th century saw the first sponsored explorers in three centuries spanning the region, eventually delineating the Colorado River and its tributaries correctly, discovering again the Grand Canyon. And the 20th century witnessed an explosion of general and scientific maps of the region, including topographic mapping at large scales. More specifically detailed bibliographical products and statistical surveys can be derived from this Cartobibliography.

REGARDING TRANSFERS FROM THE GRAND CANON, VOLUME 1

The Cartobibliography is Volume 2 of THE GRAND CANON : ***A Worldwide Bibliography of the Grand Canyon and Lower Colorado River Regions in the United States and Mexico***. It greatly expands upon what was Part 25 in the 1st–3rd Editions of THE GRAND CANON (2012, 2015, 2019).

Given the special nature of maps, atlases, and similar productions, and considering the great size of the Cartobibliography alone, it was deemed more serviceable to segregate these citations from the main bibliogrpahy, to create a new, comprehensive compendium that serves a specialized audience. So Part 25, which was restricted to "general" maps, was detached and reformatted. Into it also were merged all the other, usually specialized, maps that are cited in other parts and sections of the bibliography (for example, geological maps). Citations copied from parts of the bibliography other than Part 25 are still present in their original places because they topically complement the content of those units.

The Cartobibliography maintains the general format followed in THE GRAND CANON Volume 1/Part B (Bibliography), about which see extended explanations in Volume 1/Part A (Introduction). It also keeps in place each citation's unique Item Number (or registration number) and special bibliographical cross-listings. Accordingly, the Item Numbers displayed in the Cartobibliography also divulge their original topical placements in Volume 1.

Citations that were *transferred* from the original Part 25 of THE GRAND CANON ("general" maps) can be identified by the Item Number prefix "**25.**"; other prefixes (*copied* from THE GRAND CANON Volume 1) are:

9. *copied* from Part 9 (travel and trail guides)

10. *copied* from Part 10 (Colorado River guides)

11. *copied* from Part 11/Section 2A (separately published geologic maps in the Lower Colorado River region, which complement the geology citations pertaining to the Lower Colorado River region separate-coverage group of the bibliography), with a guide to topographic map quadrangles *transferred* from the "Appendix to Part 11"

18. *copied* from Part 18 (physical environment of the Grand Canyon region and Southwest)

19. *copied* from Part 19 (biology and ecology of the Grand Canyon region)

24. *copied* from Part 24 (separately published geologic maps and special topographic maps in the Grand Canyon region, which complement the geology citations for the Grand Canyon region), with a guide to topographic map quadrangles *transferred* from the "Appendix to Part 24"

Statistical Summary of Cartographical Items in THE GRAND CANON Volume 2 (*Cartobibliography*, 3rd Edition, 2025)

	CARTOBIBLIOGRAPHY CITATION COUNTS			
FROM TGC VOL. 1	***Section 1***	***Section 2***	***Section 4***	**TOTAL**
Part 9		246		**246**
Part 10		106		**106**
Part 11		343	694	**1,037**
Part 18		2		**2**
Part 19		2		**2**
Part 24		454	391	**845**
Part 25	714	1,723		**2,437**
TOTAL	**714**	**2,876**	**1,085**	**4,675**

Section 3 is omitted from this table because it replicates, in chronological order, the contents of Sections 1 and 2. Additions that will appear in future editions of the Cartobibliography will employ the same system of Item Number enumeration: "General" maps will continue to use the **25.** prefix as derived from the topical arrangement of THE GRAND CANON and will appear only in the Cartobibliography; newly cited specialized maps will be assigned their respective prefixes as outlined above *and* will appear in both the Cartobibliography and the respective thematic parts of Volume 1/Part B of THE GRAND CANON.

Regarding the Sections 1–4 of the Cartobibliography, see the "Arrangement" table at the beginning of this General Information, above.

INTRODUCTION

[This is edited from the *Cartobibliography* (THE GRAND CANON Volume 2, Third Edition, 2025, https://ravensperch.org) and is inserted here for its informational content within the full context of THE GRAND CANON. Additional text and illustrations are present in the Introduction in the *Cartobibliography*. Enumerated footnotes continue in order for the present volume.]

MAPS! What a glorious enterprise! They capture places as they were, or imagined. They steal from us hours of study, and hours more of idle infatuation. They teach. They mesmerize. And they hide away and have to be sought out. Compared to book sellers, there are few map sellers. This was as true centuries ago as it is today, even though a map is more likely to turn a head than will a book.

Since THE GRAND CANON series comprises a bibliography that focuses on everything published about a defined geographical space, there is every reason to expect the same "everything" among the maps. In this Cartobibliography, which is Volume 2 of the series, that expectation fails. At the outset we compete with the state and commercial suspicions of the earliest periods, when information for maps comprised the secrets of monarchs, mariners and merchants—that much is well understood. In older times printing blocks and plates were shared, inherited, and otherwise reused in various fashions, often copied, sometimes plagiarized; many with modifications, substantiated and baseless alike. In more recent times, in the 19th century notably, we feel the angst of ateliers who, to make a living, frequently turned out new maps (and maps that posed as new, often barely revised if only to change the date). Sometimes there were multiple editions during a year (confusingly for us now) that may or may not have meant to keep up with rapidly revised political boundaries and civil concerns. Physical geography often fell to the wayside, with some maps using outdated bases on which the new boundaries were printed. As I explain, many of these reissues are not kept up with in this Cartobibliography because the changes do not pertain to physical geography. Just as frequently, I surely have missed numerous maps that I otherwise *would* have captured for citations.

But, a lot of maps are hard to examine. First, one has to find them, then often work with unwieldy rolls or immense flat sheets—they are notoriously difficult to organize and store, too. Once, in order to examine maps one had to travel to far-flung places that held copies that were of interest or by requesting a repository to photograph of the map (usually in black-and-white and perhaps not of the best resolution)_. Now, there are so many important maps that can be viewed online that it seems that most everything must be there. (Of course not.)

We are beneficiaries of institutions and governments that have digitized maps and make them available online. Some dealers maintain online libraries of past offerings. Even so, not nearly everything is online and sometimes miscataloging or misinformation leads us astray; not all of the digitized maps are in adequate resolutions, either, for very detailed study. Though the modern digital environment has made map inspection incredibly more easy, we nonetheless are, pointedly, at the mercy of those who choose which maps to digitize, and to the creators of websites.

But about the days of personal inspections, consider the position and predicament of Adolf Erik Nordenskiöld in 1889:

> . . . even printed maps of this period [15th–16th centuries] have become very rare, and extensive collections of them are only to be found in a few libraries. Many of the most important of these documents are therefore not easily accessible to students—a difficulty the unfavorable influence of which may be traced even in elaborate geographical treatises of the most distinguished authors.[93]

Concluding, Nordenskiöld hoped that his work would “promote new discoveries in the recesses of libraries and map-collections”. (What he would have thought of the world wide web!)

Citation Styles and Dates. This Cartobibliography does not strictly follow formal cataloging rules because it is meant to show precise, sometimes peculiar, data without adapting to some issues of conformity. The precise transcription of names and titles in particular, which may include faithful reproduction of some typographical elements and errors, is done so that those users who may not be able to see an original product can profit from the exact textual appearance and context.

The primary purpose of this Cartobibliography is to record cartographical data that relate to the Grand Canyon and lower Colorado River regions—a so-called chorographical analysis. It is not meant to be fully a cartobibliography that preserves the overall context of the map, nor does it record nuances that are a part of more proper historiographical cartobibliographies. Dates generally reflect the dates of publication, more so than dates that may appear on a map. In many cases, dates are adopted from those that are recorded or interpreted by cartobibliographers and cartographical librarians in their catalogs.

---

[93] A. E. Nordenskiöld, *Facsimile-atlas of the early history of cartography with reproductions of the most important maps printed in the XV and XVI centuries. Translated from the Swedish original by Johan Adolf Eklöf, Roy. Swed. Navy and Clements R. Markham, C.B., F.R.S.* (Printed by P. A. Norstedt & Söner, Stockholm, 1889), 141 pp., 51 plates. [coverage to 1550, actually]. Also a facsimile reprint 1961, 1970, Kraus Reprint Corp., New York. Also a facsimile reprint, with new introduction by J. B. Post (Dover Publications, Inc., New York, 1973). Original Swedish edition: *Facsimile-Atlas till kartografiens äldsta historia innehållande afbildningar af de rigtigaste kartor tryckta före år 1600* (Printed by P. A. Norstedt & Söner, Stockholm, 1889).

It might be awkward to read the names of some of the early map producers, for whom customarily their names are standardized; for example (as published, with standardized names in **bold** type):

Homann, Iohannes Baptista	**Homann, Johann Baptist**
Hondio, Iud.	**Hondius, Jodocus**
Ianssonius, Iohannes *or* Ianßonius, Ioannes	**Jansson, Jan**
Janvier (S^{r}) (Sieur de Janvier)	**Janvier, Jean Denis**

I purposely retain the spellings as published, to protect the contempory presentation of these maps; again, for those users who may not be able to examine the originals (the titles are similarly shown as published, employing all typographical elements). It is not my intention to render a standarized authority list nor a formulaic homogeny of titles. The original context of these maps, as presented in their items, is preserved for historical and cartobibliographical precision, as a means to place as much of a map in front of the user in the absence of an accompanying illustration.

Overall, the style of citation herein regretfully varies, a reflection of changes in how this Cartobibliography was compiled during more than 50 years in the Grand Canyon–Lower Colorado River Bibliography project. Despite having re-edited a fair number of citations on the run, I apologize for not having had the time to devote to a wholesale re-citing of the items now in this more elaborate Cartobibliography. (Five decades of accumulation is a long time for one person, and finding again many of these items would be a prodigious task, even with so many things now online!) On the whole, most of the older forms of citation have been emended.

The typographical format of citations in this Cartobibliography differ from the rest of THE GRAND CANON. Usually, titles in this work are in *italics*, while all else is is conventional Roman type. However, it seemed to me that the map citations, particuarly those of the earlier (pre-20th century) maps, necessarily focus on a map title that may appear within a larger work. Further, the chorographical analysis of many of these maps, although separated within [square brackets], merged rather confusingly with the balance of a sometimes lengthy citation. In order to make this Cartobibliography more convenient to read, particularly for those who are scanning for information, the titles of maps, specifically, are rendered in **bold Arial type.** In this fashion the map titles will stand out from the *italicized titles* of products in which they may appear. My chorographical analysis, if any, appears in dark blue Verdana font, preceded by a pointer (►) so as to clearly distinguish these texts if they should appear in a monochrome copy. The principal purpose is to easily segregate cartobibliographical information from my chorographical remarks (more than 3,000 such notes appear herein). The use of color is not particularly important; only that users who engage the original format of this Cartobibliography may isolate those passages more easily. Further, the use of a pale cream page color is purposely used to reduce eye strain, and thus the dark blue color unobtrusively contrasts with it while attracting the reader's attention; especially useful in citations full of information.

With the focus solely on the Colorado River and its landscapes, this compendium may ignore important interpretive data on the maps—data that are not necessary for the objectives of THE GRAND CANON. The Cartobibliography's purpose is to also capture the variant spellings of the rivers of interest and adjacent place names when such are given; not always an objective of cartobibliographers. More to the point, this work zooms in to detail the river courses in the region of interest. Maps of larger areas are understood to embrace this region; no special remarks are made unless required. Many maps are overlooked here because they display no rivers, or at least none that can be attributed to the Colorado River in its various early geographical forms and names. Should someone, someday, wish to finely compare the nuances of the delineation of the Colorado River and others nearby—knowing full well that such depictions even into the 19th century are mnemonic at best—this Cartobibliography can be a source book for many, if not most, of the maps that may need to be examined. In some cases, ornamental maps on the title-pages or as frontispieces to old volumes show the region of interest here at such tiny scales that they are not appropriate to analyze for this Cartobibliography, as they were diagrammatic rather than informational.

The scholarly studies of—and critical arguments about—the usefulness and impact of the kinds of cartographical projections used over time are worthwile readings, even among their bewildering hundreds. But this Cartobibliography—and this bibliographer—having only the chorographical focus, does not address these aspects, the same as it does not address the historiographical position a map may hold among scholars. Such a pedestrian focus on the Colorado River, however it may be shown on these maps, is the direct outgrowth of this Cartobibliography as Volume 2 of THE GRAND CANON; and as such it completely ignores many fascinating, often remarkable, elements of these maps.

On early maps in particular, the methods of projection are also not of concern here because of the chorographical focus on what is usually a relatively small part of the whole map. The scales of the maps cited herein range from world maps at one end (with their tiny areas of interest to this Cartobibliography) to large-scale maps at the other end, which focus on the mouth of the Colorado River (perhaps best exemplified by Padre Kino's 1701 demonstration that California is *not* an island, first published in 1705, despite the fact that many cartographers for years afterward chose to ignore the evidence he had seen for himself). Thus, in the citations herein many maps will include my own chorographical analysis of the area of interest here in order to distinguish how our region of interest was portrayed. Even so, for the most part the area we know as the lower Colorado River region was rarely one of cartographic negotiation, but rather its depiction was seemingly an autonomous reflex—an acceptance of the status quo when it was easier to re-use engraved plates or to simply copy from others, right or wrong, for an area of the world of relatively little interest. Sometimes this was in the extreme, such as when a plate was exactly reused, or with a minor emendation to title or imprint, even decades after its creation, without regard to geographical corrections made by other cartographers during that time.

These chorographical points are less of a concern once we engage publications that are specifically about the Grand Canyon–Colorado River regions, such as with the 20th- and 21st-century larger-scale maps and Colorado River guides. The citations of these follow more conventional bibliographical form, comparable to those in Volume 1/Part B of THE GRAND CANON, although for consistency the bold-type title forms are used throughout the Cartobibliography.

As elsewhere in THE GRAND CANON, the arrangement of citations is by the author or creator of the work, with items for the same author listed then in chronological order by year. Some citations in the Cartobibliography may be seen to adhere to the citation style used during the earlier decades of this bibliography—title, followed by place of publication and publisher. More recently added citations follow more traditional cartobibliographical styles that replicate all information displayed in a map's title panel or cartouche, even publisher's information, and precisely cite capitalizations and most typographical elements. Information that is not part of the title block or caption, such as discrete border notes that credit the engraver or delineator, are quoted ("separately within parentheses"). The disparities of older and newer citation styles should not be too distracting since many citations were reformatted during the process of editing more recent editions THE GRAND CANON. Hybrid forms of citations might be noticed by observant readers. Still, the data are there.

As with bibliographies in general, cartobibliographies use many different styles of citation; they may differ even by which names are the primary reference. (One may see this for themself when comparing this Cartobibliography to others.) Some lists adhere more closely to the engravers of early maps rather than to the responsible delineators; others to publishers. It is, however, not always clear as to whom to give bibliographical credit, especially during the long time when map plates were borrowed, or reused by subsequent generations of a family of cartographers, or copied outright for reuse (sometimes, pirated). Here I have followed, as closely as possible, the method of citing original creators as cited from data on the maps themselves, and the actual dates of publication even though a date on a map may be earlier than its publication date. For example, a map may be included in a later-published atlas, or historians of cartography and printing may have determined alternate dates from those presumed, or have corrected outright errors.

Some cartobibliographies focus on the historiography of maps, as represented at the times they were delineated. The purpose of this Cartobibliography is to follow dates of publication, hence public availability. Sometimes I have had to rely on the intrepretations made by library catalogers. I only ask the user's forbearance in light of the fact that specific information is not always to be had or is open to subjective interpretation given the passage of time. In any case, as much information as possible is given here in order to identify the works and with which they can be found, should they be needed for more in-depth study or have to be re-cited; and of course many citations add descriptive notes that pertain to the physical geography of the Colorado River region.

Unlike more rigorously compiled and annotated cartobibliographies, a citation herein is not meant to describe the whole map in detail; after all, it focuses really on the region embraced by THE GRAND CANON. One will notice that sizes of maps are omitted, as are scales except for those maps on which scales are printed, nor are line breaks in titles and texts denoted. In the titles of maps, I have resorted to citing those printed in all-capital letters by instead using initial capitals in principal words. While it might have been preferable to cite all-capitalized titles precisely, the typographical discordance with citations brought forward from earlier editions of this Cartobibliography would be stark. So I have conceded to the form of initial capitals, a format that is anyway easier to read than all capitals, particularly in the bold type format employed for map titles (but not volume titles) as used in the citations herein. Though some legacy citations from the earliest editions may follow the format of all lower-case title citation, there are no longer many of these to be distracting, and they have not been updated because the maps have not been reexamined.

The use of the terms "caption" and "legend" are used precisely; they discern placement on a map. A "caption" is type along the top of the map; "legend" is a notation beneath or beside an element of the map. Titles are cited by their prominence, if more than one appears on a map; for example, when a cartouche and a caption or legend are both present. Occasionally, a map will have more than one title, perhaps in different languages. These are cited equally, but separately.

Translating and Transliterating. I had considered including approximate, if not precise, **translations** in *all* of the non-English citations in this Cartobibliography, to assist users who do not know these languages. However, I do not provide universal translations for the reason that many of them would not be at all satisfactory, peculiar if not erroneous, due to linguistic nuances and contextual variances that might not be recognized except by readers fluent in those languages, particularly with older dialects and spellings of centuries past. I could have included translations for some, and not others, but in the end I feel that such an arbitrary selection would detract from the overall dependability meant to be conveyed by THE GRAND CANON. Nonetheless, in a bibliography that is principally in English, information that is presented in a non-Roman orthography is decidedly "foreign" to users who are not familiar with those orthographies, and further, that transliterations alone are not likely to be as helpful as they seem to be. So, *for citations in non-Roman orthographies I do usually provide both a transliteration and a translation in English*. This is, of course, to facilitate reading by users who could not otherwise even mouth the words, but with the original orthography in hand it will help if one digitally copies to use in searches, or presents the information to someone who can help find the item.

Because I do not read the non-Roman orthographies, and inasmuch as they are effectively unintelligable to users like me who are familiar only with Roman orthography, I provide non-Roman titles and other information in the original orthographies usually accompanied by both a transliteration and a translation in English. The non-Roman information has been extracted digitally from web sources, particularly WorldCat and specific library catalogs that have recorded information in non-Roman orthographies. Occasionally I have had to resort to printing from a digitized copy of the map, then using optical-character recognition (OCR) to render the texts in digital format that could be copied into the bibliography. For details, this often depended upon a satisfactory digital resolution (with thanks to those who made the online originals available at good resolutions).

Most transliterations and translations herein have been obtained through the use of Google Translate online. Admittedly, Google Translate is imperfect, insofar that it is a so-called "neural machine translation service" that translates a sentence at a time, which over time has "learned" to construct better and more grammatically correct sentence structure and word selections. In some cases, I have taken texts and reconstructed some sentences, phrases or words (sometimes back and forth between English and the non-English language as checks) to provide more sensible information, then tested the reformatted translation again as a whole. I have not often been disappointed in the result, though in a few instances I discarded a translation that was obviously awry in favor of one that is simply adequate.

I make this note here so that users of this Cartobibliography can take into consideration any perceived negative aspects, beyond those currently recognized, of Google's programming interface during the timeframe when the interpretations were made, during the late 2010s and after. Still, the translations obtained for this Cartobibliography are reasonably good, if not accurate, often because many items are technical in nature and not subject to more erudite or "literary" nuances. And of course, the use of the original non-Roman orthographies do make the cited items accessible to those who can read them, or who seek the help of librarians and others who can read them.

This note also applies to the corresponding **transliterations** that appear in this Cartobibliography. In many bibliographies, titles and other information in non-Roman characters are usually cited in transliteration only, often because the non-Roman character set is not available to the printer (or to the author of the bibliography). While transliteration is somewhat helpful, in that the information can be "sounded out", variant transliteration schemes for some languages render the citation less precise, less intelligible, to users who follow other schemes. For the non-Roman orthographies, I have had to rely on Google Translate's transliterations exactly. Again, note of this is given in the event of future recognition of issues with Google Translate's methodologies in the late 2010s and later, the period during which I have used it. Particular schemes of transliteration are not indicated in this Cartobibliography because the sources referred to rarely provide such information, even when I have obtained the information from a library's catalog.

In this Cartobibliography, as well as in THE GRAND CANON overall, citations that have long, compacted passages of non-Roman orthography, transliteration, and English translation are difficult to visually tease apart. I have devised a method of colorizing some of this information to make specific portions stand out more clearly. The original title, being the key bibliographical component, is printed in black as usual; it may be followed by a transliteration [in gray font between brackets], then an English translation [in light red font between brackets].[94] *(An example is shown below.)* In any case, I believe that if a person cannot read a foreign language—and does not have the opportunity to obtain a translation—further access to that item may be moot if, in the case of maps, specific interest goes beyond just the graphical presentations.

---

[94] The gray and light red fonts are used for the visual convenience of those working with the original digital version of this bibliography, so that the transliteration and the translation in English are more noticeable amidst the original data and notational texts. Text in supplemental colors may yet be distinguishable even when a black-and-white printout from this bibliography is referred to. Colors have no special signifcance to the data presented in this bibliography.

Hirose, Hakaki [広瀬はかき]

1862 25.1404 図新路航海環 [*read right to left*] [Kankai kōro shinzu] [New map of sea routes]. [In Japanese.]

World map. Title displayed as printed on map; Library of Congress provides "other title", 環海航路新圖, which, besides reading left to right, differs somewhat in orthography. [*cont'd.*]

Library of Congress gives publication data (with ellipsis and square brackets thus): "Kyōto : Katsumura Jiemon ... [and 2 others]; Edo : Suharaya Mohē ; Bunkyū 2 [1862]", with note, "Kotenseki sōgō mokuroku, 2013-09-11 (環海航路新図 (かんかいこうろしんず), 地図 1 枚; 著者: 広瀬包章; 出版事項: 須原屋茂兵衛 <江> 他 3, 文久 2)." (this is illustrated at https://www.loc.gov/item/2013588000/).

► On the map, "カリホルニア" [California] (similar to the modern orthography, カリォルニア) is separated from the mainland by "東紅海" [East Red Sea] [*i.e.*, Gulf of California]. Rivers on the continents are not labeled, but the Colorado River is shown reaching the head of the gulf, with a wildly imaginative drainage basin reaching far into the continent. In addition, the map seems to portray the routes of railroads in the United States, including in the Southwest the (proposed) 32nd parallel route.

Traditional and simplified character forms of Chinese both appear throught THE GRAND CANON, depending upon whether the original publication or a library catalog record was followed. For transliterations, the pinyin system of romanization is usually followed for Chinese text, again based on the sources. These will be recognized by the inclusion of diacritical marks in the pinyin texts. However, some older citations may be represented in other transliteration systems as used by the sources seen. Further, some Chinese monosyllabic and polysyllabic transliterations are as taken from online catalogues or from automated translations, without regard to linguistic precision in the language itself. These may be displayed either as a "solid" or compound transliteration, which forms a series of long, single "words", or sometimes appear as a string of single-syllable sounds; again, as used by the sources consulted. Similarly, Japanese mono- and polysyllabic transliterations appear in various forms herein. These are only guides, and no attempt has been made at standardization.

Cartobibliographical Details. Historical geography—indeed, the analysis of maps at minimum—is a vast academic study and avocational pursuit, even one of simple pleasurable indulgence. This Cartobibliography gathers those maps that in some fashion display the lower Colorado River–Grand Canyon region. Maps that omit the rivers of this region are usually overlooked here. For the most part, only published maps are listed, although a small number of manuscript maps are included. Manuscripts are restricted to those that are of primary importance to the historical geography of this part of the Southwest, sometimes as the immediate if not sole source for maps published later, or that document important "firsts"; their citations include pertinent notes. Still, one has only to see the cartobibliographies or catalogs of major map repositories to recognize the tremendous number of 16th century and later manuscript maps that are pertinent to the region covered here, which of course should be consulted in the pursuit of historiographical studies.

This Cartobibliography is a documentary effort, describing how the Grand Canyon–lower Colorado River region of North America was portrayed on published maps, correctly or incorrectly. This is far less so a contribution to cartobibliography in its strictest sense, although in a few instances it corrects or amplifies the work of earlier bibliographers. Yet neither is the Cartobibliography meant to be a "collector's guide" since it is beyond the scope of this Cartobibliography to document, in any detail, states and variants of maps (although in a few cases such distinctions are noted, particularly for items whose states seem to not have been recognized before).

There are hundreds more general maps that surely could be listed in this Cartobibliography; most additions have been opportunistic. In every case, these maps are cited for the geographic information they illustrate regarding the lands that fall within the geographic boundaries defined by THE GRAND CANON, even when the *subject* of the map may be extralimital. Annotations indicate details of interest within the scope of the bibliography. Whether or not one of the principally extralimital maps freely borrowed a base map from a pre-existing map, as was often the case, or created a new, even if whimsical, interpretation, is not a central concern here; only that the map portrays in some measure the Colorado River region and may be examined for that information.

Some users may notice that various reprinted and plagiarized editions of maps are not cited; specifically, those of the early cartographical publishers who produced numerous variants and editions. Bear in mind as well that it was not unusual for plates by one cartographer to be reused by another; others simply copied them, with variations. It has not been practical to follow through on some of these replicated editions, but one should also specifically keep in mind the compound of editions based on inherited plates and the individually creative work of the genealogical and cartographical business lineage of Gerard Mercator, Rumold Mercator, Jodocus Hondius, Hendrik Hondius, and Jan Jansson, superseded in force by the family of Joan, Cornelius, and Willem Blaeu. Another family group among cartographers cited herein are the Sansons—Nicolas Sanson d'Abbeville and his grandson, Pierre Moullart-Sanson, who was the uncle of Gilles Robert de Vaugondy, also cited herein. Users will find some of these family works cited herein, but the listings even for the region of interest are not comprehensive. Similarly, since maps were copied, updated, and reprinted, one may also note that some maps of a particular cartographer may be published posthumously, or credited to them for decades afterward (even in revision). The sudden cessation of the use of some plates does not necessarily reflect a geographically pertinent decision not to reuse them. Rather, for example, references to the destruction of Joan Blaeu's plates in a fire during 1672 reveal a reason for the end to such reuse. Mishap, and disposal or metal recycling following a publisher's death, also are likely reasons.

The kinds of maps cited here vary. Many are standalone productions, while others are maps that accompany reports of explorations; some of them as large fold-outs, others as loose maps accompanying those reports. A significant number of atlas plates are also cited here, which sometimes note different production dates compared to the dates of the publications in which they appeared. (In large measure, it is the publication date—the date of public availability—that determines the date cited in *this Cartobibliography*. Thus the user may see a date that differs from one that appears in other cartobibliographies that focus on dates of supposed original creation.) Again, this Cartobibliography, and THE GRAND CANON overall, usually uses dates of publication for its citations. Sometimes it is difficult to distinguish by these bibliographical citations standalone maps from those that were published as part of more widely embracing documents, often because they are now seen separately for sale or have been received by repositories as separates.

It is difficult to stringently keep to maps that were made specifically as separate publications, to isolate them from maps that were included in reports and atlases. Such a separation was the intent of the Grand Canyon–Lower Colorado River Bibliography project at its beginning (in the 1970s). For the reasons mentioned here, as well as for informational interest, the focus was broadened. It is reasonable to cite some of the included maps due to their significance to studies of the regions they embrace; many of these have likewise been cited in other cartobibliographies, notably those by Wheat that are cross-referenced here. They are also cited because they may be available separately from dealers who had either acquired the maps individually or who had broken them from the volumes in which they appeared; thus, without information on provenance, they can be mistaken for separate publications. Even in other cartobibliographies the distinction is not always made clear. Further, maps prepared by one cartographer as a separate production may be included in a volume compiled by another cartographer or author. Still, they are discrete maps.

So it is justifiable for a broadly focused work such this one to cite maps that appear within larger works, such as major reports and atlases. The relationship of individual maps from broken volumes is not always represented in the library catalogs or the sales offerings of map dealers, and even during my own research such information may have eluded me. While libraries may catalog these maps as separate items, they may or may not have accompanying notes that identify the original source; it may have not been known to them. Some libraries may also separately catalogue included maps as a matter of analytic cataloging, which is not necessarily obvious to general users. While informed scholars and sellers may understand such original relationships, the information does not always reach the more “common” level of the catalog record by which many users come to know of these items. In this Cartobibliography, frankly, it is less important to work out these omissions since it is the identifiable map itself—and the pertinent information conveyed by it—that is cited and described.

Many maps are now cited herein that are within less obvious publications, like instructional texts or even Bibles; they are cited usually for some unusual perspective, but their numbers are not great since the prime focus of this Cartobibliography is mostly on those separately published maps and atlas sheets just mentioned. When maps are known (to me or my sources) as being a part of a larger work, they are so indicated; otherwise, the maps are cited on their own merits, and future bibliographers may make emendations as needed. At least, the maps are cited. Any blurriness of context is not intended but may be the result of incomplete information either from a source or from the interpretation of the map itself. With respect to the geographical information conveyed about the Colorado River region, these issues are less important because, as noted, this Cartobibliography has a predominantly chorographical perspective; that is, the focus is finer than the map as a whole, such as on rivers.

Some maps, particularly those of the first two-thirds of the 19th century, may be recognized as noteworthy for the display of frequently changed political boundaries; so one may wonder why note is not made of these herein. This Cartobibliography focuses on the physical geography of the Colorado River country; the political boundaries displayed on these maps are not usually important in this context. In fact, the same base map might have been used by a publisher in order to issue a map on which only the political boundaries were revised. This was only a matter of convenience for the cartographer or the atelier. New discoveries about physical geography, which might have called for a more wholesale revision of a map, either were not known to the map makers and sellers or were ignored for the sake of expedient sales. The reuse of severely outdated base maps simply to present redrawn political geographies, or those that were used indiscriminately for convenicne—despite a publisher’s trumpeting “the most recent authorities” and so forth—needlessly unleashed floods of misrepresented physical geographies that carried forward past their primes. In some cases, a single atlas may include maps that overlap geographically but which display obviously different information [see examples illustrated in the separate section in the *Cartobibliography*, “Examples of Discordant Geographies in Simultaneously Published Maps”.] The commercial map publishers should have known better, though in some cases even the government cartographers are caught in the act.

With many of the 16th to 19th century maps cited here, in reading the descriptions of the parts of maps that are pertinent to the region covered herein, it might seem—to use an “analog” analogy—as if one were listening to a “scratched record” when the maps seem to repetitively relay the same description of the parts described here. The repetition is unavoidable because this Cartobibliography is not a prolonged analytical text but a bibliography; that is, each citation stands alone. I wholly ignore the fundamental errors of some maps, particularly among the earliest ones—the imagined coastlines, mythical straits, invented seas and lakes, and improbable rivers—except when it was pertinent to note it. These are more the attention of cartographical and historical scholars, while this Cartobibliography looks only to the physical geographies of southwestern North America through which flows the Colorado River. Besides, amidst the drone of repetitive notes in these citations there are occasional variations—sometimes little surprises. Were I to record just the surprises it would violate the directing purpose this work to cite the whole of everything found, for the benefit of users who will have greatly varying needs and expectations.

It is, further, not always sufficient to say that one or another map is “representative” of “many such” maps of a particular time, and to ignore the others. In seeking some measure of comprehensiveness, as here in this Cartobibliography, all of them should be cited with as much information as possible in order to compare content and presentation. How often has a reader been disappointed, even with a richly illustrated book, when many maps are mentioned on the fly, without any further note? With the citations here one may be assured of a good starting point to find as many as are of interest to the region on which THE GRAND CANON focuses.

If one pays close attention, one will see the onward representation of the same, often inaccurate, geographical elements or the arrival of new elements (inaccurate and truthful alike). Of course, most representations of the courses of rivers on these older maps are diagrammatic, not the results of careful surveys (which was rarely the case). Many maps anyway had been prepared to display political boundaries and spheres of influence, more so than physical geography. Some depictions of river courses are honestly conjectural, perhaps delineated with dashed lines; many, though, are simply contrived. People generally understood that these areas were effectively—if not utterly—unknown to Western eyes and minds. What were drawn onto maps were simply indications that a river was known—or said—to be present there, somewhere. And so a line was drawn, its twists and turns we today are too eager to view superciliously, which were really for interpretive effect, that “here a river flows”, although sometimes the display was ingenuously atrocious. But, for an off-corner of the world such as the southwestern part of North America, copying and plagiarizing geographic information, especially in earlier times, was not only convenient, but expedient.

There are many well-known cartographic fantasies that appear in these maps. To gain a fine sense of this, one has only to read Chapter 8 of Wheat's (1957) Volume I, on the "Products of the Commercial Ateliers, 1750-1800". (See farther below regarding Wheat's cartobibliographies.) The notes that accompany a citation here are mostly restricted to a general description of how the Colorado River, its tributaries, and the landscape along its course are portrayed. The citations are not so much geographical as they are chorographical. Although such focus can draw attention away from the map's *intended* function, in the context of THE GRAND CANON these chorographically focused points are of greater importance.

Part 2 (General Publications) in THE GRAND CANON Volume 1/Part B includes numerous volumes in which specific maps are noted as pertaining to the regions covered by this Cartobibliography, usually relating to the Colorado River. In previous editions of the bibliography these publications of cartographic interest remained segregated from Part 25 (the former "general maps" section) because the listings in Part 2 often embrace significantly more textual information that is pertinent to the overall coverage presented by THE GRAND CANON. However, the Cartobibliography presents selected ones among these more general citations, so as to provide more convenient use by those who are searching for pertinent, even important, cartographic materials for the region embraced here. Most data in the citation are brought forward into the Cartobibliography.

The availability of digitally scanned maps online is useful for examining maps and atlas sheets from numerous sources, including those in the Library of Congress and various regional and institutional collections as well as ephemeral listings by dealers. As these sources continually emend their online holdings, the user will be more at an advantage by conducting new searches at any time.

The Cartobibliography does not include probably thousands of "casual" maps such as those that appear on the pages of serial articles or interspersed in the texts of books (there are a few important exceptions). It also does not contain citations for publications "about" the science or art of cartography, about historical aspects of mapping, or the historiographical aspects of a particular map. Its purpose is not to describe the cited maps from the viewpoints of human history and the development of cartography, but to place the portrayal of physical features of the Colorado River basin in temporal perspective.

The overall objective in compiling this Cartobibliography is to provide an idea of what is available—knowing well that there is far more that is not documented here. Ideally, an illustrated cartobibliography would be very useful (and enjoyable), but given the need to wrest the academic, legal, and fiduciary means to bring such a work into being, it will have to be up to another person or party and in another venue. This, at least, is a framework erected for the use of those interested in the changing geographical aspects of the Grand Canyon–lower Colorado River region. The descriptions of those parts of the maps that are pertinent to this Cartobibliography are provided for their interest, considering that it is not usually practical to compare all of these maps in person, at one time.

Although a bibliographical list of maps provides a useful service, Carl I. Wheat clearly explained (specifically for his monumental work on the Transmississippi West of North America) that it is impossible, at least for one person, to pursue a perfect record of comprehensive listings.

> Books about maps, . . . or indices, or bibliocartographies, or catalogues, or even the most learned discourses on the maps of related areas cannot be accepted or used as substitutes for personal examination of the maps themselves . . . . [. . .] To those familiar with the history of this vast western area, it will be obvious that no investigator could in his lifetime hope to see and list all the maps that in some fashion bear upon its complex story. [95]

Nonetheless, I hope that these citations, confined as they are geographically, temporally, and chorographically, also inspire some users to embark on reading journeys (made ever more possible by the numbers of maps accessible online) into the realms of always-evolving studies of cartography. The old never is old when its materials are looked at with refreshed vision.

Nomenclature for *Río Colorado* and Colorado River. Historical, bibliographical, and cartographical research in the region covered by this Cartobibliography can be confusing given the number of names by which the Colorado River has been known since the first European report in 1539. “Colorado River” appears elsewhere, too: in Texas (United States) and as “Río Colorado” or “Rio Colorado” in various places in the Spanish- and Portuguese-speaking world (a name that, incidentally, also is used for the Colorado in Mexico and which also was used in non-Spanish publications and maps, especially in the 19th century).

For the benefit of newcomers to the study of this region, and as a refresher for those who are more familiar with the region, a summary of names is below. The names pertain to the originally named stretch of the river—from the confluence of the Grand and Green Rivers in present-day Utah to the sea. (The name "Colorado" was legislatively applied to the Grand River by the U.S. Board on Geographic Names in 1921, to allow the Colorado River to locate its headwaters in the state of Colorado, although geomorphological purists continue to recognize the Green River as the headwater main stream of this river basin.) Names in this list include those from manuscript and published materials, cartographical and textual, and misspellings. Some, particularly those from the 19th or 20th centuries, are mixtures of Spanish and other languages. Some names are misapplied from, or confused with, other rivers as a matter of presumption.

Tontonteanch f[iume]. [*in Italian*] [*see also* Río Totonteac]
Totonteac fluvius [*in Latin*] [*see also* Río Totonteac]
Western Colorado

The Colorado had also been referred to as the "Seedskeeter", "Seedskadee", and variant spellings, which are corruptions of an Indigenous American pronunciation actually for the Green River (in the upper basin area). The Little Colorado River has been given comparably overlapping names, including a redundant "Río Colorado".

Puerto de Bucareli. Noticeable on many maps particularly from the 19th century is a name usually placed at the confluence of the Colorado and Little Colorado Rivers. It originates with padre Francisco Tomás Garcés soon after he had visited the Havasupai on Cataract Creek in 1776. Viewing the expanse of the canyon carved in the plateau, he bestowed on it the name *Puerto de Bucareli*, honoring then-Viceroy of New Spain, Antonio María de Bucareli y Ursúa. It was a "pass" for the Colorado River's journey to the sea.

When Alexander von Humboldt worked on his geographical researches in New Spain in 1803, he examined various maps of the territory and took up the name that had first been set down in 1777 by Bernardo de Miera y Pacheco, who had adopted Garcés's honorific. Although in the Geographical Introduction to his *Political Essay* on New Spain[97] Humboldt devotes several pages of discussion to the astronometric location of the confluence of the Colorado and Gila Rivers, and mentions source information for specific locales in what today are northern Sonora and southern Arizona, he did not mention anything about places farther to the north, leaving such information solely to his map. He provided a lengthy annotated list of the maps that he had consulted, principally manuscripts, to create his entire map of New Spain.[98] When he passed through Washington, D.C., on his way home to Europe in 1804, Humboldt's map was copied with his permission, which in turn was plagiarized with introduced errors for inclusion in Zebulon Pike's 1810 publication on his western explorations.

---

[97] Alexander von Humboldt, *Essai politique sur le royaume de la Nouvelle Espagne : ouvrae qui présente des recherches sur la géographie du Mexique . . . .* (Chez F. Schoell, Paris, 1808). (Numeous reprintings and translations.)

[98] The maps included: "*Mapa de la California, carte manuscrite des pères Francisco Garces et Pedro Font, 1777.* Elle a aussi été gravée à Mexico, mais avec une erreur de trois minutes en moins pour toutes les latitudes. Elle est intéressante pour la Pimeria alta et pour le Rio Colorado." (p. 104 in the 1811 ed.). (Transl.: '*Mapa de la California, manuscript map by Fathers Francisco Garces and Pedro Font, 1777.* It was . . . engraved in Mexico City, but with a diminution error of three minutes for all latitudes. It is interesting for the Pimeria alta and for the Rio Colorado.')

Humboldt's map of New Spain was first published in 1808 (twice pirated in London in 1810, only once offering a credit to Humboldt) before Humboldt's better-known reprint edition of 1811. He was the first to alter the Bucareli honorific, as "Puerto de Bucarelli". Later copyists continued to offer up even more variant spellings (listed below). From Humboldt's map of New Spain, the name was simply repeated based on the fundamental authority of Humboldt without knowledge of the intent of Miera's label, Garcés's physiographical neologism. Even Humboldt had had no understanding of its special context. Some labels that appeared on subsequently copied maps were rearranged or misleadingly accompanied by point place-name symbols. The result of the latter was to group the name among Miera's cartographical plotting of many ecclesiastically named campsites of the Domínguez–Escalante expedition of 1776, with Miera accompanying them, that circumambulated a good portion of the Colorado Plateau.

All variants of *Puerto de Bucareli* that have been found on maps (manuscript and published alike), and occasionally in other matter, are listed here for historical completeness (as compiled by Spamer):

Bucarelli
Bucaretti
Bucaretty
Bucuretti
de Bucareli
P. Bacarelli
P. Bucarette
P. Bucaretti
Puerto Bucarelli
Puerto Bucarello
Puerto de Bucareli
Puerto de Bucarelli
Puerto del Bacorelli
Puerto del Bacorilli
S. Bacarelli [perhaps thought to have been a mission, but this and other place names were actually the Domínguez–Escalante campsites shown on Miera's maps]

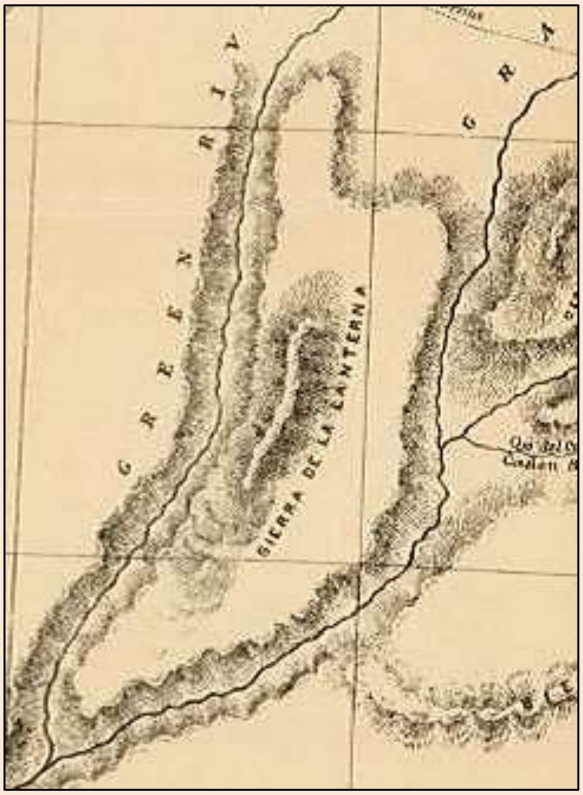
The cartographical depictions of the *puerto*, however, have varied, usually plotted without an understanding of Garcés's original intent.[99]

Sierra de la Lanterna. Several maps in this Cartobibliography label a mountainous area as "Sierra de la Lanterna", a forgotten name for the Kaibab Plateau, which is probably misplaced. The name is perhaps a misspelling of the Spanish *linterna* (lantern), but the origin or significance of this geographical name has not been identified. In one gazetteer from 1854 it was identified with geographical coordinates that verify its placement where exists the

---

[99] See further in the *Cartobibliography* itself. See also the separate publication, Earle E. Spamer, *Mapping Grand Canyon: A Chronological Cartobibliography* (Raven's Perch Media, 2nd ed., 2024, https://ravensperch.org). It includes a section devoted to cartographical products that record *Puerto de Bucareli*, 1877-1884.

Kaibab Plateau: “Sierra de la Lanterna, a mountain range in the N. part of the Territory of New Mexico, lat. about 36° 20′ N., long. 112° 15′ W.” [100]



Detail from John G. Parke, “Map of the Territory of New Mexico compiled by Bvt. 2nd Lt. Jno. G. Parke, U.S.T.E. assisted by M^{r}. Richard H. Kern. by order of Bvt. Col. Jno. Munroe. U.S.A. comdg. 9th Mil. Dept, drawn by R. H. Kern. Santa Fé, N.M. 1851. Constructed under general orders from Col. J. J. Abert, Chief of Topog^{l}. Eng^{rs}.” [U.S. Army, Topographical Engineers], New York: J. and D. Major (1851). This seems to be the first appearance of the name “**Sierra de la Lanterna**”. (Spamer 25.160, Wheat III:730)

The parallel Green and Grand Rivers are delineated in a fashion that was frequently grossly misinterpreted on maps of this period. The geographic placement of the confluence is downstream from the confluence of the San Juan River (which is seen entering from the right of this view); the Little Colorado River (out of view to the south in this detail) flowed westwardly to a Colorado confluence that would be nearly in today’s southern Nevada. [For more on the variant delineations of the Colorado River, see in Earle E. Spamer, *The Colorado River of the West: Cartographic Styles of the 15th to 19th Centuries* (Raven’s Perch Media, 2023, https://ravensperch.org/wp-content/uploads/2023/05/CRWest.pdf, 25 MB).]

See the following Cartobibliography items that note this geographical feature with a relatively short-lived use of less than two decades (listed chronologically): Parke [1851, ITEM

---

[100] Baldwin, Thomas, and J. Thomas, *A new and complete gazetteer of the United States; giving a full and comprehensive review of the present condition, industry, and resources of the American confederacy: embracing, also, important topographical, statistical, and historical information, from recent and original sources; together with the results of the census of 1850, and population and statistics in many cases to 1853* (Philadelphia: Lippincott, Grambo and Co.), p. 262. (Note that this is the old New Mexico Territory, from which a part of it Arizona Territory was created.) A pronouncing gazetteer from 1859 picked up on this name, too (probably from Baldwin and Thomas), identifying it as “*m* New Mex.” (a mountain in New Mexico [Territory]), but without further pinpointing its location (Elias Longley, *Pronouncing vocabulary of geographical and personal names* [Longley Brothers, Publishers, Cincinnati, 1859], p. 105.) The name “Sierra de Lanterna” [*sic*] does appear once in the novel, *Overland,* by J. W. de Forest (Sheldon and Co., New York, 1871, p. 136), which was placed above the confluence of the Green and Grand Rivers (much like as displayed in the figure on the next page). The same geographical placement is noticed as “Sierra Lanterna” [*sic*] on p. 177 in Virginia Sánchez, “Survival of Captivity: Hybrid identities, gender, and culture in territorial Colorado,” in *Nación Genízara: Ethnogenesis, place, and identity in New Mexico* (Moises Gonzalez and Enrique R. Lamadrid, eds.) (University of New Mexico Press, Albuquerque, 2019).

Cross-listings to Wheat. Throughout this Cartobibliography, informational cross-listings are made to the five-volume cartobibliographical compendium of Transmississippi West maps by Carl I. Wheat (1954–1963, and reprintings), a definitive study and checklist on the subject. Sometimes it may be awkward to use, given that Wheat's sequential enumeration of maps in his cartobibliographies do not follow in order within his greatly informative narrative text, but the separate, chronologically ordered "Bibliocartography" (as he called it) in each volume is invaluable. Each volume also contains numerical indices. (For a combined index to all volumes, see Seavey, Charles A. *Mapping the Transmississippi West, 1540-1861: an index to the cartobibliography*. Winnetka, Illinois: Speculum Orbis Press, for Map and Geography Round Table, American Library Association, Map and Geography Round Table, Occasional Paper no. 3, 1992.)

For the most part, only those maps that were printed (that is, not manuscripts) are cross-listed to Wheat herein (though for the purposes of his magisterial work he includes a large number of manuscript maps). Necessarily, only the maps that clearly pertain at least in part to the region covered by this Cartobibliography, with informative labels or the delineation of rivers, are cross-listed to Wheat. Many of Wheat's citations are extralimital to this Cartobibliography, and many more that could be listed here are omitted usually because they repeat numerous previous editions of a map. Note as well that some pertinent maps listed by Wheat are not included here because I have not seen them, in any form. Conversely, some maps, though Wheat mentions other editions of them, are listed herein from editions seen by me but not by Wheat, so of course they have no cross-listing to Wheat. Take note, too, as Wheat (1963, Volume V, p. xii) has informed, that ". . . our interest centered upon pioneering rather than commercial maps . . .", thus another reason for maps cited here that may not have appeared in Wheat's compendium. And further, Wheat rarely cites maps published in the texts of serial publications, but where he has, and the maps are pertinent to the present cartobibliography, his citations are cross-listed here. In any case, the most pertinent maps are cross-listed.

The format used herein lists items by volume number, then, following convention, the map number as listed in Wheat's "Bibliocartography". If a map is illustrated, a separate notation is appended to the cross-listing, which indicates its page placement in the volume.

For example, WHEAT I:70 [with illustration facing p.48] would usually be cited only as "Wheat 70", but I add the volume number ("I" in this example) as a matter of convenience for users who may not be familiar with the cut-off points of enumeration through Wheat's five volumes in six books, and the illustration, some pages away, is cited as a more complete bibliographical assist. Wheat's numbers are consecutive, 1–1302, though with an omission or two and a few expansions by the use of suffixed letters.) The separate volumes and their cross-listing identifiers, are as follows:

Wheat, Carl Irving. 1954–1963. *Mapping the Transmississippi West, 1540–1861 . . . .* San Francisco: The Institute of Historical Cartography, 5 volumes in 6.

WHEAT I:__	1957. *Mapping the Transmississippi West, 1540-1861. Volume One. The Spanish* entrada *to the Louisiana Purchase, 1540-1804.* San Francisco: Institute of Historical Cartography, xiv, 264 pp.
WHEAT II:__	1958. *Mapping the Transmississippi West, 1540-1861. Volume Two. From Lewis and Clark to Fremont, 1804-1845.* San Francisco: Institute of Historical Cartography, xiii, 281 pp.
WHEAT III:__	1959. *Mapping the Transmississippi West, 1540-1861. Volume Three. From the Mexican War to the boundary surveys, 1846-1854.* San Francisco: Institute of Historical Cartography, xiii, 349 pp.
WHEAT IV:__	1960. *Mapping the Transmississippi West, 1540-1861. Volume Four. From the Pacific railroad surveys to the onset of the Civil War, 1855-1860.* San Francisco: Institute of Historical Cartography, xiii, 260 pp.
WHEAT V:__	1963. *Mapping the Transmississippi West, 1540-1861. Volume Five. From the Civil War to the Geological Survey. Part One* [and] *Part Two.* San Francisco: Institute of Historical Cartography, *Part One*, pp. i-xviii, 1-222; *Part Two*, pp. 223-487. [The "bibliocartography" for both parts appears in Part Two.] ["Although the limiting dates for the whole work are 1540-1861, as set forth on the title page, I have found it desirable . . . to consider a number of maps published after the stated dates. In fact, this volume contains a rather extended discussion of significant maps published all through the 1860's, and a final chapter touches upon various notable maps of the 1870's—and even a few of still later date, down to 1884—which one way or another round out the work." (Volume V, Part One, p. xi)]

Given that Wheat's volumes are relatively difficult to access outside of specialized libraries, and that they command steep prices in the bookseller's market, they have also been reprinted in facsimile, in reduced size and without benefit of the few fold-out plates. (Incidentally, none of the fold-out plates are pertinent to the present Cartobibliography.) As a matter of convenience, I list these special and on-demand reprints here:

NO DATE [1995?]. Storrs-Mansfield, Connecticut: Maurizio Martino, and Parsippany, New Jersey: About Books, 5 volumes in 6. ["This reprint is strictly limited to 350 copies" (title-page verso).]

2004. Mansfield Centre, Connecticut: Martino Publishing; two states: 6 volumes in 3, and 6 volumes in 2. [Omits fold-outs.]

When referring to the cross-listings to Wheat, bear in mind that he has arranged items chronologically according to the dates they were created, not necessarily the dates of publication (publication dates are usually referred to in the present cartobibliography). Sometimes, several (even many) years can separate the dates. Herein, a modified style of citation may record differently from Wheat, particularly in the attribution of creator. The differences are imposed by Wheat, who relied (as a cartobibliographer) on the aspects of origin and historical order rather than to the aspects of publication. Further, this cartobibliography cites information as it appears in the publication, whereas some cartobibliographers, like Wheat, may cite interpreted information. Often, particularly with early maps, information is ambiguous and a bibliographer must in the end defer to interpretation. (Recall, too, that Wheat includes manuscript materials in his cartobibliography. Only a few significant manuscripts are cited in the present cartobibliography; these are specially flagged in their appropriate places, by year of creation.)

Notes About the Earliest Works (mid-16th Century).[101] The history of the American Southwest is rich, exhaustively studied, rife with political and economic contention and cultural ambivalence. That history necessarily embraces the publication records of European and, later, American institutions and writers. Native Americans had as well lived in and journeyed through the Southwest for uncounted centuries before the first European forays into this part of North America in the sixteenth century. But, it is the publishing tradition of Europe that begins documenting the corroborative, citable, and obtainable records of reportable activities and observations carried out in this region at specific times; and so this is our bibliographical starting point.

Thus far the earliest item cited in THE GRAND CANON is a cartographical product from *circa* 1535. Of course, this predates the earliest European records of contact with the region of interest here—1539 for the Colorado River, and 1540 for the Grand Canyon. My selection of two pre-dating items closest to 1539, from *circa* 1535 and from 1536, is purposeful; both are map products. Since maps (including gores for globes) were the first printed materials to convey information about the region, for comparison I have cited maps that were recently available at the close of the 1530s, in order to provide a graphic idea of the European understanding of this part of the world on the verge of the new geographical reports just noted. And it followed Hernán Cortés's 1535 arrival at the tip of Baja California that serves as an ideological launch point for a conscious recognition of a gulf/strait off the west coast of New Spain, as opposed to open ocean to the Orient.[102]

---

[101] Repeated from the Introduction to THE GRAND CANON (Volume 1/Part A) so as to retain this information now within Volume 2 (the Cartobibliography). The majority of the "earliest works" cited in THE GRAND CANON are cartographical productions.

The set of gores for a lost globe, printed without attribution perhaps in Nuremberg circa 1535, imaginatively present the west coast of America running westward north of the equator, merging directly with "India" without an intervening ocean.[103] Similarly, gores by Caspar Vopell, printed in Cologne in 1536, depict the same arrangement, with "Hispania Nova" immediately south of and on the same land mass as "Asia Orientalis".[104] This gives some perspective of the knowledge of southwestern North America in the 1530s. To offer citations in this biblography for printed maps earlier than those just mentioned would be superfluous.[105]

The first of the world maps by Sebastian Münster, "Typus Orbis Universalis" (Basle, 1540) portrays "Terra florida" at longitude 260° (contemporary Spanish reckoning) on the western edge of the map; on the eastern edge it continues as "Temistitan", the west coast of which is simply crenulated north–south along the 250° meridian. Correctly it is ignorant of the explorations then underway in the regions of New Spain. At least the American and Asian continents are separated in the northern latitudes by "Oceanvs Orientalis".[106]

---

[102] [See more fully the Notes for Section 1 in the *Cartobibliography*.]

[103] Anonymous. [Set of printed gores for a lost globe.] Nuremberg[?] [*ca*. 1535], 12 gores. (ITEM NO. 25.373).

[104] Caspar Vopell, *Nova & Integra Universi Orbis. Descriptio.* (Cologne, 1536). [Three sections only of gores for a globe.] (ITEM NO. 25.374).

[105] As a matter of historical interest, the great map by Martin Waldseemüller, *Universalis Cosmographia Secundum Ptholomaei Traditionem et Americi Vespucii Aliorüque Lustrationes* (Strassburg, 1507) — on which "America" appears for the first time — presumptuously depicts a mountainous land beyond the eastern edge of North America, labeled, "Terra Vlteriꝰ Incognita" (A Further Unknown). On this map these imagined mountains line the entire west coast of North America. The portrayal is, in fact, more than which was usually shown by mapmakers of the day; the expanses beyond the eastern coast often were conveniently replaced by ornamentation or simply passed off the map sheet altogether. (I am tempted to include this 1507 work in this bibliography since it does figuratively, even if imaginatively, portray the region beyond its horizon that includes the area covered by this bibliography. However, I would also have to include regionally uninformative and superfluous publications between 1507 and 1535, which is not useful.) [See also the Notes for Section 1 herein.] [Also take note that the Waldseemüller map was copied to create gores for a globe, by Johann Schöner (1517), which are illustrated online by the Library of Congress at https://www.loc.gov/item/2016586441/. Although these gores are fragments, America is distinctly shown among them, wherein the North American continent is like that of Waldseemüller's portrayal, including the modified notation, "Vlterius incognita terra", but which omits the mountainous ornamentation abutting Waldseemüller's map edge and substitutes an actual, though imaginative, western coastline on the Pacific.]

[106] Sebastian Münster, *Geographia universalis vetus et nova . . . Claudii Ptolemaei Alexandrini . . .* Basiliae: Apud Henricum Petrum (1540). (ITEM NO. 25.375.)

The second edition (1542) of Sebastian Münster's geographical work[107], in which appears a map that depicts the western coast of North America, demonstrates the practical and intentional slowness of communication in that day. The map is still devoid of anything that we would recognize as having come from the Spanish expeditions. In 1542 there was perhaps time enough after the encounters with the Colorado River and Grand Canyon when something could have been published, even if only from leaked information or hearsay; but cartography in that day was embedded in and embodied the political secrecy of nations and not readily shared, and just as likely the goings-on at the far end of a remote arm of the sea may not have inspired inquiry. So there is nothing known today from that earliest part of the incursionary period.

The "Ulpius Globe" [WHEAT I:4], made in 1542 by Euphrosynus Ulpius probably in Rome, is effectively a manuscript, being unique. The 15½-inch globe, mounted on a wooden stand, is fashioned in copper with mostly Latin inscriptions, including "REGIONES ORBIS TERRAR QVAE AVT AVETERIBTRADITAE, AVT NOSTRA PATPVQ MEMORIA COMPERTÆ SINT EVPHROSYNVS VLPIVS DESCRIBE BAT ANNO SALVTIS M.D. XLII" (Regions of the terrestrial globe handed down by ancients, or discovered in our memory or that of our fathers delineated by Euphrosynus Ulpius 1542), with the dedication, "MARCELLO CERVINO S.R.E. PRESBITERO CARDINALI D.D. ROME" (Marcello Cervino, Cardinal Presbyter, Sancta Romana Ecclesia, Doctor Divinitatis, Rome). It is most well known for its inclusion of the east American explorations that included what today is New York harbor, in 1524, by Giovanni de Verrazano, whose 1529 map was likely used for this globe. As for the southwestern portion of North America, it features today's Mexico as "Nova Hispania" and "Nova Galetia", with no figure of the Gulf of California. Northwest of that region there is undefined openness—plain copper—that likely represents the supposed great western sea, which on this globe is intimated to occupy virtually the whole of the center of North America; its northern boundary is lightly implied but there is no southern boundary. The region would have been effectively unknown to Verrazano, of course, but neither did Ulpius have the information that had recently been acquired by the more recent Spanish explorations.[108]

It was, then, Sebastian Cabot who is supposed to be the first to produce a map depicting something in the region around the head of the Gulf of California, in 1544. It included information gleaned from the expeditions of Ulloa in 1539 and Coronado in 1540–1542 and thus is the earliest published map known to portray any detail in the region of interest to this Cartobibliography.[109] Following on this, in 1548 there are two publications that further acknowledge the Colorado River region based on the Spanish explorations; one is dated (yet another edition of Ptolemy's *Geography*), the second is attributed to that year (a map also by Münster).[110]

First-person reports about the Colorado River and the Grand Canyon originate in events of 1539 and 1540, respectively. The seminal event was with Francisco de Ulloa (died 1540), the navigator who in 1539 with ships of the fleet of Hernán Cortés (1485–1547) reached the mouth of the Colorado River at the head of the Gulf of California. His report appeared publicly two decades later in Venice, in 1556, there translated into Italian in Volume 3 of Giavanni Battista Ramusio's *Della Navigationi et Viaggi*.[111] Its first English translation was published by Richard Hakluyt in 1600.[112] There is, further, a subjective indication that news of the existence of the Colorado River may have been known as early as 1526, when Hernando Cortes wrote to Charles V that while exploring the western coast of California he dispatched a captain whose explorations "penetrat[ed] one hundred and thirty leagues inland", who "described a very large river, which the natives told him was ten days' march from its source, and about which, and the people inhabiting its banks, they told me many strange things."[113]

Europeans' arrival at the Grand Canyon came a year after the Colorado River was encountered, but by land. During 1539–1542 an incursionary army led by Francisco Vázquez de Coronado (1510–1554) infiltrated the American Indian lands on the northern frontier of New Spain in what today is Arizona and New Mexico, venturing even onto the vast Great Plains farther east. As is well recorded historically, they had set out from today's Mexico to rifle Cíbola of its riches, which as the Spanish learned soon enough was only the stuff of mis- and disinformation about the Indian pueblos.

Rivadeneyra (Madrid, 1858), p. 152 (ITEM NO. 2.6582): ". . . trajo me dió noticia de un muy gran rio, que los naturales le dijeron que habia diez jornadas de done él llegó, del cual y de los pobladores dél le dijeron muchas cosas extrañas."

In 1540, an expeditionary party under Pedro de Tovar traveled from the main army westward to the Hopi mesas in today's Arizona. There they learned about a large river even farther to the west. This was of interest to them as a means to connect with the Gulf of California; the original plans of the expedition included resupply of the armed force by ship on the lower Colorado River, although that never happened. Tovar reported this news, and another party, about thirteen men under García López de Cárdenas, was dispatched to investigate. According to an account drawn up decades later, they journeyed twenty days,[114] their Hopi guides leading them to the rim of the Grand Canyon at a point described cursorily as a place where the Colorado River was visible and where low pines grew. This area is believed by many historians to have been at the eastern end of the canyon at or near the area now called Desert View. Others consider it may have been farther west, given the reported length of the journey and other evidence. This would have been closer to where in the early 20th century William Wallace Bass conducted tourists into the canyon on his mining trails near the Grand Scenic Divide.[115] The Spanish party was likely led along Native Americans' long-established routes through this area; and apparently the guides purposely veered away from culturally significant areas such as the route that led to salt deposits near the confluence of the Little Colorado River. Grossly underestimating distances in the canyon, Capt. Pablo de Melgosa, Juan Galeros, and a third man whose name was not remembered by the chronicler, tried to descend to the river. They did not make it very far and swore that rock features down there were taller than the Tower of Seville, a landmark familiar to them back home that stood next to the city's cathedral.[116] Without further record of the canyon, at least so far that is known to us today, the party returned to the main force in today's New Mexico.

---

[114] Flint and Flint have suggested that 20 days was written in error for 20 leagues. (Richard Flint and Shirley Cushing Flint, eds., translators, annotators, *Documents of the Coronado expedition, 1539-1542 : "they were not familiar with His Majesty, nor did they wish to be his subjects".* Southern Methodist University Press (Dallas, Texas, 2005, ITEM NO. 2.21426).)

[115] See items by Ray Kenny in Part 16 [of Volume 1/Part B]. See also Earle Spamer, "'...bigger than the great tower of Seville': Sizing up the 1540 encounter in Grand Canyon", *The Ol' Pioneer* (Journal of the Grand Canyon Historical Society), Vol. 30, no. 3 (Summer 2019), pp. 11-12 (ITEM NO. 2.28399).

[116] The tower, *La Giralda*, still stands as part of the cathedral of Seville, Spain. Originally commissioned in 1184 as a mosque, it was completed in 1198. In Casteñeda's day the tower was some three and a half centuries old but still lacked the upper portion of the present structure. A modest belfry was installed after its original ornamental top was felled in an earthquake in 1356. The present belfry, as well as the upper tower and the statue, "Faith", were emplaced in 1558, eighteen years after Coronado's men attempted to reach the bottom of the Grand Canyon. In 1540 the tower was about 300 feet tall. [See also Earle Spamer, "'. . . bigger than the great tower

Not until the 1560s was an account written down about the events of 1539–1542. It appeared in the manuscript "Relación de la Jornada de Cíbola" by Pedro de Castañeda de Nagera, who drafted it while in Culiacán, New Spain. However, the original manuscript is missing; the manuscript that survives today is a copy of it, made in Seville in 1596.[117] In turn the *Relación* did not appear in print for nearly three centuries after the events it records, when in 1838 Henri Ternaux-Compans published a translation in French.[118] An English translation did not appear until three and a half centuries after the events, when in 1896 George Parker Winship published the *Relación* for the first time in both Spanish and English, based of course on the 1596 copy.[119] As one might expect, memory, cultural conventions, translators' liberties, and modern re-readings produce somewhat different perspectives.

After the Cárdenas party left the Grand Canyon no European is known to have gone there for more than two centuries. In 1776 the Franciscan friar Francisco Tomás Garcés (1738-1781) journeyed from the lower Colorado River region to the lands of the Hualapai, Havasupai and Hopi people. He, fortunately for us, wrote his own record, though it, too, took a long time to see publication, in 1900.[120]

After all this, there are no surviving maps, save one in manuscript, that document the first European forays into the lower Colorado River and Grand Canyon regions—and that map only figures the Gulf of California, hence also the mouth of the Colorado. Perhaps the first document relating to the region considered within the larger purview of THE GRAND CANON contains the instructions from Viceroy Antonio de Mendoza to Hernando Alarcón,

of Seville': Sizing up the 1540 encounter in Grand Canyon", *The Ol' Pioneer* (Grand Canyon Historical Society), Vol. 30, no. 3 (Summer 2019), pp. 11-12 (ITEM NO. 2.28399).]

[117] Pedro de Castañeda, *Relación de la Jornada de Cíbola* (manuscript). This 1596 manuscript transcription of a lost original written in the 1560s is in the Obadiah Rich Collection of the New York Public Library. Sample pages of it have been published in facsimile during the 20th century. (See Castañeda, 1596, ITEM NO. 2.1909.) There is also another, brief account referred to as the *Relación del Suceso*, from another person who had accompanied the Coronado *entrada* in 1540; it, too, is known only from a 16th century copy (see the transcription and translation in Flint and Flint [Anonymous, 2005, ITEM NO. 2.21428).

[118] Henri Ternaux-Compans, *Voyages, relations et mémoires originaux pour servir a l'histoire de la découverte de l'Amérique, publiés pour la première fois, en français, par H. Ternaux-Compans. [Volume 9.] Relation du voyage de Cibola, entrepris en 1540. Inédit.* Arthus Bertrand (Paris, 1838). (ITEM NO. 2.6265)

[119] George Parker Winship, The Coronado expedition, 1540-1542. *U.S. Bureau of Ethnology, 14th Annual Report* (1896), Part 1, pp. 329-613. (ITEM NO. 2.6973)

[120] Elliott Coues (ed., translator), *On the trail of a Spanish pioneer : the diary and itinerary of Francisco Garcés (missionary priest) in his travels through Sonora, Arizona, and California[,] 1775-1776 : translated from an official contemporaneous copy of the original Spanish manuscript, and edited, with copious critical notes by Elliott Coues.* Francis P. Harper (New York, 1900). (ITEM NO. 2.2132)

regarding logistical support for Coronado's *entrada* into the northern reaches of New Spain. This document, dated May 31, 1541, was not, however, available in print for centuries, thus it cannot be scored as an early "publication". (A particularly reliable transcription and translation of these instructions was published by Richard and Shirley Cushing Flint in 2005.[121])

A map of the Gulf of California was drawn in 1541 by Domingo del Castillo, a pilot in the second expedition that sailed to the Colorado River delta, in 1540. It was found among papers of the descendants of Cortés. Copied and engraved in 1769, it was published in 1770 by Francisco Antonio Lorenzana in *Historia de Nueva-España*.[122] Castillo's is the earliest authentic delineation of the Gulf of California and the delta region, even though it depicts what may be the Gila River as a remarkable extension of the sea that would wrap around the north of Mexico. There are earlier 16th-century maps of the Pacific coast of North America, of course, but none even fully resolve the gulf, let alone the delta.[123]

The 16th-century dates noted herein are known with certainty; they establish the beginning of a published history, based on known documents, with which historians and aficionados of the Grand Canyon and the Colorado River are familiar. Might earlier published works yet be found, or more works from the 1540s at least? Perhaps; one may never know what may lay hidden or unrecognized even in the most well-known of collections, or in materials as yet unrecognized by historians and bibliographers.

[122] Hernán Cortés and Francisco Antonio Lorenzana, *Historia de Nueva-España, escrita por su esclarecido conquistador Hernan Cortes, aumentada con otros documentos, y notas, por el ilustrissimo Señor Don Francisco Antonio Lorenzana, Arzobispo de Mexico.* Imprenta del Superior Gobierno, del Br. D. Joseph Antonio de Hogal (México, 1770). (ITEM NO. 2.14602) See also the Cortés–Lorenzana map reproduced in the the front matter [to the Cartobibliography].

[123] A richly illustrated historical discussion of early portrayals of the region of interest here is Dora Beale Polk's *The Island of California: A history of the myth*, University of Nebraska Press (Lincoln, 1991, ITEM NO. 2.5096), although the citations for the numerous manuscript and published maps are imperfect (they are not listed in Polk's bibliography nor identified in detail in the text). The early cartography of the west coast of North America is also very well reviewed and amply (though selectively) illustrated by Justin Winsor, "Discoveries on the Pacific coast of North America", *in* Justin Winsor (ed.), *Narrative and critical history of America. Volume II. Spanish explorations and settlements in America from the fifteenth to the seventeenth century.* Houghton, Mifflin and Co. (Boston, 1886 [ITEM NO. 2.6991). As Winsor astutely opined, such maps represent "shadowy and unstable surmise long continued" (p. 431).

GO TO BIBLIOGRAPHY TABLE OF CONTENTS

PART 26. AUDIO-VISUAL WORKS AND PHOTOGRAPHIC PUBLICATIONS ON THE GRAND CANYON AND LOWER COLORADO RIVER REGIONS

OVERVIEW. This part cites film-media productions, including silent and sound motion pictures, photographic sets such as film strips and other transparency products, 3-D film-based productions, and stereographs; and electronic-image media like videos, CDs, DVDs, and some broadcast productions (particularly those that have been redistributed in electronic media). These citations include items for younger audiences. Resources that are accessible only online are not included. (Publications that are only compilations of halftone or similarly produced images, such as displays of photographers' works or view books for the tourist market, are cited in Part 2 [GENERAL PUBLICATIONS].)

Part 26 includes citations of items that contain potentially offensive material, with sexual or other matter that some users, for religious, moral, or personal reasons, may not wish to encounter. The pertinent citations are grouped in the Supplement at the end of Part 26 (before the Appendices to Part 26). It is additionally important to segregate these citations as this is an internationally focused bibliography with an international audience, whose particular perspectives may not be known to this compiler. The cited items themselves may contain explicit material but a few of them do not; yet these, too, are segregated because the serials in which they appear do contain such matter. (Off-color language is not considered reason for segregation.)

NOTES FOR PART 26

Names of producing agencies are usually used for the indexed author field.

Playing times are given in: [minutes]:[seconds] *or* [hours]:[minutes]:[seconds].

For certain analog tape speeds, ips = inches per second.

REMARKS ON POSTCARDS AND STEREOGRAPHS

Whereas postcards and stereographs both may be treated as "ephemera", a genre not generally cited in this bibliography, an arbitrary decision has been made to cite stereographs because of their relatively fewer numbers as compared to postcards. Thus, there is a better chance that the list of stereographs (in Appendix 2 to Part 26) will be more comprehensive than that which could be compiled for the thousands of postcards that have been produced, which depict scenes in the areas covered by this bibliography. For the most part, stereographs also are an older, mostly discontinued form of publication; any modern products will be few as compared to the numbers of modern postcards that in any case have not been seen. The stereographs cited herein are legacy publications, chiefly from the late 19th and early 20th centuries.

As like the 3-D transparency products (that are listed in the Appendix 1 to Part 26), stereographs and postcards each have devoted groups of enthusiasts, who have made available a great deal of information and publishers' lists in print and on websites. (The 3-D transparency products are listed separately because they do not have information that can be conveniently formulated in any of the regular citation styles used in this bibliography.)

1954 26.1380 *Southwest passage.* (Starring Rod Cameron, Joanne Dru, John Ireland, John Dehner; with Mark Hanna as Hi Jolly [Hadji Ali]. Ray Nazarro, director; Edward Small, producer; Harry Essex, writer.) Distributed by United Artists. 75:00. [Plot is based on Edward F. Beale's 19th-century army experiment using camels in the Southwest.] 🎥

Eggert, Charles

1955 26.1370 *A canyon voyage.* Barrytown, New York: Adventurama Productions. 16-mm film. 61:00. [Adventure and documentary film made during a 1955 expedition on the Green and Colorado Rivers, to Lees Ferry, to retrace the Powell Expedition and to document the rivers prior to the construction of dams. It was intended to continue through Grand Canyon but low water levels made it impractical at that time (but see Eggert, 1956, *Danger River*, ITEM NO. 26.1371); nonetheless, a bit about Grand Canyon is included. The film was made available through in-person programs contracted through National Artists Corp., New York. *A Canyon Voyage* premiered at the Cosmos Club, Washington, D.C. Film length as cited here given by Marriott Library, University of Utah, from the digitized file of the 16-mm film (correspondence, 22 July 2020).] [See also the companion book, Eggert (2020, ITEM NO. 2.29520).] [*NOTE*: The Marriott Library also holds a VHS copy of the films in question, in the Hatch River Expeditions video collection, which are noted there to have a combined time of 1:39:15. There is also "a 1960s edited version [of both films together] with Charles Eggert's commentary on the making of the films and how they were re-cut and edited to use during the fight over dams in the Grand Canyon in the 1960s. 48:102 [*sic*, 48:10]."] 🎥

1956 26.1371 *Danger River*. Barrytown, New York: Adventurama Productions. 16-mm film. 20:00. [Adventure and documentary film made during a 1956 expedition on the Colorado River through Grand Canyon, completing the project begun with *A Canyon Voyage* (Eggert, 1955, ITEM NO. 26.1370). The film was made available through in-person programs contracted through National Artists Corp., New York. Film length as cited here given by Marriott Library, University of Utah, from the digitized file of the 16-mm film (correspondence, 22 July 2020).] [See also the companion book, Eggert (2020, ITEM NO. 2.29520).] [*NOTE*: The Marriott Library also holds a VHS copy of the films in question, in the Hatch River Expeditions video collection, which are noted there to have a combined time of 1:39:15. There is also "a 1960s edited version [of both films together] with Charles Eggert's commentary on the making of the films and how they were re-cut and edited to use during the fight over dams in the Grand Canyon in the 1960s. 48:102 [*sic*, 48:10]."] 🎥

Griffith, L. A. [Griffith, Linda Arvidson]

1912 26.1411 The wonderful moving pictures in color. *Leslie's*, 115(2990) (December 26): 672, 676. [Principally about a "moving picture play" filmed in Kinemacolor by the Kinemacolor Company at Grand Canyon. One still from the film notes, "This scene was posed at the Grand Canyon of Arizona in a play called 'The Explorers.' This was so as to get natural scenery as a background. Mrs. Griffith, the girl, is the author of this article. The natural colors of the mountain show in the film."] [*NOTE*: Although this film is known by title, and by this example from *Leslie's* weekly magazine, little or no information is had about it. The Kinemacolor process was the first to film movies in color under natural lighting, employing different filters during both filming and projection. The author of the article in which this photo appeared, L. A. Griffith—"Mrs. Griffith" as noted in the photo legend—was Linda Arvidson Griffith, wife of silent-film mogul D. W. (David Wark) Griffith, who took over the short-lived Kinemacolor studio. Mrs. Griffith starred in many of her husband's pictures. The title, "The Explorers," has not been found in D. W. Griffith's filmography.] 🎥

Hoover Dam 36.0161° N, 114.7377° W.* (ellipsis is part of title).] [Live-concert video, the first of Idol's 2023 North American spring and summer tour. From the container: "Billy Idol: State Line is the world's first concert film shot at Hoover Dam. This film features an awe-inspiring live concert performance from Billy including two unique sets of his iconic hits on site at Hoover Dam, which straddles the Colorado River directly on the Nevada/Arizona state line. A full band concert at sunset with special guests that electrified and illuminated the surrounding Black Canyon and an acoustic duo set on the roof of the powerhouse directly at the foot of Hoover Dam. For both sets, Idol was joined by his collaborator and lead guitarist of over forty years, Steve Stevens. Performed in front of only 250 fans, the electric set featured special guests Alison Mosshart (The Kills, The Death Weather), Steve Jones (Sex Pistols, Generation Sex) and Tony Kanal (No Doubt)." DVD includes "Audio Q&A with Steve Stevens".] ◎ DVD VIDEO

Jost, Jon

1970 26.1347 *Canyon.* [United States]: Jon Jost. 16mm film. 6:00. [An experimental short silent film produced as a compressed-time view of a day at the Grand Canyon.] 🎥 SILENT

2013 26.1348 *Canyon*. [United States]: Jon Jost. HD Video. 76:00 and 24:00. ["*Canyon* is in effect a re-make of a film I shot in 1970 in 16mm, which ran 5 [*sic*] minutes. It was a look down into the [Grand] Canyon for a full day, made from a sequence of shots, taken from the same viewpoint, Yavapi [*sic*, Yaki Point], dissolved one to the next. This version is in HD and takes advantage of the improved definition, and the release for certain constraints which 16mm imposed—technical and financial. Here the limits of time, cost, and the improved aesthetic quality allowed for another approach, though again the work is from a single vantage point—it is subtler and more in keeping with the nature of the canyon and its pacing. I also made a shorter version for those unable to adjust to a hint of the canyon's 'sense of time'—the short version is 24 minutes long." (from Jon Jost website, http://www.jonjost.altervista.org/work/canyon.html; accessed 15 July 2019)] [See also an interview with Jost, regarding the 1970 and 2013 films (Oter and Jost, 2014, ITEM NO. 2.28347).] 📹

2008	26.1304	*Bike-O-Vision virtual reality DVDs : Grand Canyon & Sedona, AZ : Journey #15.* North Bay Productions, DVD. 83:00. ("Color Enhanced Video with Instrumental Music".) [Title from container.] [For indoor cycling and treadmill workouts. Promotional material indicates: "You'll start up slowly through the dwarf Pinyon Pine forests along the South Rim of the Grand Canyon cruising by unbelievable overviews along your route. Next you'll cycle past the (not so) 'Little' Colorado River Gorge, the desolate Sunset Crater Volcano and the Wupatki Indian dwellings. The polychromatic monuments around the town of Sedona enhance your journey as will the snowy aspen-lined peaks above Flagstaff and the radiant Painted Desert."] ◉ DVD VIDEO
2015	26.1305	*Bike-O-Vision virtual reality DVDs : The Grand Canyon, Arizona : Wide Screen Journey #44.* North Bay Productions, DVD. 88:00. ("Color Enhanced Video with Instrumental Music".) [Title from container.] [For indoor cycling and treadmill workouts. Promotional material indicates: "You'll see all the major overlooks like Navajo Point, Moran Point, Grandview Point and Yavapai Point in all their world-class splendor, and in between go for stretches of easy-to-medium-grade pedaling through green forests of Pinyon-Juniper and tall Ponderosa Pine. Plus, you'll get a ride along the back door route on the Coconino Rim aside the massive Little Colorado Gorge. And while that would be enough, we like to give you more than your money's worth by throwing in a super ride through Vermillion Cliffs National Recreation area [*sic*]. You'll be seeing sudden arroyos carved vertically into the wide valley and stopping to see spectacular views from Navajo Bridge at Marble Canyon! Then continue past precariously balanced rocks and other beautiful Arizona scenery ending up literally knee deep in the freezing cold Colorado River at Lees Ferry."] ◉ DVD VIDEO ◉ BLU-RAY

Pathé Exchange, Inc.

1928 26.1367 *Bride of the Colorado.* (Elmer Clifton, director; John Randolph Bray, producer; Denison Clift, continuity. Story by John Randolph Bray and John Farrow. Starring John Boles, Donal Blossom, William Irving, Henry Sedley, Carl Stockdale, Richard Alexander, and (not credited) Mae Busch.) Pathé Exchange, Inc. 🎥SILENT [*NOTE*: This film, also referred to as *Pride of the Colorado* and apparently under a working name, *Menace*, was filmed on the Colorado River through Grand Canyon. There are numerous references to the film prior to and during the filming trip, casually known as the Pathé-Bray expedition. Although portions of it seem to have been publicly shown around 1928, the film never was completed for release; and the print seems to have been lost. An early, brief review—seemingly the only known review—was not enthusiastic (Anonymous, 1928, ITEM NO. 30.1472). A great deal of background information (more than a thousand pages) may be read in the proceedings of a suit adjudicated in the New York Supreme Court, Appellate Division—First Department (1930, ITEM NO. 2.29852; 1931, ITEM NO. 2.22208).]

SUPPLEMENT TO PART 26

Potentially Offensive Material Cited Separately

Part 26 includes citations of items that contain potentially offensive material, with sexual or other matter that some users, for religious, moral, or personal reasons, may not wish to encounter. The pertinent citations are grouped in this Supplement. It is additionally important to segregate these citations as this is an internationally focused bibliography with an international audience, whose particular perspectives may not be known to this compiler. The cited items themselves may contain explicit material but a few of them do not; yet these, too, are segregated because the serials in which they appear do contain such matter. (Off-color language is not considered reason for segregation.)

PART 26. AUDIO-VISUAL WORKS AND PHOTOGRAPHIC PUBLICATIONS ON THE GRAND CANYON AND LOWER COLORADO RIVER REGIONS

APPENDICES. GENERAL GUIDES TO 3-D PUBLICATIONS

BEGINNING IN THE 20th century, three-dimensional film products using specialized mechanical viewers were produced for casual and educational uses. These allowed users to participate in what today we would call "virtual reality", although these were based on photographs rather than software implementation. Using the viewers, users experienced a three-dimensional view of two stereoscopic static scenes. The arranged image *below* illustrates four graphical media types of Grand Canyon imagery products, three of them stereoscopic *(clockwise from upper left)*: Underwood & Underwood stereo viewcards with accompanying booklet, Tru-Vue filmstrips and viewer, motion picture film (only a part of the photo, not 3-D), and View-Master reel and viewer. (Motion picture films are not cited in these appendices; see the main portion of Part 26.)

APPENDIX 1

GENERAL GUIDE TO COMMERCIALLY PRODUCED 3-D TRANSPARENCY PRODUCTS

THIS APPENDIX provides basic information pertaining to two of the popular three-dimensional view products of the 20th century; specifically, those produced by View-Master and Tru-Vue. Other products are added as they are discovered. This is not a comprehensive guide, for which there is a profound amount of information in web-based sources, including title lists, production guides, information on variants, and histories.

View-Master
Tru-Vue

NOTES FOR APPENDIX 1 TO PART 26

Beginning in the 20th century, three-dimensional film products using specialized mechanical viewers were produced for casual and educational uses. These allowed users to participate in what today we would call "virtual reality", although these were based on photographs rather than software implementation. Using the viewers, users experienced a three-dimensional view of two stereoscopic static scenes. While numerous similar kinds of merchandise were manufactured, usually only for short periods, two tradenamed products stand out for their popularity, worldwide distribution, and longevity: **View-Master** reels and **Tru-Vue** filmstrips and film cards.

This is not a comprehensive guide. However, there is a profound amount of information in web-based sources compiled by interested individuals and organizations devoted to the identification and collecting of these products. Their websites and, occasionally, printed lists include comprehensive title lists, production guides, information on variants, and histories.

The specific titles and identification numbers cited here are provided to allow interested users to locate specific items more quickly in the online sources or to identify them in resale markets. Due to copyright issues, illustrations of the many varieties of these products are not reproduced here, but images can be seen for many of them in the online sources. (The illustrations that do appear here were retrieved from Wikimedia Commons.)

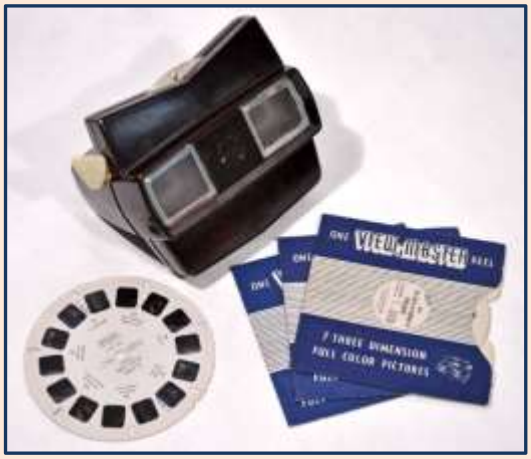
To assist the user, two major websites are noted here, through which a very substantial amount of further information and illustrations pertaining to the respective products may be had (bearing in mind that websites often are frequently revised and URLs may change). Within the websites are numerous links, including links to other external sources. These will at least establish a starting point for more detailed research, which will allow users to identify the variety of products and finer points. (The links are valid as of April 2018.)

View-Master: http://www.viewmasterdb.com

Tru-Vue: http://www.3dimensionphoto.com/vtca/Tru-Vue/Tru-Vue.htm

For continuity with the remainder of this bibliography and in order to identify unique publications, each reel or packet is assigned an ITEM NO. within Part 26.

VIEW-MASTER®



VIEW-MASTER products first appeared at the 1939 World's Fair in New York, marketed by the Sawyer Service Co., Inc., later known as Sawyer's. Both the mechanical viewers and the stereo-image reels went through numerous modifications and style changes over the years; a familiar arrangement is illustrated *at right*.

The reel design and internal mechanism of the viewers, however, remained unchanged and all reels can be used in all viewers. Stereo reels were made of thin cardboard, which served as a mount for seven pairs of color stereoscopic transparencies. The card would be inserted into a slot in the top of the viewer (see card already in place in the image above). Facing a light source, the user would hold viewer to their eyes and rotate the card using a mechanical lever (on the left side in the image above) that advanced the images to the next pair. Individual reels were always housed in printed paper sleeves (as shown). Some later models of viewers would include a built-in, battery-powered light source. The progression and variety of viewers, tending toward modernity and economy, as well as of the reels, is well documented in documentary sources today. Variations are known in typography, image selection, and card color styles. Sometimes test reels and preview reels were released, along with specialized sets customized for specific users and markets (for example, the U.S. military, hotels, movie and television program producers, and promotional ventures of the amusement industry).

Over the years topical reels were sold individually in paper sleeves, in 3-reel packet sets (unnumbered and numbered), and in blister-packet packaging.

Sawyer's acquired its primary competitor, Tru-Vue, in 1951, and in 1966 Sawyer's itself was acquired by GAF Corporation. Various corporate ownerships came into play in subsequent years. When GAF sold the View-Master line to View-Master International Group (VMI) in 1981, still more product changes were introduced, including the abandonment of most paper reel sleeves in favor of pastic blisterpacks containing three reels without accompanying literature. The View-Master product is currently owned by Fisher-Price. However, the traditional reel products were discontinued in 2009.

Since the manufacturers did not maintain a consolidated title list over the years, it has fallen upon the dedication of View-Master enthusiasts to assemble that list, noting the numerous variants along the way; a remarkable number of sleeve and reel typography variants. The lists that follow herein comprise those of the Sawyer's and GAF years, which pertain to the regions covered by this bibliography; the only topics of pertinence are the Grand Canyon, Hoover Dam, Glen Canyon Dam, and in some respects Native Americans of the region. Only the specifically identified products are listed here. Omitted are less-focused titles; for example, scenic views of the U.S.A. or of individual states, wonders of nature, travelogue wonders, and so forth, specific ones of which may or may not include either the canyon or dam.

It is not the purpose here to list all of the variants of reel styles and packaging, as these are well covered and illustrated (with continual updates) by enthusiasts in publications (including books and collectors' serials) and on numerous websites. The lists here will assist the user in identifying the specific titles that were manufactured, and which may be acquired through online and other sales. Titles and variants are as thus far known to the enthusiasts. For the most part, titles are U.S. releases, although some foreign releases are also cited; distinguishing characteristics will be found in more detailed resources.

In the lists that follow, variant titles are noted, but not variants in scene selection or points of reel manufacturing or typography. Dates are not usually noted, although some do have copyright dates as indicated.

Single Reels

Enthusiasts' notes indicate that single View-Master reels were numbered 4–5870, but not all numbers were assigned to reels. Those that are indicated with an added 1959 copyright date may have been restricted to 3-reel packets at that time. Within each number all titles are listed in alphabetical order.

"Reel Packs"

Sawyer's introduced its "Reel Pack" series, comprising seven reels packaged on long cards with clear cellophane covering. GAF expanded this by producing packages of reels in flat plastic cannisters or repackaged in containers holding a viewer or projector.

Numbers adapted from 3-reel packets

RP-A 1582	Hoover Dam [Sawyer's reel]	26.722
RP-A 3613	Grand Canyon National Park [Sawyer's reel]	26.723

VMI Blisterpacks

After GAF sold the View-Master line to View-Master International Group (VMI) in 1981, most paper reel sleeves were distontinued in favor of pastic blisterpacks containing three reels without accompanying literature.

5012	Hoover Dam & Lake Mead	26.724
5065	Glen Canyon Dam & Lake Powell	26.725
5071	Grand Canyon River Expedition	26.726
	Grand Canyon No. 3	26.727

“Talking” View-Master Products

Both GAF and VMI introduced audio accompaniments using a grooved, plastic record-like disk, although the two product lines were not compatible. In the GAF product, the disk was affixed to the View-Master reel but rotated independently of the transparencies disk. A special viewer was required to view the scenes and listen to the narrative.

AVA 371	Grand Canyon	26.728

Mattel View-Master™ Virtual Reality

Mattel, Inc. has more recently made available a product that is more in line with the participatory expectations of today’s users, one more in line with “virtual reality” than that implied by the traditional View-Master line. One product in this new line is the “View-Master® Experience Pack: Destinations”.

The information provided here is repeated from the Mattel website (https://shop.mattel.com/shop/en-us/ms/view-master/view-master-experience-pack-destinations-dll69, accessed April 7, 2018) so that current and future readers can appreciate the breadth of proprietary interests and materials that are involved, and thus the likelihood that the product will not be long-lived. Whether future users of this bibliography will have access to short-lived resources by means that are not now in existence remains to be seen. While the one product noted here is identifiable, and which may be physically available in the future (presumably among collectors), the hardware and software support that it requires will likely not be available. As with ebooks, which necessitate specialized hardware or software and thus are not cited in this bibliography, this product is noted here as a matter of interest to 3-D product enthusiasts and not so much as a “bibliographical” entry.

The View-Master™ Virtual Reality product line requires that the user employ their own smartphone and download a pertinent free app (software application) from the Apple App Store online. The Mattel website promotes the “Destinations” product thus:

> [The product uses] View-Master VR that Works With Google Cardboard. The View-Master VR viewer (sold separately) will become your portal to immersive, virtual reality adventures that will transport you around the world and beyond. Simply download the View-Master VR Destinations app, slide your smartphone into the viewer and place a Destinations Reel in front of you. A 3-D augmented reality menu will appear—digital icons that seem to float above the reel. Make your selection, and click the lever to launch yourself through time and space into 360-degree views that completely surround you. Look up, look down, look around—everywhere you turn, there is something to see because you are virtually" standing within the environment! Interact with your surroundings—pulling up videos, images and fun facts, all with a simple click of the lever. Learn new facts, go deeper into a scene or even see how these historic sites might have looked long ago.
>
> [At this time the product includes] one View-Master® VR viewer, one Preview Reel, one iPhone® 5, iPhone® 5c and iPhone® 5s adapter and user guide. Colors and decorations may vary. Compatible smartphone required (not included): Samsung Galaxy S®6, Samsung Galaxy S®5, Samsung Galaxy S®4, Samsung Galaxy Note®4, Motorola Moto X™ (2014), Motorola Droid Turbo, LG G4™, LG G3, HTC One™, Nexus 6™, iPhone® 6s plus, iPhone® 6s, iPhone® 6 plus, iPhone® 6, iPhone® 5s, iPhone® 5c [*see footnote*], iPhone™ 5 [*see footnote*], iOS 8.1 and above. NOTE: View-Master® VR may also work with newer model Android smartphones not listed above that have screens between 5 and 6 inches.
>
> [*Footnote*]: View-Master VR apps may not be optimized for iPhone® 5 and iPhone® 5c.

TRU-VUE®

TRU-VUE products first appeared in 1933 at the Century of Progress World's Fair in Chicago, first with sepia-toned filmstrips that were passed through a viewer *(right top and center)*. The user held the viewer to a light source and advanced the roll through the device. Each strip usually contained 14 stereo pairs. In 1949, color films were introduced. Filmstrips can be dated by box colors and typography, as recorded by Tru-Vue enthusiasts.

The Tru-Vue company was acquired in 1951 by its major competitor, View-Master. Soon afterward the filmstrip product was discontinued in favor of a less expensive card and viewer. The card held vertical rows of seven stereopair transparencies *(lower right)*. However, the films were not the Kodachromes of View-Master products but a cheaper make that lost its colors over time, becoming a more uniform magenta (a change with which many owners of 1950s–1960s color transparencies are familiar).

In 1966 GAF acquired Sawyer's and its View-Master and Tru-Vue lines, but soon discontinued the Tru-Vue product.

(In England during the 1950s a "True-View" product line was started by Signaling Equipment Ltd, either under license from Sawyer's or by acquiring the Tru-Vue filmstrip manufacturing equipment (the viewers and box typographies of the True-View lines are almost

identical to those of Tru-Vue. The subjects of the True-View product lines, however, seem not to have included any places pertinent to this bibliography.)

The most distinguishing characteristic of the Tru-Vue products are the great variety in the typography and colors of the boxes containing the filmstrips. It is, however, not the purpose here to list all of the variants, as these are well covered and illustrated (with continual updates) by enthusiasts in publications and on numerous websites. The lists below will assist the user in identifying the specific titles that were manufactured, and which may be acquired through online and other sales. Titles and variants are as thus far known to the enthusiasts.

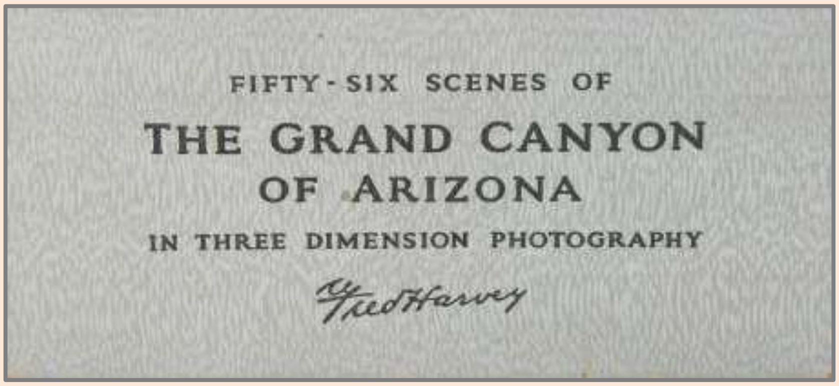
Fred Harvey Grand Canyon Box

26.752



FIFTY-SIX SCENES OF
THE GRAND CANYON
OF ARIZONA
IN THREE DIMENSION PHOTOGRAPHY
Fred Harvey

Box Lid *Earle Spamer collection*

A Tru-Vue custom product produced for Fred Harvey, the concessionaire at Grand Canyon National Park and elsewhere along the Santa Fe Railway system, is a silver-papered cardboard box containing a viewer and four Grand Canyon filmstrips. The Fred Harvey logo appears on the outside, which was for marketing purposes, while the Tru-Vue logo appears on the inside of the lid. The Fred Harvey company likely sold these across all of its outlets in the West.

The illustration *at right* shows a box holding a viewer and Grand Canyon black-and-white filmstrip numbers 1 to 4 only, which corresponds to the “fifty-six scenes” advertised on the lid. The red box style (sides not displayed in photo) indicates a manufacturing date of 1935–1939. While other boxes have been seen also to include the Grand Canyon North Rim filmstrip, and an additional Petrified Forest–Painted Desert filmstrip to fill in the empty slot, it is likely that these were added by the purchaser or later owner. For a while, the Tru-Vue company also produced dummy boxes labeled “Empty”, to fill gaps so as to keep the remaining boxes in order; however, this was a short-lived practice.

APPENDIX 2

GENERAL GUIDE TO COMMERCIALLY AND GOVERNMENTALLY PRODUCED STEREOGRAPHS

THIS APPENDIX provides basic information pertaining to stereographs produced by commercial interests and government (or government-sponsored) agencies. This is not a comprehensive guide, for which there is a profound amount of information in web-based sources, including title lists, production guides, information on variants, and histories. The products cited here are those that have come to the compiler's attention.

NOTES FOR APPENDIX 2 TO PART 26

STEREOGRAPHS are listed under the names of their manufacturers or government producers. These have been identified chiefly from the collections of the Library of Congress (https://www.loc.gov/collections/stereograph-cards/) and the New York Public Library (https://digitalcollections.nypl.org/collections/robert-n-dennis-collection-of-stereoscopic-views#/). (URLs last accessed January 1, 2019.) A few individually seen items have been added here.

The stereographs that are listed here from more extensive sets are those that represent scenes within the areas covered by this bibliography. Many more views in these sets are extralimital and thus are omitted here.

This is only a guide. There is a profound amount of information in web-based sources compiled by interested individuals and organizations devoted to the identification and collecting of these products. Their websites and, occasionally, printed lists include title lists, production guides, information on variants, and histories. Nonetheless, the lists here are incomplete, and users may find items that are omitted here. Rediscoveries will continue to be added in future editions of this bibliography.

The specific titles and identification numbers cited here are provided to allow interested users to locate specific items more quickly in the online sources or to identify them in resale markets. For extended lists, enumerated cards are listed first, followed alphabetically by title for non-eunumerated cards. Alphabetization includes the leading article, "The".

For continuity with the remainder of this bibliography and in order to identify unique publications, each cited stereograph is assigned an ITEM NO. within Part 26. Boxed sets are cited as conventional citations, whereas individual stereographs are listed alphabetically by series (if so arranged) and title.

For a complete set of views of Southern Paiute Indians (and of a few other tribes, but only as reproductions of original John K. Hillers albumen prints, not as the stereographs produced from them), see Carol Ormond (2019, ITEM NO. 17.2363), *The People : the missing piece of John Wesley Powell's expeditions : a photographic history of the Southern Paiute tribes.* West Jordan, Utah: Git'er Done Books (a joint venture with The Thunderbird Foundation for the Arts [Mt. Carmel, Utah]).

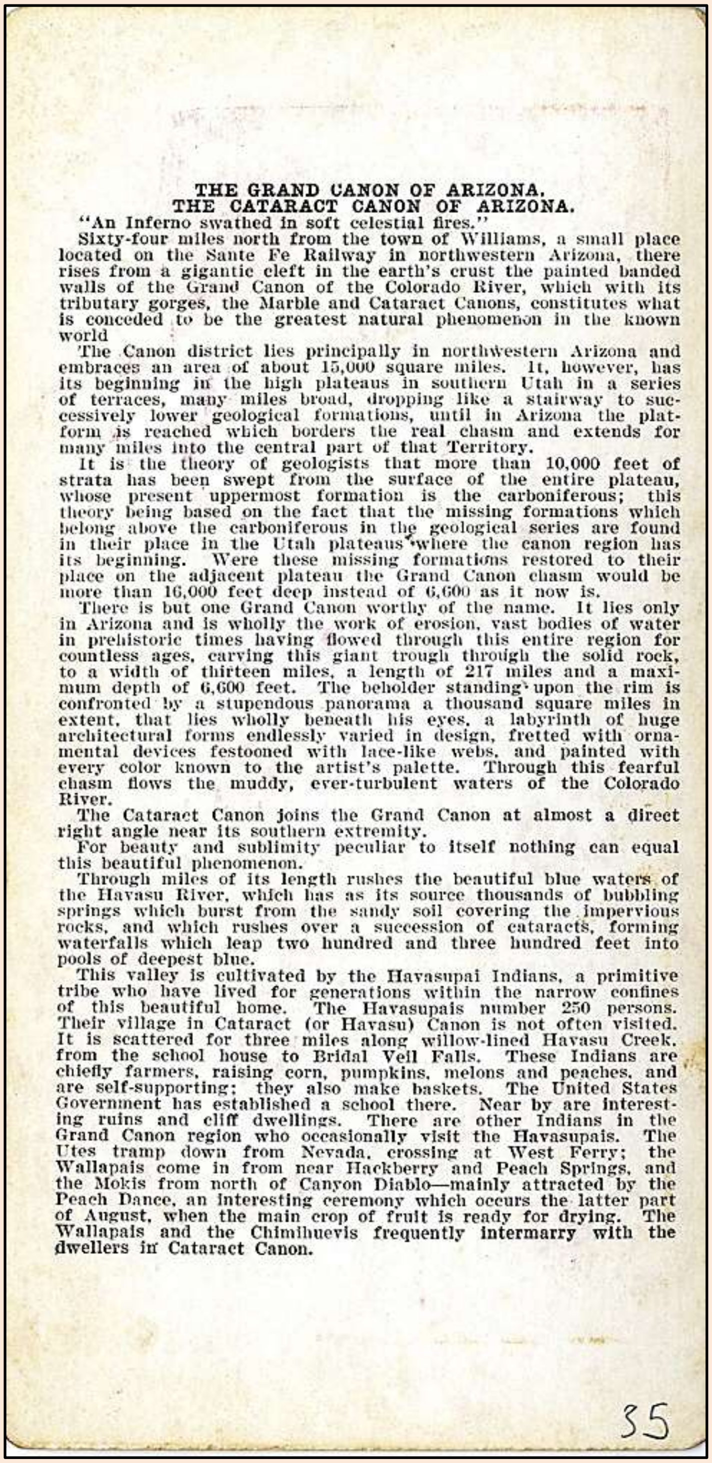
"Grand Canyon, Arizona."



THE GRAND CANON OF ARIZONA.
THE CATARACT CANON OF ARIZONA.

"An Inferno swathed in soft celestial fires."

Sixty-four miles north from the town of Williams, a small place located on the Sante Fe Railway in northwestern Arizona, there rises from a gigantic cleft in the earth's crust the painted banded walls of the Grand Canon of the Colorado River, which with its tributary gorges, the Marble and Cataract Canons, constitutes what is conceded to be the greatest natural phenomenon in the known world

The Canon district lies principally in northwestern Arizona and embraces an area of about 15,000 square miles. It, however, has its beginning in the high plateaus in southern Utah in a series of terraces, many miles broad, dropping like a stairway to successively lower geological formations, until in Arizona the platform is reached which borders the real chasm and extends for many miles into the central part of that Territory.

It is the theory of geologists that more than 10,000 feet of strata has been swept from the surface of the entire plateau, whose present uppermost formation is the carboniferous; this theory being based on the fact that the missing formations which belong above the carboniferous in the geological series are found in their place in the Utah plateaus where the canon region has its beginning. Were these missing formations restored to their place on the adjacent plateau the Grand Canon chasm would be more than 16,000 feet deep instead of 6,600 as it now is.

There is but one Grand Canon worthy of the name. It lies only in Arizona and is wholly the work of erosion, vast bodies of water in prehistoric times having flowed through this entire region for countless ages, carving this giant trough through the solid rock, to a width of thirteen miles, a length of 217 miles and a maximum depth of 6,600 feet. The beholder standing upon the rim is confronted by a stupendous panorama a thousand square miles in extent, that lies wholly beneath his eyes, a labyrinth of huge architectural forms endlessly varied in design, fretted with ornamental devices festooned with lace-like webs, and painted with every color known to the artist's palette. Through this fearful chasm flows the muddy, ever-turbulent waters of the Colorado River.

The Cataract Canon joins the Grand Canon at almost a direct right angle near its southern extremity.

For beauty and sublimity peculiar to itself nothing can equal this beautiful phenomenon.

Through miles of its length rushes the beautiful blue waters of the Havasu River, which has as its source thousands of bubbling springs which burst from the sandy soil covering the impervious rocks, and which rushes over a succession of cataracts, forming waterfalls which leap two hundred and three hundred feet into pools of deepest blue.

This valley is cultivated by the Havasupai Indians, a primitive tribe who have lived for generations within the narrow confines of this beautiful home. The Havasupais number 250 persons. Their village in Cataract (or Havasu) Canon is not often visited. It is scattered for three miles along willow-lined Havasu Creek, from the school house to Bridal Veil Falls. These Indians are chiefly farmers, raising corn, pumpkins, melons and peaches, and are self-supporting; they also make baskets. The United States Government has established a school there. Near by are interesting ruins and cliff dwellings. There are other Indians in the Grand Canon region who occasionally visit the Havasupais. The Utes tramp down from Nevada, crossing at West Ferry; the Wallapais come in from near Hackberry and Peach Springs, and the Mokis from north of Canyon Diablo—mainly attracted by the Peach Dance, an interesting ceremony which occurs the latter part of August, when the main crop of fruit is ready for drying. The Wallapais and the Chimihuevis frequently intermarry with the dwellers in Cataract Canon.

26.806 28. Peaks of the Kibab [*sic*] Plateau.

George M. Wheeler

U.S. Geological and Geographical Explorations and Surveys West of the 100th Meridian [Wheeler Survey]

This list was compiled primarily from the holdings of the Library of Congress. Information is as provided by the Library of Congress (online), except where otherwise seen by Spamer. Occasional items are not held by LOC, as denoted by a credit line in the LOC lists. Some of the stereographs are part of named series; others are grouped here in series according to identifying features of typography. Published enumerated views are not always in a contiguous sequence. Some views are used in more than one series; and more notably, various different sets were created for distribution or sale. All of the Wheeler Survey cards are at first identifiable by their lemon-yellow borders.

Library of Congress, primary search webpage https://www.loc.gov/pictures/; other, itemized lists at https://www.loc.gov/rr/print/coll/western_survey/list2.html (and substitute . . . /list3.html, /list4.html, /list5.html, /list6.html, /list7.html as pertinent [/list1 pertains solely to the King Survey and is extralimital to this bibliography]). The lists contain hyperlinks that will redirect the user to digitized copies of stereographs on the Library of Congress website. Cards not held by LOC are not digitized there. Note that some of these lists include stereographs that are of scenes extralimital to this bibliography, but the lists that follow below contain only those scenes pertinent to the Grand Canyon–Lower Colorado River bibliography. (LOC lists last accessed January 1, 2019.)

See also above, E. & H. T. Anthony & Co., which commercially published some of the Wheeler Survey stereographs (https://www.loc.gov/rr/print/coll/western_survey/list3.html).

[*NOTE*: This is now an exceedingly scarce publication, an original not known to be held in the U.S.; not seen for this bibliography.] [Refer also to selected photographic prints in folio (see Wheeler, no date, ITEM NOS. 2.6848, 2.6849.]

Individual Stereographs

Cards are identifiable by imprinted black type, reading, "U.S. Geographical Surveys West of 100th Meridian." and "1st Lieut. Geo. M. Wheeler, Corps of Engineers, in charge." No other identifying features on recto. The cards listed here are properly part of the "Colorado River Series" for 1871 [see below]; however, note differences in legends.

26.807	[113]	Halt below mouth of Painted Cañon, Colorado River.
26.808	[136]	Grotto Spring, Grand Cañon, Colorado River.
26.809	[150]	Boat crew of the "Picture" at Diamond Creek.

Series: *Colorado River Series* [1871 photographs] (Timothy H. O'Sullivan, photographer)

Cards are identifiable by imprinted black italic type, reading, "Colorado River Series." and "Explorations West of the 100th Meridian. Expedition of 1871, Lieut. Geo. M. Wheeler, Com'dg." Legends printed on recto. [Compare also selected photographic prints in folio (see Wheeler, no date, ITEM NO. 2.6848).]

26.810	No. 111—The Start, Camp Mohave, A. T.
26.1145	No. 113—The boat, "Picture."
26.811	No. 114—Camp below Painted Cañon.
26.812	No. 116—Camp Big Horn, Black Cañon.
26.813	No. 117—Black Cañon, above Camp 7.
26.814	No. 119—Black Cañon, looking down.
26.815	No. 120—Middle of Black Cañon.
26.816	No. 123—Across Black Cañon, from Camp 8.
26.817	No. 126—Down Black Cañon, from Mirror Bar.
26.818	No. 127—Mohaves caught Napping.
26.819	No. 130—Camp at Crossing of the Colorado.
26.820	No. 131—Maiman, a Mohave Indian.
26.821	No. 132—Nee-chi-qua-ra, a Mohave Indian.
26.822	No. 134—Foot of Grand Cañon, from below.
26.823	No. 135—Melon Cactus.
26.1146	No. 136—Grotto Spring. [Library of Congress notes "University of California, Bancroft Library".]
26.824	No. 137—Tufa Cliff, Grand Cañon.
26.825	No. 138—View across Grand Cañon.
26.826	No. 139—Baptismal Font, Grand Cañon.
26.827	No. 142—Grand Cañon, from opposite Diamond Creek.
26.828	No. 143—Grand Cañon Wall, opposite Diamond Creek.
26.829	No. 144—Mohave Indians; Panambona and Mitiwara.
26.830	No. 145—Grand Cañon, above Grotto Spring.
26.1147	No. 149—Crew of Trilobite. [Library of Congress notes "University of California, Bancroft Library"]
26.1148	No. 150—Crew of the "Picture," at Diamond Creek. [Library of Congress notes "Bibliothèque nationale de France"]

Series: *Colorado River Series* [1872 photographs] (William Bell, photographer)

Cards are identifiable by imprinted black italic type, reading, "Colorado River Series." and "Explorations West of the 100th Meridian. Expedition of 1872, Lieut. Geo. M. Wheeler, Com'dg." Legends printed on recto. [Compare also selected photographic prints in folio (see Wheeler, no date, ITEM NO. 2.6849).]

26.831	No. 38—Headland, Colorado Basin.
26.832	No. 39—Jacob's Pool, Colorado Basin.
26.832	No. 40—Jacob's Pool, Colorado Basin. [Library of Congress notes "Yale Collection of Western Americana".]
26.833	No. 41—Jacob's Pool, Colorado Basin.
26.834	No. 42—Kanab Wash, Colorado Basin.
26.835	No. 43—Kanab Wash, Colorado Basin.
26.836	No. 44—Kanab Wash, Colorado Basin.
26.837	No. 45—Kanab Wash, Colorado Basin.
26.838	No. 46—Kanab Wash, Colorado Basin.
26.839	No. 47—Kanab Wash, Colorado Basin.
26.840	No. 49—Kanab Wash, Colorado Basin.
26.841	No. 50—Kanab Wash, Colorado Basin.
26.842	[51]—Kanab Wash, Colorado Basin. [Photos mounted on card without text.]
26.843	No. 51—The Bath, Kanab Wash.
26.844	No. 52—Kanab Wash, Colorado Basin.
26.845	No. 53—Kanab Wash, Colorado Basin.
26.846	No. 54—The Bath, Kanab Wash.
26.1149	No. 55—The Bath, Kanab Wash.
26.847	No. 56—Mouth of Kanab Wash.
26.848	No. 57—Mouth of the Paria.
26.848	No. 58—Mouth of the Paria. [Library of Congress notes "Collection of Lance Cook".]
26.849	No. 59—Mouth of the Paria.
26.850	No. 60—Grand Cañon of the Colorado.
26.851	No. 61—Grand Cañon of the Colorado.
26.852	No. 62—Grand Cañon of the Colorado.
26.853	No. 63—Grand Cañon of the Colorado.
26.854	No. 64—Grand Cañon, Mouth of Kanab Wash.
26.855	No. 66—Grand Cañon; mouth of Kanab Wash.
26.856	No. 67—Grand Cañon; mouth of Kanab Wash.
26.857	No. 68—Grand Cañon; Sheavwitz Crossing.
26.858	No. 69—Grand Cañon; Sheavwitz Crossing.
26.859	No. 71—Grand Cañon; Sheavwitz Crossing.
26.860	No. 72—Grand Cañon; Sheavwitz Crossing.
26.861	No. 73—Grand Cañon; Sheavwitz Crossing.
26.862	No. 74—Grand Cañon; Sheavwitz Crossing.

26.863 No. 75—Grand Cañon; Sheavwitz Crossing.

26.864 No. 76—Grand Cañon; Sheavwitz Crossing.

26.865 No. 77 [variant 1]—Grand Cañon; Sheavwitz Crossing. [Photo prints display skyline and less of foreground slope.]

26.866 No. 77 [variant 2]—Grand Cañon; Sheavwitz Crossing. [Photo prints omit skyline but display more of foreground slope.]

26.867 No. 78—Grand Cañon; Sheavwitz Crossing.

26.868 No. 79—Grand Cañon; Sheavwitz Crossing.

26.869 No. 80—Grand Cañon, Sheavwitz Crossing.

26.870 No. 81—Grand Cañon, Sheavwitz Crossing.

26.871 No. 83 [variant 1]—Devil's Anvil, Sheavwitz Crossing. [Includes two people seated on the "anvil".] [Library of Congress copy emended by hand, changing the "3" to "2" and also denoting by hand, "82".]

26.872 No. 83 [variant 2]—Devil's Anvil, Sheavwitz Crossing. [No people on the "anvil".]

26.873 No. 84—Plateau of the Grand Cañon.

26.874 No. 85—The Bear, Colorado Plateau.

26.1150 No. 87—Yellow pine, Colorado Plateau.

Series: *Colorado River Series* [1873 photographs] (Timothy H. O'Sullivan, photographer)

Cards are identifiable by imprinted black type, reading, "Colorado River Series." and "Expedition of 1873. 1st Lieut. Geo. M. Wheeler, Corps of Eng'rs, Com'dg." Legends printed on recto.

26.875 No. 26—View across River at the mouth of Paria Creek.

26.876 No. 27—Cañon of the Colorado, 5 miles above the mouth of the Paria.

26.1151 No. 29—Looking down from the mouth of Paria Creek.

Series: *Expedition of 1871* (Timothy H. O'Sullivan, photographer)

Cards are identifiable by imprinted black type, reading, "Expedition of 1871." and "1st Lieut. Geo. M. Wheeler, Corps of Engineers, Commanding." Legends printed on recto with caption, "[Vignette] War Department, Corps of Engineers, U. S. A. Geographical Explorations and Surveys West of the 100th Meridian." [Compare also selected photographic prints in folio (see Wheeler, no date, ITEM NO. 2.6848).]

26.1152 No. 1. The start from Camp Mojave, Arizona, September 15th, 1871. Boat Expedition under Lieutenant Wheeler, the first and only one to ascend the Colorado through the Grand Cañon to mouth of Diamond Creek. Distance travelled, 260 miles in 31 days, the boats often having to be portaged around rapids and drawn over rocks.

26.1153 No. 2. View across Black Cañon. The grand walls in perspective.

26.1154 No. 3. View down Black Cañon, from Mirror Bar. The walls repeated by reflection.

26.1155 No. 4. Grotto Spring, Grand Cañon, Colorado River. The water flows from the rocks above, and the umbrella-shaped rock about it is tufa, that has been formed by deposition from the mineral constituents of the water. The light spot seen through and beyond is the sand-beach of the river. Looking through this Grotto is seen in the distance the walls of the Grand Cañon, 3,500 feet in height on either side.

26.1156 No. 5. Types of Mojave Indians. This tribe inhabits the region of the lower Colorado, or western Arizona. Physically they are the finest specimens in all the west, many of the males attaining to the height of 6 feet.

26.1157 No. 6. View of Grand Cañon Walls, near mouth of Diamond River. From water line to first shelf 1,500 feet; from shelf to top of table, 3,500 feet. Distance from point of view to top of walls, 3 miles.

26.1158 No. 7. Mountain transportation. Pack mule, Pack and Packers.

26.877 [128] Black Cañon of the Colorado River.

26.878 [170] Head of Black Cañon, Colorado River.

Series: ***Expedition of 1872*** (William Bell, photographer)

Cards are identifiable by imprinted black type, reading, "Expedition of 1872." and "1st Lieut. Geo. M. Wheeler, Corps of Engineers, Commanding." Legends printed on recto with caption, "[Vignette] War Department, Corps of Engineers, U. S. A. Geographical Explorations and Surveys West of the 100th Meridian." [Compare also selected photographic prints in folio (see Wheeler, no date, ITEM NO. 2.6849).]

26.1159 No. 8. The Cañon of Kanab Creek, near its junction with the Grand Cañon of the Colorado. In the foreground is a dripping spring affording a shower bath. Temperature, 69° Fahr.

26.1160 No. 9. "The Bath," a dripping spring in Kanab Cañon. Temperature, 69° Fahr.

26.1161 No. 10. The Mouth of Kanab Creek. The beds of the Colorado River and its tributary here lie in gorges cut by the running water to the depth of about 3,500 feet below the general surface of the country. The highest point seen in the picture is 2,500 feet above the water, and the walls are here too steep to be scaled.

26.879 No. 11. Mouth of the Paria, Colorado River; walls 2,100 feet in height.

26.1162 No. 12. View in the Grand Cañon of the Colorado River.

26.1163 No. 13. Marble Cañon, one of the gorges of the Colorado here, 1,200 feet deep. The steep cliff is gray limestone and the slope below a brilliant red sandstone.

26.1164 No. 14. The northern wall of the Grand Cañon of the Colorado, near the foot of To-ro-weap valley. The rounded rocks of the foreground are sand-stone.

26.1165 No. 15. The "Vermillion Cliff," a typical plateau edge, as seen from Jacobs Pool, Arizona. From its top a plateau stretches to the right, and from its base another to the left. Their difference of level is 1,500 feet, and the step is too steep for scaling.

26.880 [61] View in the Grand Cañon of the Colorado.

Series: ***Geological Series*** (William Bell, photographer)

Cards are identifiable by imprinted black italic type, reading, "Geological Series." and "Explorations West of the 100th Meridian. Expedition of 1872, Lieut. Geo. M. Wheeler, Com'dg." Legends printed on recto.

26.881 No. 101. Colorado River, above the Paria.

26.882 No. 102. Colorado River, below the Paria.

26.883 No. 103. Colorado River, below the Paria.

26.1166 No. 104. Chocolate Butte; mouth of the Paria.

26.884 No. 105. Grand Cañon of the Colorado.

26.1167 No. 106. Grand Cañon of the Colorado.

26.1168 No. 107. Grand Cañon of the Colorado.

26.1169 No. 108. Sand Sculpture, Grand Cañon.

26.1170 No. 109. Lava Cone, Devil’s Hole, Arizona.

26.1171 No. 110. Perched Rock, Rocker Creek, Arizona.

26.1172 No. 111. Chocolate Mesa, Rocker Creek, Arizona.

26.1173 No. 112. Vermilion Mesa, Rocker Creek, Arizona.

26.885 No. 113. Vermilion Mesa, Jacob’s Pool, Arizona.

26.1174 No. 114. Kanab Wash, Colorado Basin.

26.1175 No. 115. Kanab Wash, Colorado Basin.

26.1176 No. 116. Tufa Bank, Kanab Wash.

26.1177 No. 118. Limestone Walls, Kanab Wash.

26.1178 No. 119. Weathered Sandstone, Kanab Wash.

26.1179 No. 120. Weathered Sandstone, Kanab Wash.

Stereographs from Lieutenant George M. Wheeler's Western Survey, 1871 through 1873
Published 1874-1875

This is a separate listing from the Library of Congress, in turn based principally upon originals held by the U.S. National Archives and Records Administration (https://www.loc.gov/rr/print/coll/western_survey/list5.html). As noted there: “A set of one hundred stereographs was published in 1874-1875 on official War Department mounts. The list below includes Timothy H. O'Sullivan's views from 1871 and 1873 and William Bell's stereographs from 1872. Titles are transcribed here exactly as printed on the mounts. The stereographs are albumen silver prints on four-by-seven-inch mounts. Unless noted, all of the stereographs listed are from the collection of the National Archives and Records Administration.” Only those views that relate to the areas covered by this bibliography appear in the lists below, arranged by photographer. Parenthetical “Identification Numbers” (prefix “F.”) are as noted in the Library of Congress list (these numbers do not appear as part of the verso legends).

The verso of these stereographs are printed in red ink with the seal and identification: ”War Department Corps of Engineers, U. S. Army Geographical and Geological Explorations and Surveys West of the 100th Meridian.” A paper slip is affixed beneath, with the view number, photographer’s name, and legend printed in black ink.

1871. Timothy O’Sullivan, photographer

26.1180 No. 1. The Start from Camp Mojave, Arizona, September 15, 1871. Boat expedition under Lieutenant Wheeler, the first and only one to ascend the Colorado through the Grand Cañon to mouth of Diamond Creek. Distance traveled 260 miles in 31 days, the boats often having to be portaged around rapids and drawn over rocks. (F. 111.)

26.1181 No. 2. Nee-chi-qua-ra, a good specimen of the Mohave type. (F. 132.)

26.1182 No. 3. Camp in Painted Cañon, Colorado River. Here a halt was made to repair boats, &c., and prepare for the further ascent through the Black and Grand Cañons. (F. 114.)

26.1183 No. 4. First halt within the Black Cañon. Walls 1,500 feet. (F. 116.)

26.1184 No. 5. Snug Harbor, Black Cañon. Halt for the night. (F. 117.)

26.1185 No. 6. Light and Shadow, Black Cañon; walls about 1,700 feet in height. At water-line the sky was hardly visible, except near middle of the stream. Width of river not more than 300 feet. The river seldom wider than 400 feet. (F. 119.)

26.1186 No. 7. Middle of Black Cañon, looking down stream. Walls from 800 to 1,200 feet. At this point silence reigns supreme. No ripple of the water, no sound of bird or breeze, and naught to disturb the solemnity and impressiveness of the scene. (F. 120.)

26.1187 No. 8. View across Black Cañon. The grand walls in perspective. (F. 123.)

26.1188 No. 9. View down Black Cañon from Mirror Bar. The walls repeated by reflection. (F. 126.)

26.1189 No. 10. Mojave Indians caught napping. The first opportunity to get pictures of them, owing to a superstitious fear of the camera. The weather was quite warm, as may be inferred from the lack of covering. (The geologist in the background pondering whether the specimens before him are pliocene or eocene, but concludes that they are "carboniferous.") (F. 127.)

26.1190 No. 11. Melon Cactus, (Cereus ctenoides,) 3 feet in height and 16 inches in diameter. Found quite numerous in this locality, in company with the (Echino-cactus lecontei.) The thorns of the latter are hook-shaped, and woe betide the man that comes in contact with it. It seems to thrive best among volcanic rocks. (F. 135.)

26.1191 No. 12. Camp at the crossing of the Colorado, just below the mouth of the Grand Cañon. At this point two divisions of the expedition, operating in the country north of the river, met the boat party, and were transferred by it to the opposite shore. (F. 130.)

26.1192 No. 13. Triangulation station, near the mouth of the Grand Cañon, Colorado River. (F. 134.)

26.1193 No. 14. Grotto Spring, Grand Cañon, Colorado River. The water flows from the rocks above, and the umbrella-shaped rock about it is tufa, that has been formed by deposition from the mineral constituents of the water. The light spot seen through and beyond is the sand-beach of the river. Looking through this grotto is seen in the distance the walls of the Grand Cañon, 3,500 feet in height on either side. (F. 136.)

26.1194 No. 15. View in the Grand Cañon of the Colorado. Characteristic walls 5,000 feet in height. (F. 145.)

26.1195 No. 16. Maiman, a Mohave Indian, guide and interpreter during a portion of the season in the Colorado country. He afterward assisted in tracing out the Indian band, some of whose members were engaged in the Wickenburg stage massacre, where young Loring was killed. (F. 131.)

26.1196 No. 17. Baptismal Font, about 6 miles above mouth of the Grand Cañon. (F. 139.)

26.1197 No. 18. View across Grand Cañon, from Grotto Spring. (F. 138.)

26.1198 No. 19. Grand Cañon, junction of Diamond and Colorado Rivers. From the mouth of the Grand Cañon to this point, 63 miles. This is the first practicable crossing from the Grand Cañon. Walls about 5,000 feet; width of river about 400 feet. (F. 142.)

26.1199 No. 20. View of Grand Cañon walls near mouth of Diamond River. From water-line to first shelf, 1,500 feet; from shelf to top of table, 3,500 feet. Distance from point of view to top of walls, 3 miles. (F. 143.)

26.1200 No. 21. Types of Mohave Indians. This tribe inhabits the region of the lower Colorado, or Western Arizona. Physically they are the finest specimens in all the West, many of the males attaining the height of 6 feet. (F. 144.)

26.1201 No. 22. Fred. W. Loring, in his campaign costume, with his mule "Evil Merodach." Taken about 48 hours before he was brutally murdered by Apache Mohaves, while en-route from Prescott, A. T., to San Bernardino, Cal., by stage. Loring had been with the expedition as general assistant and correspondent, and was returning to the East with a mind stored with rare adventure and scenic wonders. It has been said of him that he gave promise of becoming one of the most facile of American literary writers. (F. 153.)

1872. William Bell, photographer

26.1202 No. 10. Near Jacob's Pool, in northern Arizona. The cliff in the background is 1,500 feet high, the steep part being of red Triassic sandstone, and the base of soft clay, which shows in the foreground. In this spot is one of the homes of John D. Lee, whose name has been connected with the Mountain Meadow massacre. (F. 40.)

26.1203 No. 11. The “Vermilion Cliff,” a typical plateau edge as seen from Jacob's Pool, Arizona. From its top a plateau stretches to the right, and from its base another to the left. Their difference of level is 1,500 feet, and the step is too steep for scaling. (F. 113.)

26.1204 No. 12. A perched block of sandstone, which is being gradually undermined by the action of sand and wind. (F. 110.) [Library of Congress notes University of California, Bancroft Library.]

26.1205 No. 13. “The Bear,” a mass of sandstone, fallen from the cliffs, near the mouth of the Paria. (F. 85.)

26.1206 No. 14. The Cañon of Kanab Creek, near its junction with the Grand Cañon of the Colorado. In the foreground is a dripping spring, affording a shower-bath. Temperature, 69° Fahr. (F. 54.)

26.1207 No. 15. “The Bath,” a dripping spring in Kanab Cañon. Temperature, 69° Fahr. (F. 55.)

26.1208 No. 16. The Cañon of Kanab Creek, near its junction with the Grand Cañon of the Colorado River. The walls are of limestone and about 2,500 feet in height. (F. 46.)

26.1209 No. 17. The Cañon of Kanab Creek, near where it joins the Grand Cañon of the Colorado. The walls are of limestone and about 2,500 feet in height. (F. 44.)

26.1210 No. 18. The Cañon of Kanab Creek, near where it joins the Grand Cañon of the Colorado. The walls are of limestone and about 2,000 feet in height. (F. 45.)

26.1211 No. 19. The Cañon of Kanab Creek, near where it joins the Grand Cañon of the Colorado. The walls are of limestone and about 2,500 feet in height. (F. 47.)

26.1212 No. 20. The Cañon of Kanab Creek, near where it joins the Grand Cañon of the Colorado. The walls are of limestone and about 2,500 feet in height (F. 53.)

26.1213 No. 21. The cañon of Kanab Creek, near where it joins the Grand Cañon of the Colorado. The walls are of limestone and about 2,500 feet in height. (F. 118.)

26.1214 No. 22. The mouth of Kanab Creek. The beds of the Colorado River and its tributary here lie in gorges cut by the running water to a depth of about 3,500 feet below the general surface of the country. The highest point seen in the picture is 2,500 feet above the water, and the walls are here too steep to be scaled. (F. 56.)

26.1215 No. 23. Sand sculpture. The limestone boulders which lie in the bed of the Colorado River are carved and polished by the sand which the running water carries. (F. 108.)

26.1216 No. 24. Grand Cañon, mouth of Kanab Wash. Walls 1,800 feet in height. (F. 67.)

26.1217 No. 25. The Grand Cañon of the Colorado, near the mouth of Kanab Creek. The river has here cut its channel about 3,500 feet below the general level of the country. (F. 64.)

26.1218 No. 26. Yellow Pine, (Pinus ponderosa, Doug.,) the timber-tree of the high plateaus in Utah, Arizona, and New Mexico. (F. 87.)

26.1219 No. 27. Colorado River, above the mouth of the Paria. Walls 2,100 feet in height. (F. 101.)

26.1220 No. 28. Marble Cañon, one of the gorges of the Colorado, here 1,200 feet deep. The steep cliff is gray limestone and the slope below a brilliant red sandstone. (F. 62.)

26.1221 No. 29. Marble Cañon, one of the gorges of the Colorado, here 1,200 feet deep. The steep cliff is gray limestone and the slope below a brilliant red sandstone. (F. 102.)

26.1222 No. 30. Marble Cañon, one of the gorges of the Colorado, here 1,200 feet deep. The steep cliff is gray limestone and the slope below a brilliant red sandstone. (F. 103.)

26.1223 No. 31. Devil's Anvil, near foot of To-ro-weap Valley. River 3,000 feet below. (F. 82.)

26.1224 No. 32. The northern wall of the Grand Cañon of the Colorado, near the foot of To-ro-weap Valley. The rounded rocks in the foreground are sandstone. (F. 80.)

26.1225 No. 33. The northern wall of the Grand Cañon of the Colorado, near the foot of To-ro-weap Valley. The rounded rocks of the foreground are sandstone. (F. 105.)

26.1226 No. 34. The Grand Cañon of the Colorado, near the foot of To-ro-weap Valley. River 3,000 feet below. (F. 106.)

26.1227 No. 35. The Grand Cañon of the Colorado, near the foot of To-ro-weap Valley. A view of the south wall of the gorge, as seen from the opposite side. (F. 79.)

26.1228 No. 36. The Grand Cañon of the Colorado, near the foot of To-ro-weap Valley; river 3,000 feet below. (F. 73.)

26.1229 No. 37. The Grand Cañon of the Colorado, near the foot of To-ro-weap Valley. A view of the south wall of the gorge, as seen from the opposite bank. (F. 77.)

26.1230 No. 38. The Grand Cañon of the Colorado, near the foot of To-ro-weap Valley. A view of the south wall of the gorge, as seen from the opposite wall. (F. 81.)

26.1231 No. 39. Grand Cañon, foot of To-ro-weap Valley. (F. 68.)

Stereographs from Lieutenant George M. Wheeler's Western Survey 1871 through 1874
Published 1875-1876

This is a separate listing from the Library of Congress (https://www.loc.gov/rr/print/coll/western_survey/list6.html). As noted there: "This set of fifty stereographs was published on official War Department mounts. The set includes Timothy O'Sullivan's views from 1871, 1873, and 1874 and William Bell's stereographs from 1872. Titles are transcribed here exactly as printed on the mounts. The stereographs are albumen silver prints on four-by-seven-inch mounts. All are from the collections of the Library of Congress." The online list includes hyperlinks that redirect the user to digitized views of the stereographs. Only those views that relate to the areas covered by this bibliography appear in the lists below, arranged by photographer.

The verso of these stereographs are printed in red ink with the seal and identification: "War Department, Corps of Engineers, U. S. A. Geographical Explorations and Surveys West of the 100th Meridian." The view number, photographer's name, and legend are printed beneath, also in red ink.

1871. Timothy O'Sullivan, photographer

26.1232 No. 1. The start from Camp Mojave, Arizona, September 15th, 1871. Boat Expedition under Lieutenant Wheeler, the first and only one to ascend the Colorado through the Grand Cañon to mouth of Diamond Creek. Distance travelled, 260 miles in 31 days, the boats often having to be portaged around rapids and drawn over rocks.

26.1233 No. 2. View across Black Cañon. The grand walls in perspective.

26.1234 No. 3. View down Black Cañon, from Mirror Bar. The walls repeated by reflection.

26.1235 No. 4. Grotto Spring, Grand Cañon, Colorado River. The water flows from the rocks above, and the umbrella-shaped rock about it is tufa, that has been formed by deposition from the mineral constituents of the water. The light spot seen through and beyond is the sand-beach of the river. Looking through this Grotto is seen in the distance the walls of the Grand Cañon, 3,500 feet in height on either side.

26.1236 No. 5. Types of Mojave Indians. This tribe inhabits the region of the lower Colorado, or western Arizona. Physically they are the finest specimens in all the west, many of the males attaining to the height of 6 feet.

26.1237 No. 6. View of Grand Cañon Walls, near mouth of Diamond River. From water line to first shelf 1,500 feet; from shelf to top of table, 3,500 feet. Distance from point of view to top of walls, 3 miles.

26.1238 No. 7. Mountain transportation. Pack mule, Pack and Packers.

1872. William Bell, photographer

26.1239 No. 8. The Cañon of Kanab Creek, near its junction with the Grand Cañon of the Colorado. In the foreground is a dripping spring affording a shower bath. Temperature, 69° Fahr.

26.1240 No. 9. "The Bath," a dripping spring in Kanab Cañon. Temperature, 69° Fahr.

26.1241 No. 10. The Mouth of Kanab Creek. The beds of the Colorado River and its tributary here lie in gorges cut by the running water to the depth of about 3,500 feet below the general surface of the country. The highest point seen in the picture is 2,500 feet above the water, and the walls are here too steep to be scaled.

26.1242 No. 11. Mouth of the Paria, Colorado River; walls 2,100 feet in height.

26.1243 No. 12. View in the Grand Cañon of the Colorado River.

26.1244 No. 13. Marble Cañon, one of the gorges of the Colorado here, 1,200 feet deep. The steep cliff is gray limestone and the slope below a brilliant red sandstone.

26.1245 No. 14. The northern wall of the Grand Cañon of the Colorado, near the foot of To-ro-weap valley. The rounded rocks of the foreground are sand-stone.

26.1246 No. 15. The "Vermillion Cliff," a typical plateau edge, as seen from Jacobs Pool, Arizona. From its top a plateau stretches to the right, and from its base another to the left. Their difference of level is 1,500 feet, and the step is too steep for scaling.

Stereographs from Lieutenant George M. Wheeler's Western Survey 1871 through 1874
Published 1875-1876

This is a separate listing from the Library of Congress

(https://www.loc.gov/rr/print/coll/western_survey/list7.html). As noted there: "These stereographs include views from Wheeler's expeditions from 1871 to 1874. Titles are transcribed here exactly as printed on the mounts. The stereographs are albumen silver prints on four-by-seven-inch mounts. All of the stereographs listed here are from the collections of the Library of Congress, unless noted." The online list includes hyperlinks that redirect the user to digitized views of the stereographs. Only those views that relate to the areas covered by this bibliography appear in the lists below, arranged by photographer, with legends in alphabetical order.

These cards can be identified by the printed recto legends, left and right, "U.S. Geographical Surveys West of 100th Meridian." and "1st Lieut. Geo. M. Wheeler, Corps of Engineers, in Charge." The legends are printed on recto bottom center.

1871. Timothy O'Sullivan, photographer.

26.1247 Black Cañon of the Colorado River.

26.1248 Boat Crew of the "Picture" at Diamond Creek.

26.1249 Boat Crew of the "Trilobite" at Diamond Creek.

26.1250 Halt below mouth of Painted Cañon, Colorado River.

26.1251 Head of Black Cañon, Colorado River.

1872. William Bell, photographer.

J. W. Powell – A. H. Thompson

U.S. Geographical and Topographical Survey of the Colorado River of the West

U.S. Geographical and Topographical Survey of the Rocky Mountain Region

[Powell Survey]

This list was compiled primarily from the holdings of the Library of Congress. The photos were produced during the 1872-1873 Powell Expedition on the Colorado River. Information is as provided by the Library of Congress except where otherwise seen by Spamer.

Individual Stereographs Imprinted with Red Stylistic J. W. Powell–A. H. Thompson Banners
John K. Hillers, photographer

Cards are identifiable by their yellow borders imprinted in red with stylistic banners on the left and right sides, reading, "U.S. Geological and Topographical Survey of the Colorado River of the West" and "by J. W. Powell and A. H. Thompson" (see examples illustrated at the beginning of this Appendix). Some cards may display the imprints "upside-down", indicating only that the card stock was turned 180° when the photos were mounted.

26.1014	[No. ?] Cataract in a Cleft. [Verso label (torn) indicates "Grand Cañon Series", but recto does not employ the "Grand Canyon Series" imprint (see below). Copy seen also includes the label of a seller, H. Ropes & Co., New York.]
26.898	No. 67. The Redbud. [Verso notation: "Kanab".]
26.899	No. 69. Midway in the Cañon. [Verso notation: "Kanab".]
26.900	No. 75. In the depths of the Cañon. [Verso notation: "Kanab".]
26.901	No. 188. Cliff at the Junction of the Little Colorado. [Verso notation: "Grand".]
26.902	No. 197. A Fall. [Library of Congress adds: "On back of National Archives label: 8. Repairing boats at the foot of Granite Rapid, Grand Canyon, September 1, 1892 [*sic*]. F. S. Dellenbaugh on left; other unidentified. Dana Butte in center Distance."]
26.903	No. 203. Walls of Lime Stone. [Verso notation: "Grand".] [*NOTE*: Another stereograph of this view in the New York Public Library has a verso sticker, "Published by J. F. Jarvis No. 1427 F Street Washington, D. C."]
26.904	No. 206. Tower on the Wall.
26.905	No. 215. Rapid at Mouth of Kanab. [Verso notation: "Grand".]
26.906	No. 222. The Basin. [Verso notation: "Grand".]
26.907	No. 225. The Poised Rock. [Verso notation: "Grand".]
26.908	No. 232. Wi-gahm A-nah-ka-rear. [Verso notation: "Grand".]
26.909	No. 235. Side Canon. [Verso notation: "Grand".]

26.910 No. 255. To-wam Pi-kah-vu. [Verso notation: “Grand”.]

Individual Stereographs with Plain Yellow Borders
John K. Hillers, photographer

26.911 No. 46. Choked with boulders. [Verso sticker indicates “Department of the Interior, U.S. Geological and Geographical Survey of the Rocky Mountain Region, J. W. Powell, Geologist in charge. Views on Kanab Creek.” Not listed with the Kanab Creek Series of stereoviews because it does not employ the recto imprinting of that series (see below).]

26.912 No. 50. A little vegetation. [Verso notation: “Grand”.]

26.913 No. 56. Side Gulch. [Verso notation: “Grand”.] [View is on Colorado River.]

26.914 No. 58. Craggy Wall. [Verso sticker indicates “Department of the Interior, U.S. Geological and Geographical Survey of the Rocky Mountain Region, J. W. Powell, Geologist in charge. Views on Kanab Creek.” Not listed with the Kanab Creek Series of stereoviews because it does not employ the recto imprinting of that series (see below).]

26.915 No. 63. Broken Wall. [Verso sticker indicates “Department of the Interior, U.S. Geological and Geographical Survey of the Rocky Mountain Region, J. W. Powell, Geologist in charge. Views on Kanab Creek.” Not listed with the Kanab Creek Series of stereoviews because it does not employ the recto imprinting of that series (see below).]

26.916 No. 64. Near the head of the Cañon. [Verso notation: “Kanab”.]

26.917 No. 65. Looking up the cañon. [Verso sticker indicates “Department of the Interior, U.S. Geological and Geographical Survey of the Rocky Mountain Region, J. W. Powell, Geologist in charge. Views on Kanab Creek.” Not listed with the Kanab Creek Series of stereoviews because it does not employ the recto imprinting of that series (see below).]

26.918 No. 66. Feretted walls. [Verso notation: “Kanab”.]

26.919 No. 68. A cactus flood plain. [Verso notation: “Kanab”.]

26.920 No. 72. View from a terrace. [Verso notation: “Kanab”.]

26.921 No. 181. The Cañon at Noon. [Verso sticker indicates “Views on the Colorado River. Marble Cañon Series.” Not listed with the Marble Cañon Series of stereoviews because it does not employ the recto imprinting of that series (see below).]
[*NOTE*: This photo is an often-reproduced view in Marble Canyon, depicting two boats tied to shore.]

26.922 No. 189. Boulders. [Verso notation: “Grand”.]

26.923 No. 190. The Boat.
[*NOTE*: This photo is an often-reproduced view of Powell’s boat with chair and life preserver.]

26.924 No. 193. Head of Grand Canon.

26.925 No. 198. Granite buttresses. [Verso notation: “Grand”.]

26.926 No. 201. Cliffs.

26.927 No. 205. Kaibab Plateau in the distance. [Verso notation: “Grand”.]

26.928 No. 207. Unconformable rocks. [Verso notation: “Grand”.]
[*NOTE*: Library of Congress misidentifies the handwritten title on verso as “Uncomfortable rocks”! (https://www.loc.gov/item/2006675027/)] [This view also shows a man reclined (uncomfortably) on the rocks; and near him is the chair used by John Wesley Powell, ashore. (See Nos. 181, 190 for more famous views of the chair on one of the boats.)]

26.929 No. 218. Lava slope. [Verso notation: “Grand”.]

26.930 No. 220. The cañon seen from the foot of Toro’wip Valley. [Verso annotation emended: “The cañon seen from the foot of Toroweep Valley”, and “Grand Canyon”.]

Series: *Marble Cañon*
John K. Hillers, photographer

Cards are identifiable by their yellow borders, imprinted in red conventional type on left and right sides, reading, "Marble Cañon" and "U. S. Geographical and Topographical Survey of the Colorado River, of the West. By J. W. Powell and A. H. Thompson."

26.931 No. 179. Leaning Tower.

26.932 No. 182. Mirror Bayow.

26.933 No. 183. The Shadow.

26.934 No. 186. Cliff between Marble Cañon and Side Cañon.

26.935 No. 187. Cliff at the junction of the Little Colorado.

Series: *Grand Cañon*
John K. Hillers, photographer

Cards are identifiable by their yellow borders, imprinted in red conventional type on left and right sides, reading, "Grand Cañon" and "U. S. Geographical and Topographical Survey of the Colorado River, of the West. By J. W. Powell and A. H. Thompson."

26.936 No. 212. Nearer View of the Falls in Side Gulch.

Series: *Kanab Cañon*
John K. Hillers, photographer

Cards are identifiable by their yellow borders, imprinted in red conventional type on left and right sides, reading, "Kanab Cañon" and "U. S. Geographical and Topographical Survey of the Colorado River, of the West. By J. W. Powell and A. H. Thompson."

26.937 No. 70. View Down the Canon.

26.938 No. 71. Blocks of Marble.

26.939 No. 78. Near the Mouth of the Cañon.

26.940 No. 230. The Grand Cañon from To-ro-wip Valley Looking Down. [Verso annotation.]
[*NOTE*: Library of Congress catalogs this title as "Kanab Cañon", apparently from the recto title, even though in all other instances among the Hillers stereoviews cited herein the verso annotation is used for the title.]

Series: *The Keystone Eye Comfort and Depth-Perception Series*

This is a specialized set for professional optomological use, produced by the Keyestone Stereoscopic Service of the Keystone View Company. Cards are identifiable by their black boards with pale blue printing on recto and verso. The stereoscopic views, positioned within conventionally sized and shaped view areas, comprise a small stereo pair centered in the top half of the two conventional frames, and a small stereopair positioned at the lower-right and lower-left of the left- and right-hand conventional frames. The left-hand photographs include a vertical white line in the view; the right-hand photographs a horizontal white line. The verso text elaborates, "for the Development of Comfortable Vision and a High Degree of Depth Perception". Undated.

26.1016 C. 8— 32936 Fusing the upper pictures require 5½ prism diopters of Convergence. Changing Fixation from upper to lower pictures require an additional 17½ prism diopters of Positive Fusional Convergence, a total of 23 prism diopters. [The top pair of photographs on this card depict a man seated on the rim of the eastern portion of Grand Canyon. The bottom pair of photographs depict an Oriental woman with burden basket.]

26.1110 107 Limestone formations, Mooney Falls, Cataract Canon.

Underwood & Underwood

New York, London, Toronto, and Ottawa (Kansas)

Boxed Sets

NO DATE 26.980 *Stereoscopic views : Grand Canyon of Arizona on the Santa Fe.* New York [etc.]: Underwood and Underwood. [*Ca.* 1910.] [Stereographs in velvet-lined box with views copyright 1908, depicting scenes in the Southwest. Ten of the views are from the Underwood & Underwood Grand Canyon set (1904, ITEM NO. 26.641), with other individual views of the canyon as well.]

NO DATE 26.1300 *Grand Canyon, Arizona.* New York and London: Underwood and Underwood. [Title from box spine. Boxed set of 100 stereographs mostly of the Grand Canyon and vicinity. Stereographs copyright 1903.] [As described in Back of Beyond Books and Walkabout Books, *Our national parks : books, photographs, and ephemera* (no date, ITEM NO. 1.358), p. 64: "Stereoviews are in b&w and mounted on a grey card; all have publisher's imprint, title and number on front of card and about half have detailed descriptions on verso. [. . .] The brown box is made to look like two books and has a gilt title on both spines. [. . .] This set . . . is seemingly the combination of two or more series by the publishers, likely the Grand Canyon and a southwest series . . . . Most images depict visitors at the Grand Canyon, perched precariously on the rim, hiking or riding mules down the streep trails, relaxing near the Colorado River, along with about 20 images from the Hopi Reservation in Arizona, and a few from Walnut Canyon, Petrified Forest, and copper mines in Metcalf, Arizona."]

1904 26.641 *The Grand Cañon of Arizona : through the stereoscope : the Underwood patent map system combined with eighteen original stereoscopic photographs.* New York, London, Ottawa (Kansas), San Francisco, Toronto, and Bombay: Underwood and Underwood, 18 stereoviews in slipcase, text 64 pp. with 2 maps (map 2 is fold-out). (Box spine embossed: [ornamental rule] / [lamp vignette] / [ornamental rule] / *GRAND CANYON* / *Arizona* / [ornamental rule] / [lamp vignette / [ornamental rule] / *UNDERWOOD* / *AND* / *UNDERWOOD* / [ornamental rule].) [1904, 1906, 1908 eds. have been noted.] [Box variants noted: boxes with gilt or silver stamping; text booklet either clothbound or in wraps.] [*NOTE*: The separately bound text, edited by Frederick S. Dellenbaugh (not credited, 1904, ITEM NO. 2.2316; credited, no date [1906-1908] ITEM NO. 2.26910), accompanies the boxed set of stereoscopic views. Its fold-out map of Grand Canyon delimits with overprinting the direction and breadth of view for each stereoview. (Thus far one dust jacket has been seen with a clothbound text, but which may have been custom-made, thus dust jackets for clothbound texts are not likely a publisher's production [*fide* Dan Cassidy, Five Quail Books].)] [*NOTE*: Several points distinguish the 1904 and undated eds. of the accompanying booklet; see the entries under Dellenbaugh as just cited.]

≡ CROSS-LISTINGS |CITED» GCNHA Monograph 2: page 28| |CITED» GCNHA Monograph 8: pages 1-47, 12-20| FQ7:58 [1908] FQ8:105 [1908] FQ10:348 [1908] FQ11:413A [set], 413B [views only] [both 1908] FQ11A:139 [set, 1908] FQ12B:256A [set], 256B [views only] [both 1908] FQ23:534 [set] FQ24/1:586A [set, 1906], 586B [set, 1908, booklet clothbound], 586C [set, 1908] FQ25:2 [set, 1908] FQ30:88 [set, 1908], 89 [set, 1906] FQ31:1 [set, text lacks fold-out map] FQ32:83A [1906], 83B [1908] Guidon 164 [booklet only; 1908]

NOTE regarding the Grand Canyon boxed set [ITEM NO. 26.641]: Because these boxed Underwood & Underwood Grand Canyon stereoviews are now often found for sale individually, the separate view cards from this set are cited separately *(below)* so as to delineate their subjects and to facilitate identification. Note that not all views in the set are of the Grand Canyon. Each card measures 7 × 3½ inches with two photographic stereo prints (by convention arch-cut on their top margins) 3 inches wide × 3⅛ inches tall (measured with the curve of the card). Each card is enumerated; some with a number printed at center top between the two images, all with the number prefixed parenthetically to the legend at lower-right of card. Those without a number at top indicate at lower-right "Copyright [wide space] 1903 by Underwood & Underwood." (although No. 2 does not have the wide space); those with numbers indicate "Copyright Underwood & Underwood." (The differences likely reflect different production runs.) The left side of the card is printed in script, "Underwood & Underwood, Publishers. New York, London, Toronto-Canada, Ottawa-Kansas"; the right side is printed in script, "Works and [sunburst vignette] Studios~ Arlington, N.J. Westwood, N.J." (the sunburst vignette is centered, with text centered within: "SUN SCULPTURE / [Underwood & Underwood logo] / TRADE MARK").] The verso of each card contains at the bottom a repetition of the photo legend in English, French, German, Spanish, Swedish, and Russian; these may be foreshortened from the recto legend or may be more complete depending on typographical space considerations on both recto and verso. The main part of the verso contains a descriptive text (in English) pertaining to the scene, with references for additional reading; some with credit, "From Notes of Travel, No. 6, copyrighted, 1904, by Underwood & Underwood." The verso descriptive text differs from the pertinent scene descriptions in the accompanying booklet (pp. 32-62).]

26.753 (1)—6072—A Wonder to the primitive inhabitants—Santa Fe Train crossing Cañon Diablo, Arizona.

26.754 (2)—6073—From Red to San Francisco Mountain—a woody wilderness in Arizona.

26.755 (3)—6074—Blown asunder by volcanic energies—Red Mountain, an extinct volcano, northwestern Arizona.

26.756 (4)—6075—Labyrinthine ways through the lava ash formation, Red Mountain Crater, Arizona.

26.757 (5)—6076—"The sinuous Colorado, yellow as the Tiber"—Grand Cañon, Arizona.

26.758 (6)—6077—Among the Buttes. Red Cañon Trail, Grand Cañon of Arizona.

26.759 (7)—6078—Fathoming the depth of a vanished sea—Grand Cañon of Arizona, from Hance's Cove.

26.760 (8)—6079—Descending into Grand View Trail, by a short, steep mining path, Grand Cañon of Arizona.

26.761 (9)—6080—Dendritic stalagmites in a limestone cave, Grand Cañon of Arizona.

26.762 (10)—6081—Angel's Gateway and Newberry Terrace from Cottonwood Spring, Grand Cañon of Arizona.

26.763 (11)—6082—Beside the Colorado—looking up to Zoroaster Tower from Pipe Creek, Grand Cañon of Arizona.

26.764 (12)—6083—Down the Granite Gorge of the Colorado (1200 ft. deep) from Pyrites Point, Grand Cañon of Ariz.

26.765 (13)—6084—Prospecting for gold, Indian Gardens, Grand Cañon of Arizona.

26.766 (14)—6085—Rounding Cape Horn on the Bright Angel Trail, Grand Cañon of Arizona.

26.767 (15)—6086—Thos. Moran, America's great scenic artist, sketching at Bright Angel Cove, Arizona.

26.768 (16)—6087—"Over all broods a solemn silence"—sunset at O'Neill's Point, Grand Cañon of Arizona.

26.769 (17)–6088—Overlooking Nature's greatest Amphitheatre—from Rowe's Point, N. W.—Grand Cañon of Arizona.

26.770 (18)—6089—On the brink, one mile above the River—Grand Cañon of Arizona—W. from Rowe's Point.

PART 26. AUDIO-VISUAL WORKS AND PHOTOGRAPHIC PUBLICATIONS ON THE GRAND CANYON AND LOWER COLORADO RIVER REGIONS

APPENDIX 2. GENERAL GUIDE TO COMMERCIALLY AND GOVERNMENTALLY PRODUCED STEREOGRAPHS

Individual Stereographs

Other, individual Underwood & Underwood Grand Canyon stereographs that have been identified for this bibliography are listed below. Some of the Grand Canyon boxed views are repeated, although note that there is a slight variation in the legend and the absence of the prefixed parenthetical numbers, which will distinguish the boxed-set stereographs from individually offered cards. Those that do have prefixed parenthetical numbers greater than 18 may have been included in other boxed sets, but which are not identified here.

The individual cards listed here have been identified chiefly from the collections of the Library of Congress (https://www.loc.gov/collections/stereograph-cards/) and the New York Public Library (https://digitalcollections.nypl.org/collections/robert-n-dennis-collection-of-stereoscopic-views#/) (URLs last accessed January 1, 2019). Corrections to some of the catalogued entries have been made here.

26.981 (37) Fathoming the depth of a vanished sea—Grand Canon of Arizona from Hance's Cove. Copyright 1903.

26.982 (38) Beside the Colorado—looking up to Zoroaster Tower from Pipe Creek, Grand Canon of Arizona. Copyright 1903.

26.983 9481. Hotel El Tovar, Grand Canyon, Arizona. Copyright 1907.

26.984 9482. The ladies' sitting-room in the hospitable Hotel El Tovar, Grand Canyon, Arizona. Copyright 1907.

26.985 A mighty red rift in the Earth—Bright Angel Cañon from O'Neill's Point, Grand Cañon of Arizona. Copyright 1903.

26.986 A Mighty Sentinel in a Trackless Waste—Zoroaster Tower, Grand Cañon of Arizona. Copyright 1903.

26.987 A night in the bed of Grapevine Creek, Grand Cañon of Arizona. Copyright 1903.

26.988 A Pinion Tree which plants its nuts 4000 feet below, Rowe's Point, Grand Cañon of Arizona. Copyright 1903.

26.989 "A tangled skein of Mountain Ranges"—Up Grand Cañon of Arizona from Moran's Cove. Copyright 1903.

26.990 An Eroded Sentinel—Survivor of the Primeval Flood, Grand Cañon of Arizona. Copyright 1903.

26.991 Crossing the Lower Plateau towards the Colorado River, Grand View Trail, Grand Cañon of Arizona. Copyright 1903.

26.992 Descending Grand View Trail—Grand Cañon of Arizona. Copyright 1903.

INFORMATIONAL ADDENDUM TO THE APPENDICES TO PART 26

3-Dimensional Productions Other Than Transparency Products or Stereographs

A few citations elsewhere in this bibliography record 3-dimensional products *other than* transparency products or stereographic cards. As a matter of convenience, these citations are repeated below, each with its own ITEM NUMBER for Part 26 (new number if cited from another part of the bibliography; retaining its number if included in Part 26).

Ambroziak, Brian M., AND Ambroziak, Jeffrey R.

1999 26.1360 *Infinite perspectives : two thousand years of three-dimensional mapmaking.* (Introduction by Ray Bradbury.) New York: Princeton Architectural Press, 111 pp. [See map of Bright Angel Point, Grand Canyon National Park, on fold-out sheet; book accompanied by three pair of 3D spectacles in end pocket.]

Arizona Geological Survey

1998 26.1267 3-D stereo topographical map of Arizona. *Arizona Geological Survey, Map 32*, 1 sheet, scale 1:750,000, contour interval 100 feet. (Stereo contours produced by American Stereo Map Co., Salt Lake City.) [To be used with red-blue glasses.]

Cygnus Graphic

1988 26.1280 *The Grand Canyon of the Colorado River.* Phoenix: Cygnus Graphic, scale 1:300,000. (Cygnus Graphic OPTI-RELIEF map, designed to be used with viewer glasses; with 1-p. instructions in English, French, Spanish, German, and Japanese.)

DeLorme [firm]

1999 26.1268 *3-D TopoQuads : Arizona*. Yarmouth, Maine: DeLorme, 9 CD-ROMs, 12-page text.

≡ REVIEWS AND NOTICES Grubbs, 2000, ITEM NO. 30.301; Hanson, 2000, ITEM NO. 30.309

Draper, Ernest E.

1950 26.1361 *Three-dimensional SuperVues. Grand Canyon National Park, Arizona.* Boulder, Colorado: The Flatirons Studios, [16] pp. [Three-dimensional photographs requiring red-blue viewing glasses.]

Four Chambers Studio

2011 26.1269 *Grand Canyon National Park virtual tour CDROM : 360° panoramas, ebooks, 3D stereographs, kids scavenger hunt, interactive maps, internet linked, topo maps.* [No place]: Four Chambers Studio LLC. Round metal container containing CD, anaglyphoscope and insert, "360 Degrees of Grand Canyon Kid's [*sic*] Scavenger Hunt". [For Windows™ or Macintosh™.] [Container-top label cited. Container-bottom label notes: "Plays on Your Computer. Includes Internet Linked Content. Four Chambers Studio. Family Owned and Operated."]

Grand Canyon Natural History Association

1967 26.1359 *Grand Canyon National Park, Arizona.* Grand Canyon, Arizona: Grand Canyon Natural History Association, plastic three-dimensional map of eastern Grand Canyon, with text sheet affixed to reverse. (Produced by Lange Co.)

Heiniger, Ernst A.

1971 26.1270 *Grand Canyon : Natur und Tierwelt in 157 Farbaufnahmen.* Bern, Switzerland: Kümmerly and Frey Geographischer Verlag; and München, Bern, and Wien: BLV Verlagsgesellschaft, 236, [17] pp. (pagination continues through interleaved unpaginated leaves containing 157 photos); with anaglyphoscope. [Red/green plastic-lensed cardboard anaglyphoscope accompanying the volume has printed on it: "KÜMMERLY & FREY—GRAND CANYON", with image of a thumb printed on right-hand side of the card. Also a card laid in, "Grand Canyon Bildlegenden", 10 × 29.5 cm, which is keyed to "Anaglyphenkarte des Grand Canyon; Massstab 1:62 500" (the map between pp. [124]/[125] that is to be viewed with anaglyphoscope producing a three-dimensional image).] [In German.]

≡ CROSS-LISTINGS |CITED» GCNHA Monograph 8: page 1-25|

1973 26.1271 *Grand Canyon du Colorado : suite pour nature et faune en 157 images.* (Pierre Champendal, translator.) Paris: Elsevier Séquoia, 244 [285] pp. (pagination continues through interleaved unpaginated leaves containing 157 photos); with anaglyphoscope. [Red/green plastic-lensed cardboard anaglyphoscope accompanying the volume has printed on it: "KÜMMERLY & FREY—GRAND CANYON", with image of a thumb printed on right-hand side of the card.] [Translation of Heiniger (1971, ITEM NO. 2.3313).] [In French, translated from German.]

1975 26.1272 *Grand Canyon.* (Ewald Osers, translator.) Washington, D.C., and New York: Robert C. Luce Co., Inc., 240 pp. (pagination continues through interleaved unpaginated leaves containing 157 photos); with anaglyphoscope. [Red/green plastic-lensed cardboard anaglyphoscope accompanying the volume has printed on it: "KÜMMERLY & FREY—GRAND CANYON", with image of a thumb printed on right-hand side of the card.] [Translation of Heiniger (1971, ITEM NO. 2.3313).] [In English, translated from German.]

Howell, Edwin E.

NO DATE 26.1273 *The Grand Cañon of the Colorado of the West and the cliffs of southern Utah.* [No place]: U.S. Geological Survey, 3-dimensional map, 22 × 22 cm, topography with colored time-stratigraphic outcrop markings, vertical and horizontal scales 1 inch = 2 miles (1:126,720). [1875; with different states at later dates.] [The original commercially produced model indicated an imprint of the Geographical and Geological Survey of the Rocky Mountain Region, which is the Powell Survey of general parlance; a model was first exhibited at the Centennial Exposition in Philadelphia, 1876, and commercially produced thereafter. A later version, which the Library of Congress attributes date as "191-", denotes "U.S. Geological Survey J. W. Powell, Director"; Powell was director during 1881-1894 (Geography and Map Division, call no. "G4332.G7 191-.G4 TIL"; digital view at http://hdl.loc.gov/loc.gmd/g4332g.np000097). A model was exhibited at the World's Industrial and Cotton Centennial Exposition, New Orleans, 1884-1885 (see U.S. Bureau of Education, 1886, ITEM NO. 21.5213).] [An illustration of the Library of Congress's copy of this map is shown at the beginning of Part 24 of this bibliography.]

1931 26.1288 *Grand Canyon of the Colorado and the cliffs of southern Utah.* [No place]: U.S. Geological Survey, 3-dimensional map, 22 × 22 cm, topography with colored time-stratigraphic outcrop markings, vertical and horizontal scales 1 inch = 2 miles (1:126,720). ("Modelled by E. E. Howell from maps of the United States Geological and Geographical Survey [*sic*] by J. W. Powell; revised by F. T. Thwaites and Fred Wilhelm in 1931 from geological maps of Arizona 1924 and Utah 1918".) [For original see Howell (no date, ITEM NO. 26.1273).]

Hubbard Scientific Company

NO DATE 26.1281 *Grand Canyon, Arizona.* Northbrook, Illinois: Hubbard Scientific Company, plastic raised-relief map. [Base map "Prepared by the U.S. Army Topographic Command (FSGE), Washington, D.C., from Western United States 1:250,000, Series V502, Edition 3-AMS, Sheet NJ 12-10, 1970"; contour interval 200 ft with 100-ft supplementary contours.]

NO DATE 26.1283 *Grand Canyon National Park : an Adventureland Map : park map based on ERTS satellite imagery.* Chippewa Falls, Wisconsin: Hubbard Scientific, plastic raised-relief map, 21 × 21 × 1 inches. [Copy acquired new in 2018 (sold with or without frames; frames thin plastic in black or gold, and in oak).] [Displays eastern Grand Canyon in raised-relief vinyl, including two separate 3-raised-relief inserts. "Grand Canyon National Park" displayed with pre-enlargement boundary; Colorado River on map from Navajo Bridge nearly to Kanab Creek; horizontal scale 1 inch = *ca.* 8 miles, vertical scale ⅛ inch = 1000 feet. Insets: "South Rim Trails", linear expanse of Inner Gorge about from Hance Creek west to Monument Creek; "North Rim Trails" (including North Kaibab Trail and Old Bright Angel Trail); insets horizontal scale 1 inch = *ca.* 1.2 miles, vertical scale ⅕ inch = 1000 feet.] [Earth Resources Technology Satellite.]

PART 27. AUDIO WORKS AND MUSICAL SCORES ON THE GRAND CANYON AND LOWER COLORADO RIVER REGIONS

OVERVIEW. This part lists audio recordings (oral and instrumental) and printed musical scores. Resources available only online are not included. Also included here are pertinent annotated guides to audio recordings.

NOTES FOR PART 27

Names of producing agencies are usually used for the indexed author field.

“Record” is an analog sound recording, or “phonodisc”; 78 rpm (revolutions per minute) format is on 10-inch plastic disks, 45 rpm format is on 7-inch plastic disks, and 33⅓ rpm format is on 12-inch plastic disks.

Playing times are given in: [minutes]:[seconds] *or* [hours]:[minutes]:[seconds]

For certain analog tape speeds, ips = inches per second.

Dunn, David

1996 27.337 *Environmental sound works by David Dunn, 1973-85.* [No place]: Innova Recordings, 2 CDs, 2:15:30. [Listen to Disk 1, no. 1, "Nexus 1" (14:39); improvisational elements by Dunn; Ralph Dudgeon, Ed Harkins, and Jack Logan, trumpets. From the liner notes: "*Nexus 1* was performed and recorded in the interior of the Grand Canyon National Park over a three-day period from the 17th to the 20th of June, 1973. All performance and recording took place in the area known as Hermit's Gorge [Hermit Canyon], approximately two miles down into the canyon interior along Hermit's Trail [Hermit Trail]. The score specified sound gestures which the trumpets could articulate interactively with the canyon environment. This interaction primarily focused upon 1) the extended reverberation and extraordinary spatial acoustics of the rock formations, and 2) the non-human life forms such as the crows [*sic*] heard throughout the performance recording.”] ⊙ CD-MUSIC

Dylan, Bob

1991 27.279 *Bob Dylan : The Bootleg Series, Volumes 1-3 (rare and unreleased) 1961-1991.* (Jeff Rosen, producer.) Columbia. (Released on either 5 vinyl records, 3 CDs, or 3 audio cassettes.) 229:37. [Includes (Disc 1, selection 22) “Last Thoughts on Woody Guthrie (Live at Town Hall, New York, NY—April 1963)” (7:07), a poem recited live in concert that ends with the often-quoted, “You’ll find God in the church of your choice / You’ll find Woody Guthrie in Brooklyn State Hospital / And though it’s only my opinion / I may be right or wrong / You’ll find them both / In the Grand Canyon / At sundown”.] ● ⊙ CD-MUSIC 📼 MUSIC

GO TO BIBLIOGRAPHY TABLE OF CONTENTS

ANONYMOUS

2013 27.229 Part of a Powell ditty. *Boatman's Quarterly Review*, 26(1) (Spring): 48. ["[A] 'starter on the tune' . . . thought to have been 'utilized by the Powell party' in 1871-1872." Musical score of three staffs, handwritten with typewritten lyrics, "O boys, you remember the wild Colorado . . . ." Donated by Fanny Waugh Davis to Grand Canyon National Park in 1948.] 🎼

A

Asanger, Thomas

NO DATE 27.205 Grand Canyon. Roosendaal, Netherlands: Tierolff Musiekcentrale, 14 pp. (Tierolff for Band, 24.) [2010.] [Score.] 🎼

B

Bird, Peter

2013 27.306 *Night song.* [No imprint], 8 [9] pp. [For bass, drum, and four voices.] [Grand Canyon and regional Native American people and places: Paunsagunt, Kaibab, Kaiparowits, Kanab, Nankoweap, Shinumo, Tokawana. Moderato ♩ = 90, all voices without vibrato, drum "Always off-the-beat; no need to count!"] [Score.] 🎼

Bornefeld, Helmut

1982 27.307 *Der Anfang auf den Stabspielen : Spielmusiken für Xylophon, Glockenspiel und Vibraphon.* (Hermann Gschwendtner, ed.). Reggensburg: Bosse, 36 pp. (Bosse Musik Medien Erziehung.) [Includes "Im Grand Canyon".] [Score.] [In German.] 🎼

Byrd, Richard

2022 27.339 *Sound reflections.* Markham, Ontario: Eighth Note Publications. ["The musical material for *Sound Reflections* was inspired after a trip to the Grand Canyon. The open voicings of quartal harmonies reflect the canyon's vast expanse. The figurative and literal echoes of the canyon are captured in this piece through imitative canonical writing including sections of rhythmic and tonal phasing. *Sound Reflections* embodies the breath-taking views and adventures of exploring the Grand Canyon through the juxtaposition of majestic yet serene melodic motives with tension building rhythmic canonical writing."] [Scores for concert band, brass quintet, 5 trumpets, 5 flutes, and interchangeable woodwind ensemble.] 𝄞

2022 27.340 *Canyon echoes.* Markham, Ontario: Eighth Note Publications. [A duet version of *Sound Reflections*.] [Scores for 2 clarinets, 2 flutes, 2 French horns, 2 tubas, 2 alto saxophones, 2 trumpets, and 2 trombones.] 𝄞

THE GRAND CANON

A WORLDWIDE BIBLIOGRAPHY OF THE GRAND CANYON AND LOWER COLORADO RIVER REGIONS
IN THE UNITED STATES AND MEXICO

28

SEPARATE IMAGERY IN THE GRAND CANYON AND LOWER COLORADO RIVER REGIONS

Published photographs and works of art that are not accompanied by textual material, appearing by themselves with or without legend

GO TO VOLUME CONTENTS PAGE
GO TO BIBLIOGRAPHY TABLE OF CONTENTS

OVERVIEW. This part includes only single, extraneous items; for example, a reproduction of a single painting, or specialized folios of prints, without accompanying text other than the legend. Photographs within articles or books that are credited to specific people or sources are not generally listed separately in this bibliography.

For **3-D transparency products and published stereographs** see the Appendices to Part 26 of this bibliography:

1. General Guide to Commercially Produced 3-D Transparency Products
2. General Guide to Commercially and Governmentally Produced Stereographs

RELATED MATERIAL

PART 3. *THE NEW YORK TIMES* for additional items that relate to this part of the bibliography (which are not repeated in this part)

• Clarence E. Dutton's "Tertiary History of the Grand Cañon District" (*U.S. Geological Survey Monograph 2*, 1881, 1885), with its great double-folio *Atlas* comprising 23 geologic maps and geologically significant scenic views by William Henry Holmes and Thomas Moran, is one of the most-sought publications by afficionados of the American West—with prices attending to the demand. Many copies of the Atlas have been disbound over the years and its plates reused or made available separately.

Part 28 includes citations of items that contain potentially offensive material, with sexual or other matter that some users, for religious, moral, or personal reasons, may not wish to encounter. The pertinent citations are grouped in the Supplement at the end of Part 28. It is additionally important to segregate these citations as this is an internationally focused bibliography with an international audience, whose particular perspectives may not be known to this compiler. The cited items themselves may contain explicit material but a few of them do not; yet these, too, are segregated because the serials in which they appear do contain such matter.

ART OF THE GRAND CANYON

Art of the Grand Canyon: An Introduction and Annotated Bibliography. (2023)

The Introduction is a very brief, admitedly arbitrary, primer of Grand Canyon art for readers who may not be very familiar with the subject, highlighting some usual and some appealingly unusual aspects about well-known and obscure artists alike, and a few of their pieces. It also finds some new perspectives and makes a few comparisons that might be thought-provoking, perhaps unrealized. The annotated bibliography gathers citations for publications, beginning in 1853, that in some way mention or illustrate the work of Grand Canyon artists between 1851 and 2023. It serves as a documentary effort that confirms the breadth and depth of artistic interest in the Grand Canyon. It also introduces numerous artists who have not had the privilege of being "recognized" in the world of art, such as those whose work was contributed "on the fly" to various journals and magazines, who are not acclaimed artists in their own right.

Promotes the Smith-Spring-Holmes Orchestral Quintet.] 📷

1928 28.1023 In the Grand Canyon of the Colorado. *Radio Broadcast* (New York), 13(2) (June): 64 [frontispiece]. ["A portable radio receiver in use in the Grand Canyon in 1923. A special receiver was built for the expedition by the Bureau of Standards which was carried on a geological survey of the Canyon under the auspices of the United States Geological Survey. This illustration is from a photograph by Lewis R. Freeman, of the Explorers Club, New York, who was a member of the expedition. Mr. Freeman explains that at the time the expedition was undertaken there was some doubt as to whether radio reception would be possible in the Canyon. It was conclusively demonstrated that excellent reception was posible. The receiver performed as well at depths of 500 feet as at 5000, Mr. Freeman says. The antenna in the illustration also, it seems, served the party as a clothesline." (ENTIRE ITEM)] [Birdseye Expedition, 1923.] 📷

1932 28.1170 [Grand Canyon, North Rim view.] *The Union Pacific Magazine* (Union Pacific System, Omaha, Nebraska), 11(4) (April): cover. [Color photograph. See also Union Pacific System advertisement, p. [3].] 📷

A. L. Englander Company

1922	28.1130	[Hupmobile window display, Cleveland, Ohio.] *Motor Age*, 41(25) (June 22): 25. [Photo with legend: "The well known 'call of the wild' is strongly sounded in this window display, the work of the A. L. Englander Co., Cleveland distributor for Hupmobile. Several weeks were required to complete the 'set,' but the comment upon the result has justified the effort. The Englander company believes that real sales appeal is contained in the work and there can be little doubt as to its 'going over.' Grand Canon scenery is used as a background for the Hupmobile roadster. The blending of the work is readily seen and, as window displays run, is very highly commendable."] 📷

2020	28.1426	A hoodoo at Yaki Point, on the South Rim, is covered in snow on a winter morning. *In:* Kida, Jeff, and Whitney, Keith (eds.), This is the start of something big; a portfolio. *Arizona Highways*, 96(1) (January): 1, back cover. 📷
2020	28.1480	Wispy clouds lift from the Grand Canyon on New Year's Day, as seen from Yavapai Point, an overlook known for its panoramic views of Arizona's most famous natural wonder. *In:* Kida, Jeff (ed.), A little something extra. *Arizona Highways*, 96(12) (December): 20-21. [With commentary by Kerrick James.] 📷
2021	28.1512	Moran Point, Grand Canyon. *In:* Kida, Jeff (ed.), Mantel pieces; a portfolio. *Arizona Highways*, 97(9) (September): 28-29. 📷
2021	28.1553	Considered for *Winter Wonderland*, December 2021. A gnarled tree juts from Yaki Point, on the Grand Canyon's South Rim, as a snowstorm obscures the view into the Canyon. More than 1,700 vascular plant species, along with 167 types of fungus and 64 species of moss, are found within the boundaries of Grand Canyon National Park. *In:* Stieve, Robert (ed.), *The year in pictures : 2021.* Phoenix: Arizona Highways, p. 13. [Volume comprises outtakes from 2021 issues of *Arizona Highways*. Distributed late December 2021 with the January 2022 issue.] 📷
2022	28.1544	Clouds tumble over the Palisades of the Desert, as viewed from Lipan Point, as an afternoon monsoon storm rolls through. These imposing cliffs form part of the Canyon's eastern edge. *In:* Kida, Jeff (ed.), Natural wonders are big in Arizona; a portfolio. *Arizona Highways*, 98(1) (January): 24-25 (legend on p. 27). 📷

2022	28.1545	Clouds begin to clear form the Canyon as snow and a winter storm continue to shroud the South Rim. This photo was made near Pipe Creek Vista, which is roughly a mile southeast of the South Rim visitors center. *In:* Kida, Jeff (ed.), Natural wonders are big in Arizona; a portfolio. *Arizona Highways*, 98(1) (January): 34-35. 📷
2022	28.1580	Claire Curran. September 2021, digital, Grand Canyon. *In:* Kida, Jeff, Stieve, Robert, and Whitney, Keith (eds.), The Next Best; a portfolio. *Arizona Highways*, 98(12) (December): 29. [Lightning strike at Moran Point.] [Portfolio comprises "25 best photographs of the past 10 years" in *Arizona Highways*; dates indicate original publication date.] 📷
2022	28.1581	Claire Curran. January 2022, digital, Grand Canyon. *In:* Kida, Jeff, Stieve, Robert, and Whitney, Keith (eds.), The Next Best; a portfolio. *Arizona Highways*, 98(12) (December): 29. [Winter storm clearing at Pipe Creek Vista.] [Portfolio comprises "25 best photographs of the past 10 years" in *Arizona Highways*; dates indicate original publication date.] 📷
2022	28.1582	A winter storm begins to clear from the Grand Canyon, as viewed from the snowy South Rim. *In:* Kida, Jeff (ed.), It All Started With the Snow; a portfolio. *Arizona Highways*, 98(12) (December): 48-49 [legend, p. 50]. 📷
2022	28.1616	Considered for *The Journal: Photography*, April 2022. Sand verbenas, evening primroses and other wildflowers proliferate on a rippled sand dune in the Havasu Wilderness. This nearly 18,000-acre wilderness area, part of which is in California, protects numerous plant and animal species and offers pristine desert hiking. *In:* Stieve, Robert (ed.), *The year in pictures : 2022.* Phoenix: Arizona Highways, p. 36 (legend on p. 37). [Volume comprises outtakes from 2022 issues of *Arizona Highways*. Distributed late December 2022 with the January 2023 issue.] 📷
2023	28.1606	Beneath a layer of storm clouds, long shadows form on the Grand Canyon's layered buttes in early morning light. This view is from Yavapai Point, just northwest of the South Rim visitors center. *In:* Kida, Jeff (ed.), We skipped to the good part; a portfolio. *Arizona Highways*, 99(1) (January): 26-27 (legend on p. 28). 📷
2023	28.1609	A summer monsoon storm moves to the northeast as sunset colors emerge in a view from Lipan Point on the South Rim. *In:* Kida, Jeff (ed.), We skipped to the good part; a portfolio. *Arizona Highways*, 99(1) (January): 30-31 (legend on p. 32). 📷
2023	28.1642	Morning light reveals frost on leaves along Forest Road 214, one of many forest roads north of the North Rim of the Grand Canyon. *In:* Kida, Jeff, and Whitney, Keith (eds.), Out in the Cold; a portfolio. *Arizona Highways*, 99(12) (December): 29. 📷
2023	28.1656	Considered for *Winter Lace*, December 2023. Snow accents aspen trunks along a forest road northwest of the North Rim entrance to Grand Canyon National Park. *In:* Stieve, Robert (ed.) *The year in pictures : 2023.* Phoenix: Arizona Highways, p. 15 (legend on p. 14). [Volume comprises outtakes from 2023 issues of *Arizona Highways*. Distributed late December 2023 with the January 2024 issue.] 📷
2023	28.1657	Considered for *Out in the Cold*, December 2023. Snow and clouds blanket the Grand Canyon in a view from near Pipe Creek Vista, an overlook on the South Rim. In clearer weather, this overlook, just off Desert View Drive, offers a view of its namesake waterway as it winds toward the Colorado River. *In:* Stieve, Robert (ed.) *The year in pictures : 2023.* Phoenix: Arizona Highways, pp. 16-17. [Volume comprises outtakes from 2023 issues of *Arizona Highways*. Distributed late December 2023 with the January 2024 issue.] 📷

2023	28.1658	Considered for *Let There Be Light*, September 2023. A shallow pool at Coyote Buttes South, a remote section of Northern Arizona’s Vermilion Cliffs, mirrors the colors of sunrise. This area and the neighboring Coyote Buttes North are administered by the Bureau of Land Manaement, and a permit is required to visit. *In:* Stieve, Robert (ed.) *The year in pictures : 2023.* Phoenix: Arizona Highways, p. 51 (legend on p. 50). [Volume comprises outtakes from 2023 issues of *Arizona Highways*. Distributed late December 2023 with the January 2024 issue.] 📷
2024	28.1649	A snowy Grand Canyon greets the rising sun in a view from Yavapai Point, northeast of Grand Canyon Village on the South Rim. The trail visible in this photo is the Plateau Point Trail, which is closed until March 2025 for replacement of the pipeline that supplies water to the South Rim. *In:* Kida, Jeff, and Whitney, Keith (eds.), The Big Chill; a portfolio. *Arizona Highways*, 100(1) (January): 24-25 (legend on p. 27). 📷
2024	28.1650	Heavy snow and low clouds dominate a winter view from the South Rim’s Mather Point. This is where many South Rim visitors get their first view into the Canyon. *In:* Kida, Jeff, and Whitney, Keith (eds.), The Big Chill; a portfolio. *Arizona Highways*, 100(1) (January): 28-29 (legend on p. 30). 📷
2024	28.1651	A gnarled tree at Yavapai Point wears a heavy blanket of snow as it punctuates a view into the Canyon’s depths. Yavapai Point is an easy walk northwest from Mather Point. *In:* Kida, Jeff, and Whitney, Keith (eds.), The Big Chill; a portfolio. *Arizona Highways*, 100(1) (January): 30. 📷
2024	28.1652	Trees, hoodoos and the Canyon’s walls wear a blanket of snow in morning light at the South Rim’s Grandview Point. This scenic spot east of Grand Canyon Vilalge was the site of the Grandview Hotel in the late 1800s and early 1900s. *In:* Kida, Jeff, and Whitney, Keith (eds.), The Big Chill; a portfolio. *Arizona Highways*, 100(1) (January): 34. 📷
2024	28.1693	Heavy snow on the South Rim anchors a sunset view of storm clouds clearing from the Grand Canyon. This view is from Yavapai Point, just northwest of the South Rim’s visitor center. *In:* Kida, Jeff, and Whitney, Keith (eds.), Cold Pursuit; a portfolio. *Arizona Highways*, 100(12) (December): 32-33. 📷

Groeber, Gerry

2021	28.1555	Considered for *Contents*, April 2021. The last full moon of 2020 rises amid low clouds at the Grand Canyon, as seen from Mather Point on the South Rim. "I normally don't get emotional out in the field, but this moonrise was one of those times," photographer Gerry Groeber says. "I was photographing the latest snow that had fallen on the Canyon. The sun was setting, the clouds had begun to glow, and the temperature had dropped below freezing. I hadn't planned on shooting the moonrise, but as I was framing an image, I glanced across the Canyon and saw the full moon begin to make its way over the edge. It was a perfect ending to a not-so-perfect year." *In:* Stieve, Robert (ed.), *The year in pictures : 2021.* Phoenix: Arizona Highways, pp. 20-21. [Volume comprises outtakes from 2021 issues of *Arizona Highways*. Distributed late December 2021 with the January 2022 issue.] 📷

Jao, Tsung-i [饒宗頤] [Rao Zongyi][125]

2015	28.1459	Master Jao Tsung-i 走近饒公. Two poems by Jao Tsung-i translated by Dr Nicholas Morrow Williams. 饒公兩詩 (英文翻譯：魏寧博士). ("From *The Residue of Dreams: Selected Poems of Jao Tsung-i*, forthcoming from Cornell East Asia Series" [see Jao, 2016, ITEM NO. 8.872].) 選自《夢餘：饒宗頤詩文選譯》，康奈爾大學東亞研究系列，即將出版. *Sinology News* / 稷風 [jì fēng] [國學院通訊《稷風》(Guóxuéyuàn tōngxùn "jì fēng") (National Academy Newsletter "Ji Feng")] (香港浸會大學，饒宗頤國學院 [xiānggǎng jìn huì dàxué, ráozōngyí guóxuéyuàn] [Hong Kong Baptist University, Jao Tsung-i State College]), 1(1) (Summer): 19-21. [See p. 20: "On the Grand Canyon. 大峽谷. For Jao the awesome scale of the Grand Canyon seems to place even the mythical mountain of Kunlun in the shade. The forces of nature behind it place in perspective even the great luminaries of human civilization. 作者在此描繪出大峽谷的壯麗景象，甚至傳說中的崑崙山也比之不及。在自然造化面前，就算是人類聖賢也會感佩不已。" Page presents a quatrain, illustrated with a painting of Grand Canyon, "饒宗頤 大峽谷寫生 (1990 年)" [Ráozōngyí dà xiágǔ xiěshēng (1990 nián)] [Jao Tsung-i Grand Canyon sketch (1990)].] [See also

---

[125] Nicholas Morrow Williams (see Jao, ITEM NOS. 8.870, 8.872) explained in his "Prefatory Note" to *The Residue of Dreams* (p. xiii) that he uses the Pinyin system of Chinese transliteration, except for Jao's name: "Jao achieved an international reputation in the 1960s, when the Wade-Giles system was still widely used, so his English name follows the Wade-Giles romanization: Jao Tsung-i instead of Pinyin Rao Zongyi." Note as well that the English name of Hong Kong Baptist University's Academy of Sinology (see Jao, ITEM NO. 8.870) honors "Jao Tsung-i", as do numerous other institutions named for him.

Jao (2016, ITEM NO. 8.872).] [In parallel Chinese and English texts, with bilingual serial title.] 🎨

2016 28.1462 *The residue of dreams : selected poems of Jao Tsung-i.* (Nicholas Morrow Williams, translator.) Ithaca, New York: Cornell University, East Asia Program, 201 [208] pp. (Cornell East Asia Series, 182.) [See the quatrain, "On the Grand Canyon", p. 54; credited as "大峡谷, *Wenji* 722" [Grand Canyon, *Wenji*, 722; *i.e.* Jao (2003, ITEM NO. 8.873), p. 722]. Also presented (p. 55) is a color reproduction of a watercolor painting with Chinese calligraphy, by Jao Tsung-i, "Grand Canyon (1980s)". Includes notes by Williams. Grand Canyon also noted, *in passing* (p. 6), in Williams' "Introduction" (pp. 1-15), under the section "Jao as Poet".] [Williams' text and notes in English, with poetry also in the original Chinese.] 🎨

2020	28.1430	Mist rises from the depths of the Canyon as morning light illuminates Angels Window, a natural arch along the road to Cape Royal on the North Rim. *In:* Kida, Jeff, and Whitney, Keith (eds.), This is the start of something big; a portfolio. *Arizona Highways*, 96(1) (January): 27. 📷
2020	28.1431	Cape Royal offers a moonlit view of Wotan's Throne as sunrise approaches. *In:* Kida, Jeff, and Whitney, Keith (eds.), This is the start of something big; a portfolio. *Arizona Highways*, 96(1) (January): 28-29. 📷
2020	28.1432	Summer rains create a dreamy atmosphere in the Canyon as the day's first rays of sunlight strike the gorge's red sandstone cliffs. This view is from the North Rim, which is open only during the warmer months of the year. *In:* Kida, Jeff, and Whitney, Keith (eds.), This is the start of something big; a portfolio. *Arizona Highways*, 96(1) (January): 30-31. 📷
2020	28.1433	The Little Colorado River flows brown as it prepares to merge with the Colorado River in the Canyon. In the background, snow covers the North Rim. *In:* Kida, Jeff, and Whitney, Keith (eds.), This is the start of something big; a portfolio. *Arizona Highways*, 96(1) (January): 33 (legend on p. 32). 📷
2020	28.1434	The golden hues of a clearing storm reflect off the Colorado River at sunset in a view from the South Rim's Mohave Point. *In:* Kida, Jeff, and Whitney, Keith (eds.), This is

the start of something big; a portfolio. *Arizona Highways*, 96(1) (January): 34-35. 📷

2020 28.1437 [Monsoon storm at Grand Canyon, illuminated by moonlight.] *In:* Kida, Jeff (ed.), The evolution of landscape photography; a portfolio. *Arizona Highways*, 96(4) (April): 28-29. [From the September 2013 issue.] 📷

2021 28.1491 A winter storm clears from the Grand Canyon on New Year's Day, as viewed form the South Rim. *Arizona Highways*, 97(1) (January): cover, 1. [See also Schallau's remarks on this photo in "Contributors" section, p. 3.] 📷

2021 28.1513 Colorado River, Grand Canyon. *In:* Kida, Jeff (ed.), Mantel pieces; a portfolio. *Arizona Highways*, 97(9) (September): 30. 📷

2021 28.1551 Considered for *Grand Canyon: Earth and Sky*, January 2021. A winter storm begins to clear from the Grand Canyon, allowing sunlight to bathe Isis Temple in warm light. While heavy winter snow is common at the Canyon's higher elevations, it's much rarer in the depths of the gorge. Phantom Ranch, for example, see less than 1inch of snow annually. *In:* Stieve, Robert (ed.), *The year in pictures : 2021.* Phoenix: Arizona Highways, pp. 6-7. [Volume comprises outtakes from 2021 issues of *Arizona Highways*. Distributed late December 2021 with the January 2022 issue.] 📷

2021 28.1552 Considered for *Grand Canyon: Earth and Sky*, January 2021. On New Year's Day, fresh snow blankets the South Rim of the Grand Canyon between Mather and Yavapai points. The South Rim averages about 5 feet of snow per year, while the North Rim, which is 1,000 feet higher, typically receives about 12 feet annually. *In:* Stieve, Robert (ed.), *The year in pictures : 2021.* Phoenix: Arizona Highways, pp. 4-5. [Volume comprises outtakes from 2021 issues of *Arizona Highways*. Distributed late December 2021 with the January 2022 issue.] 📷

2021 28.1560 Considered for *A Perfect Week at Grand Canyon National Park*, August 2021. the light of sunset streams through curtains of rain in Grand Canyon, as viewed from Cape Royal on the North Rim. This viewpoint, the southernmost overlook on the North Rim, offers a 270-degree view of the Canyon, along with a glimpse of the Colorado River far below. *In:* Stieve, Robert (ed.), *The year in pictures : 2021.* Phoenix: Arizona Highways, pp. 78-79. [Volume comprises outtakes from 2021 issues of *Arizona Highways*. Distributed late December 2021 with the January 2022 issue.] 📷

2022 28.1538 A spot near Moran Point, on the Grand Canyon's South Rim, offers a glimpse of the Colorado River as the setting sun illuminates nearby Zuni Point. *In:* Kida, Jeff (ed.), Natural wonders are big in Arizona; a portfolio. *Arizona Highways*, 98(1) (January): cover (legend inside front cover). 📷

2022 28.1539 A winter storm leaves a dusting of snow on the Grand Canyon's buttes and the ledges near the South Rim's Yavapai Point. The trail to Plateau Point, a side trip along the Bright Angel Trail, is visible in the center of the photo. *In:* Kida, Jeff (ed.), Natural wonders are big in Arizona; a portfolio. *Arizona Highways*, 98(1) (January): 20-21 (legend on p. 22). 📷

2022 28.1540 Lipan Point, on the South Rim east of the visitors center, offers a glimpse of the Colorado River far below. This overlook is known for offering some of the South Rim's most expansive views of the Canyon. *In:* Kida, Jeff (ed.), Natural wonders are big in Arizona; a portfolio. *Arizona Highways*, 98(1) (January): 23 (legend on p. 22). 📷

2022	28.1541	Dappled light brings a painterly quality to a South Rim view of Isis Temple and Cheops Pyramid. Plateau Point is at the edge of the platform in the foreground. *In:* Kida, Jeff (ed.), Natural wonders are big in Arizona; a portfolio. *Arizona Highways*, 98(1) (January): 27. 📷
2022	28.1542	Vishnu Temple and Freya Castle rise from the Canyon's depths, as seen from the North Rim's Walhalla Overlook. This viewpoint, one of several along Cape Royal Road, offers views of the distant Echo Cliffs and Painted Desert. *In:* Kida, Jeff (ed.), Natural wonders are big in Arizona; a portfolio. *Arizona Highways*, 98(1) (January): 32. 📷
2022	28.1578	Adam Schallau. February 2019, digital, Kaibab Plateau. Bison graze in a meadow near the North Rim of Grand Canyon National Park. *In:* Kida, Jeff, Stieve, Robert, and Whitney, Keith (eds.), The Next Best; a portfolio. *Arizona Highways*, 98(12) (December): 25. [Portfolio comprises "25 best photographs of the past 10 years" in *Arizona Highways*; dates indicate original publication date.] 📷
2022	28.1617	Considered for Front Cover, August 2022. Indian paintbrushes and other wildflowers grow in rocky terrain beneath aspen trunks near the North Rim of the Grand Canyon. *In:* Stieve, Robert (ed.), *The year in pictures : 2022.* Phoenix: Arizona Highways, p. 41 (legend on p. 40). [Volume comprises outtakes from 2022 issues of *Arizona Highways*. Distributed late December 2022 with the January 2023 issue.] 📷
2023	28.1608	Mount Hayden, a spire composed of Coconino Sandstone, dominates a view from Point Imperial on the North Rim. *In:* Kida, Jeff (ed.), We skipped to the good part; a portfolio. *Arizona Highways*, 99(1) (January): 29 (legend on p. 28). 📷
2023	28.1612	Clouds clear from the Canyon to reveal a view of the distant Colorado from Navajo Point. *In:* Kida, Jeff (ed.), We skipped to the good part; a portfolio. *Arizona Highways*, 99(1) (January): 34-35. 📷
2023	28.1614	Sunrise brings pastel hues to the Canyon's buttes as the Colorado winds through. Visible in the middle ground is the river's cnfluence with the Little Colorado River, which marks the end of Marble Canyon and the start of the main section of the Grand Canyon. *In:* Kida, Jeff (ed.), We skipped to the good part; a portfolio. *Arizona Highways*, 99(1) (January): 36-37. 📷
2023	28.1640	The orange-brown hues of ponderosa pine trunks stand out in a winter wonderland near the South Rim of the Grand Canyon. *In:* Kida, Jeff, and Whitney, Keith (eds.), Out in the Cold; a portfolio. *Arizona Highways*, 99(12) (December): 18-19. 📷
2024	28.1643	A winter sunset bathes the Grand Canyon in soft light in a view from an overlook along the Hermit Road. *In:* Kida, Jeff, and Whitney, Keith (eds.), The Big Chill; a portfolio. *Arizona Highways*, 100(1) (January): cover, 1. [See also remarks by Schallau on this photo, in "Contributors" section, p. 3.] 📷
2024	28.1644	Soft winter light graces Isis Temple as a storm clears from the Rim Trail, a mostly paved, 13-mile route that runs from the South Kaibab Trailhead to Hermits Rest. *In:* Kida, Jeff, and Whitney, Keith (eds.), The Big Chill; a portfolio. *Arizona Highways*, 100(1) (January): 26 (legend on p. 27). 📷
2024	28.1645	With Zuni Point in the distance, Moran Point, along the South Rim's Desert View Drive, offers a look at the Canyon filled with clouds. This relatively rare phenomenon, known as an inversion, happens when cold air below the rim is trapped by warmer air above it. *In:* Kida, Jeff, and Whitney, Keith (eds.), The Big Chill; a portfolio. *Arizona Highways*, 100(1) (January): 27. 📷

2024 28.1646 Earth shadow—literally, the shadow the Earth casts through the atmosphere—defines a view of the Palisades of the Desert and the Colorado River from the Desert View area of the South rim. The flat-topped mountain on the right is Ceedar Mountain. *In:* Kida, Jeff, and Whitney, Keith (eds.), The Big Chill; a portfolio. *Arizona Highways*, 100(1) (January): 30-31. 📷

2024 28.1647 Heavy snow and clouds shroud the Grand Canyon at sunrise, as seen from a spot on the Rim Trail between Mather and Yavapai points. *In:* Kida, Jeff, and Whitney, Keith (eds.), The Big Chill; a portfolio. *Arizona Highways*, 100(1) (January): 32-33 (legend on p. 34). 📷

2024 28.1648 The setting sun lights the tops of the Canyon's buttes in a view from snowy Yavapai Point. This overlook is home to the Yavapai Geology Museum, which provides an overview of the Canyon's rock layers. *In:* Kida, Jeff, and Whitney, Keith (eds.), The Big Chill; a portfolio. *Arizona Highways*, 100(1) (January): 35 (legend on p. 34). 📷

2024 28.1695 Amid falling snow, the walls of the Grand Canyon flank a view of Isis Temple. This vantage point is a short distance down the Bright Angel Trail, the most popular hiking route from the South Rim to the Colorado River. *In:* Stieve, Robert (ed.), *The year in pictures : 2024.* Phoenix: Arizona Highways, pp. 16-17. [Volume comprises outtakes from 2024 issues of *Arizona Highways*. Distributed late December 2024 with the January 2025 issue.] 📷

SUPPLEMENT TO PART 28

Potentially Offensive Material Cited Separately

Part 28 includes citations of items that contain potentially offensive material, with sexual or other matter that some users, for religious, moral, or personal reasons, may not wish to encounter. The pertinent citations are grouped in this Supplement. It is additionally important to segregate these citations as this is an internationally focused bibliography with an international audience, whose particular perspectives may not be known to this compiler. The cited items themselves may contain explicit material but a few of them do not; yet these, too, are segregated because the serials in which they appear do contain such matter.

La Coe, Norm

1999 28.148 Canyon juniper. *Naturally*, (31) (Summer): cover, 3. [*NOTE*: Contains material for mature audience (nudity).] 📷

Quaintance, George

COMPUTER AND INTERACTIVE MEDIA FOR THE GRAND CANYON AND LOWER COLORADO RIVER REGIONS

Computer media and selected digital media for personal devices, which include the Grand Canyon or the lower Colorado River region

GO TO VOLUME CONTENTS PAGE
GO TO BIBLIOGRAPHY TABLE OF CONTENTS

PART 29. COMPUTER AND INTERACTIVE MEDIA FOR THE GRAND CANYON AND LOWER COLORADO RIVER REGIONS

OVERVIEW. This part includes items that were released only in a computer-readable format. Digital materials that were released as supplementary files to printed articles and books, although so indicated in citations elsewhere in this bibliography, are not separately included in this part. Also included are announcements and similar items regarding media that are designed for digital personal-pad products such as iPhone, iPad, iPod Touch, or Android [some products in use as of 2014, for example]. Further included here are articles that may explain how certain computerized media were created. Web-based media are generally excluded from this bibliography due to the likelihood of individual products being inaccessible in the future. Personal (hand-held) media such as Kindle editions of books are likewise excluded because of their narrowly restrictive limitations to proprietary products and inconsistent data on provenance and availability (as well as uncertainty of future accessibility). While the definition of such products has blurred—for example, CD-ROM products including audio recordings can be construed to be "computer media"—the focus of this part of the bibliography is on graphical and interactive material; for example, map programs, interactive travel guides, older-style "screen savers", and games. While web-based media are omitted due to their ephemeral nature (see below), included here are announcements and similar items that pertain to digital personal-pad devices ("apps", or applications); this is to make known bibliographically the existence of these products through the publications that were used to promote them. The "apps" themselves are not cited because, as like their web-posted counterparts, the ability to acquire these things in the future will diminish to zero.

RELATED MATERIAL

Part 11, Section 2A and Part 24 include citations of digital geological maps that may be printed out. [These are also cited in THE GRAND CANON Volume 2 (Cartobibliography).]

"Megatron, who crash-landed on Earth searching for the AllSpark, is obtained by the American government and held in the Hoover Dam. Meanwhile, the Autobots learn of the AllSpark's existence on the planet and try to acquire it before the Decepticons, led by Megatron, obtain it." (p. [2] of Moriarty.)] 💻

≡ REVIEWS AND NOTICES Anonymous, 2007, ITEM NO. 30.1383

Gushue, Thomas M.

2019 29.119 Colorado River mile system, Grand Canyon, Arizona. *U.S. Geological Survey, Data Release*, https://doi.org/10.5066/P9IRL3GV. [USGS ScienceBase link: https://www.sciencebase.gov/catalog/item/5b2185ace4b092d96528747b.] [Glen Canyon Dam to Pearce Ferry. "These data represent the centerline and measured increments at hundredths, tenths and whole miles, along the centerline of the Colorado River beginning at Glen Canyon Dam near Page, Arizona and terminating near the inflows of Lake Mead in the Grand Canyon region of Arizona, USA. The centerline was digitized using Color Infra-Red (CIR) orthophotography collected in March 2000 as source information and a LiDAR-derived river shoreline representing

8,000 cubic feet per second (CFS) as the defined extent of the river. Every effort was made to follow the main flow of the river while keeping the line approximately equidistant from both shorelines. The centerline feature class has been created to more accurately map locations along the Colorado River downstream of the Glen Canyon Dam. River miles and river kilometers were developed from measurements along this line. The incremental point feature classes were derived from the centerline of the Colorado River datasets. Specifically, the points were generated from nodes extracted from the centerline endpoints of the tenth mile line feature class. The Grand Canyon Monitoring and Research Center (GCMRC) river mileage was cross-checked with commercially available river guides and always fell within one mile of the guides, usually corresponding within a half mile. Additionally, these data were subjected to internal review by GCMRC scientists and commercial boatmen with decades of river travel experience on the Colorado River. River Mile 0 was measured from the USGS concrete gage and cableway at Lees Ferry, Arizona—as per the Colorado River Compact of 1922—with negative river mile numbers used in Glen Canyon and positive river mile numbers downstream in Marble and Grand Canyons. These data were updated in March 2015 using newer ortho-rectified imagery collected in May of 2009 and 2013, both at approximately 8,000 CFS. Due to extended drought conditions that have persisted in the U.S. Southwest, lake levels have dropped dramatically, especially at Lake Mead. A stretch of the Colorado River corridor that was part of Lake Mead in year 2000 has returned to a flowing river once again, and with a different channel that has not previously existed. All changes to the original centerline are downstream of River Mile 260 which is just upstream of Quartermaster Canyon in western Grand Canyon. New river miles and river kilometers were developed from this updated centerline.”] 🌍🌍🌍

BOOK REVIEWS AND SIMILAR NOTICES REGARDING PUBLICATIONS ABOUT THE GRAND CANYON AND LOWER COLORADO RIVER REGIONS

Critical reviews and notices of books, articles, films, and products

GO TO VOLUME CONTENTS PAGE
GO TO BIBLIOGRAPHY TABLE OF CONTENTS

PART 30. BOOK REVIEWS AND SIMILAR NOTICES
REGARDING PUBLICATIONS ABOUT THE GRAND CANYON AND LOWER COLORADO RIVER REGIONS

OVERVIEW. This part includes critical reviews at length in scholarly publications as well as promotional reviews, notices in general-interest publications, and cursory editorial or readers' notices. Reviews are included in this bibliography *only* if they relate to publications about the Grand Canyon or lower Colorado River specifically; otherwise the review must *mention* the canyon or the river region. Product reviews include those for audio and audio-visual productions, and computer software. Simple bibliographical entries or records of library receipts are not noticed here.

Reviews and notices are arranged by the names of the reviewers. Throughout the rest of this bibliography, citations for the reviewed or noticed publications are accompanied by ancillary notes that cross-list citations in Part 30. For an illustrated example see EXPLANATION OF THE ITEM NUMBERS AND CROSS-LISTINGS on Bibliography page 9.]

RELATED MATERIAL

PART 2. GENERAL PUBLICATIONS for reviews whose authors discuss or mention the Grand Canyon or lower Colorado River, but where the publications being reviewed have no pertinence to the coverage in this bibliography

PART 3. *THE NEW YORK TIMES* for additional items that relate to this part of the bibliography; reviews therein are not included in Part 30

Part 30 includes citations of items that contain potentially offensive material, with sexual or other matter that some users, for religious, moral, or personal reasons, may not wish to encounter. The pertinent citations are grouped in the Supplement at the end of Part 30. It is additionally important to segregate these citations as this is an internationally focused bibliography with an international audience, whose particular perspectives may not be known to this compiler. The cited items themselves may contain explicit material but a few of them do not; yet these, too, are segregated because the serials in which they appear do contain such matter. (Off-color language is not considered reason for segregation.)

Dellenbaugh, "A Canyon Voyage" by Dellenbaugh, "Romance of the Colorado River" by Dellenbaugh, "Grand Canyon of Arizona; how to see it" by George Wharton James, and "Wonders of the Colorado Desert" by James.]
1911	30.1056	[Notice of *The Young Lion Hunter* by Zane Grey.] *In:* Wild Life at Home and Abroad [SECTION]. *The Christian Advocate* (New York), (December 7): 9 [and concurrently paginated for volume, 1657]. ["Zane Grey, one of the best of the recent writers for boys, brings together in *The Young Lion Hunter* boy heroes, Indians and greasers and carries them through diversified experiences with each other and with mountain lions and wild horses in the Grand Cañon country of Colorado [*sic*]."]
1911	30.685	"'The Jaws of Death.' By Prof. E. J. Houston." *From:* Appendix C. American Baptist Publication Society. Publishing Department [SUBSECTION]. *In:* *Annual of the Northern Baptist Convention : 1911 : containing the proceedings of the fourth meeting held at Philadelphia, Pa., June 13 to 18, 1911.* Philadelphia: American Baptist Publication Society, Appendix C, p. 16 [appendix separately paginated]. [*American Baptist Home Mission Society, 79th Annual Report.*] [Young-reader fiction title (see Edwin J. Houston, 1911, ITEM NO. 6.634.]
1912	30.479	"The Grand Canyon of Arizona", by George Wharton James. *Geographical Journal*, 39(1) (January): 66.
1912	30.1159	"Three Wonderlands of the American West." By Thomas D. Murphy. *In:* Book-Reviews [SECTION]. *Photo-Era*, 28(5) (May): 227.
1913	30.1579	"Time and Change" by John Burroughs. *In:* Books Received [SECTION]. *The Curio Collector* (American Society of Curio Collectors, Osage, Iowa), 4(1) (April): 7. [Cover gives date as "Spring, 1913 (Second Issue)".] [Includes note, "His description of the Grand Canon is so realistic that one feels they are standing with the author on the brink of that mighty gorge." (ENTIRE NOTE)]
1913	30.713	"Field Days in California." By Bradford Torrey. *The Nation* (New York), 96(2489) (March 13): 264-265. [Grand Canyon noted in review, p. 265.]

Anonymous (*continued*)

1914	30.670	“America’s Place in Mythology” by Alexander McAllan. *In:* Book Reviews [SECTION]. *American Antiquarian*, 36(1) (January): 48-49. [Includes brief notice of McAllan’s (1913, ITEM NO. 2.4287) *Ancient Chinese account of the Grand Canyon*.] [See also unsigned editorial in this issue, pp. 44-46; and see comments in this bibliography under Alexander McAllan (1913, ITEM NO. 2.4287), Ancient Chinese account of the Grand Canyon.]
1914	30.1578	Romantic South America. *In:* The New Books [SECTION]. *The Independent* (New York), (January 5): 32-33, 35. [Review of three books on South America, including *Across Unknown South America* by A. Henry Savage-Landor (1913, ITEM NO. 21.8312). Regarding this title, the critic remarks kindly (p. 33), “His geological theories are also astonishingly original [about which refer to the citation for ITEM NO. 21.8312 herein] [. . .] He thinks the Grand Canyon of the Colorado was formed in a similar way. Suess, Penck, Powell, Dutton, Gilbert, Davis and all the other savants are dead to him. Nor does he appear, either, to have any clear understanding of the denuding power of water. Everything in his ken is produced by cataclysms.”]
1914	30.1201	Grinnell on the birds of the valley of the lower Colorado River. *The Ibis* (London), Series 10, 2 (July): 510-511. [Review of Grinnell’s “An Account of the Mammals and Birds of the Lower Colorado Valley, with Especial Reference to the Distributional Problems Presented”.]
1914	30.709	“Roughing It De Luxe”, by Irvin S. Cobb. *In:* New Books [SECTION]. *Bookseller, Newsdealer and Stationer* (New York), 41(2) (July 15): 61.

1924	30.1570	Roping Lions in the Grand Canyon, Zane Grey. *In:* Books We Have Read [SECTION]. *The Pathfinder* (Washington, D.C.), 31(1595) (July 26): 14.
1924	30.1575	Down the Grand Canyon. By Lewis R. Freeman. *In:* Narratives of Travel and Exploration [SECTION]. *The American Review of Reviews*, 70(5) (November): 558.
1924	30.1558	Down the Grand Canyon. By Lewis R. Freeman. *In:* The New Books [SECTION]. *The Saturday Review of Literature* (New York), 1(21) (December 20): 403.
1925	30.1583	“Down the Grand Canyon.” By Lewis R. Freeman. *In:* The Traveler’s Bookshelf [SECTION]. *Travel*, 44(4) (February): 42.
1925	30.1572	Evolution hymn. “The Book of the Earth [(]No. 2 of *The Torchbearers*)—Alfred Noyes—*Stokes*”. *In:* Books [SECTION]. *Time*, 6(9) (August 31): 14. [Review, including excerpt from poem on Grand Canyon, of the Frederick A. Stokes ed. of *The Book of Earth* (The Torch-Bearers—II) (Noyes, 1925, ITEM NO. 8.479).]
1926	30.1420	Sven Hedin: Gran Canon. Mein Besuch im amerikanischen Wunderland. *In:* Deutsche Bücher [SECTION]. *Ex Libris* (Revista Bibliofililor si a Carturarilor) (Cluj, România), “1926. II. Nr. 3–5” (February/March): 98. [Notice of Hedin (1926, ITEM NO. 2.3306).] [*NOTE*: Running header on page misprinted as “1925.”] [In German.]

Anonymous (*continued*)

1926	30.17	[Review of "The Colorado River Compact", by Reuel Leslie Olson.] *Engineering News-Record*, 97 (September 16): 472.
1927	30.304	[Review of "Arizona the Wonderland" by George Wharton James.] *Progressive Arizona*, 4(4): 23, 32-33.
1927	30.1605	[Review of *The Winning of Barbara Worth*.] *In:* Filmkritische Rundschau [SECTION]. *Kinematograph* (Berlin), 21(1055) (May 8):. [See The Samuel Goldwyn Company (1926, ITEM NO. 26. 476).]
1927	30.305	[Reviews of "Down the Grand Canyon" by Lewis R. Freeman, "Three Wonderlands of the West" by Thomas D. Murphy, and "The Enchanted Canyon" by Honoré Willsie.] *Progressive Arizona*, 5(2) (August): 23, 33.
1928	30.1472	*The Bride of the Colorado*—Pathe-De Mille. *From:* The Shadow Stage [SUBSECTION]. *In:* Photoplay Magazine—Advertising Section. *Photoplay Magazine*, 33(6) (May): 112. [Regarding the (never-released) silent film shot on location during the Pathé-Bray Colorado River Expedition in Grand Canyon (see Pathé Exchange, 1928, ITEM NO. 26.1367). "The Grand Canyon of the Colorado River plays the lead in this picture. It makes a beautiful spectacle and a desperate menace, but does not lend itself to real story interest. In fact, the characters and the plot are absolutely incidental to the cathedral cliffs, the whirling rapids and other stupendous beauties of the canyon. John Boles and Donal Blossom, a newcomer to pictures, have some intimate love scenes, but even here it is the background which interests." (ENTIRE ITEM)] [*NOTE*: The reference to "De Mille" (Cecil B. DeMille) is likely due to the fact that DeMille's Producers Distributing Corporation merged in 1928 with American Pathé, a parent corporation to Pathé Exchange. DeMille had no role in the production of this film.]
1929	30.1301	The Ambrose Bierce mystery. *The American Mercury*, (September): 124-126. [Review of "Life of Ambrose Bierce", by Walter Neale. Takes note of Neale's conjecture that Beirce committed suicide somewhere at Grand Canyon.]
1929	30.18	"Down the World's Most Dangerous River", by Clyde Eddy. *Engineering News-Record*, 103 (November 21): 820.
1931	30.425	Historical news and comments. *Mississippi Valley Historical Review*, 17(4) (March): 682-690. [See p. 687, notice of "I Married a Ranger" by Mrs. "White Mountain" Smith.]
1934	30.1595	"Grand Canyon Country", by M. R. Tillotson and Frank J. Taylor *In:* Interesting Library Accessions [SECTION]. *Civic Comment* (American Civic Association, Washington, D.C.), (45)("Oct/-Jan., 1934" [October 1934-January 1935]): 13. [Specific edition is not indicated.]

Anonymous (*continued*)

1936	30.1244	The Colorado delta. *In:* Recent Publications [SECTION]. *Geographical Review*, 26(1) (January): 145. [Advance notice of "The Colorado Delta" by Godfrey Sykes (1937, ITEM NOS. 11.10450/11.10453, 11.701/11.10452, 12.7221/12.7222).]

B., W. W.

1882 30.1312 “Physics of the Earth’s Crust.” By the Rev. Osmond Fisher. *In:* Literature [SECTION]. *The Engineer* (London), 53 (June 9): 420-421. [See p. 421: Regarding Fisher’s postulation (quoted) that “ocean basins are not caused by depressions in the upper surface of a crust of the same density as that beneath the continents, but that they are due to a greater density and general depression of the sub-oceanic crust.” (This quotation is from p. 179 of Fisher.) W. W. B. then independently observes: “Why the crust should be of so much or any greater density under the ocean than at the same depth under continents is not shown; but it is assumed [by Fisher] that it is so, otherwise the waters of the ocean, it is argued, would be so attracted by the northern continents as to make the mean level of the sea greater there than at the south. We have never seen it proved that this is not the case, nor has it been shown that the Colorado river is much higher at its edges than in the middle where it runs through canons several thousands of feet in depth.” (Fisher does not mention the Colorado River in this context.)]

Potentially Offensive Material Cited Separately

Part 30 includes citations of items that contain potentially offensive material, with sexual or other matter that some users, for religious, moral, or personal reasons, may not wish to encounter. The pertinent citations are grouped in this Supplement. It is additionally important to segregate these citations as this is an internationally focused bibliography with an international audience, whose particular perspectives may not be known to this compiler. The cited items themselves may contain explicit material but a few of them do not; yet these, too, are segregated because the serials in which they appear do contain such matter. (Off-color language is not considered reason for segregation.)

Mussell, Gary

2005 30.603 Movie review: *The Same River Twice*. *In:* The Movie Buff [SECTION]. *SCNA Naturist Review* (Southern California Naturist Association, Calabasas), 1(4) (July): 12. [Review of the film by Robb Moss (2003, ITEM NO. 26.409 in the Supplement to Part 26).] [*NOTE*: Serial contains material for mature audience (nudity).]

NEWSPAPER GUIDE FOR THE GRAND CANYON AND LOWER COLORADO RIVER REGIONS

Brief guide to newspapers of the Grand Canyon and lower Colorado River regions

GO TO VOLUME CONTENTS PAGE
GO TO BIBLIOGRAPHY TABLE OF CONTENTS

NOTES FOR PART 31

NEWSPAPERS are not generally included in THE GRAND CANON. There are, however, some exceptions, notably *The New York Times* and the *Deseret News* (Salt Lake City) (see below). In other instances a newspaper is cited in THE GRAND CANON if an article had been reprinted later in another periodical; the original source is acknowledged in a comment at the end of the citation.

Special-interest newspaper-format periodicals are included in the bibliography; for example, *High Country News*, a mostly biweekly serial, later tri-weekly. Some weekly newspapers, and weekly magazines included with newspapers, are also cited herein; for example, *Computerworld*, and *Flare* from the *Arizona Daily Sun* (Flagstaff).

Part 31 comprises a listing of regional newspapers that some readers may wish to use to begin locating local (or sometimes online) sources.

Regarding fuller coverage from selected newspapers, citations from which appear in other parts of this bibliography

The New York Times. From *The New York Times* as many pertinent articles as possible have been cited in so far as they relate to the Grand Canyon and lower Colorado River. This newspaper was published from the beginning of modern excursions into the region, in the mid-19th century. It is as well a well-recognized periodical that is widely available online and through microform products. The *Times* is relegated to its own section of this bibliography; one section is arranged chronologically (Part 3, Section 1). At the time that this bibliography was started, the only way to access back issues of the *Times* was through microfilm, which for this title was widely available and thus a prudent addition to this bibliography. Now the *Times* is wholly accessible online,[127] although for recent years not always in facsimile presentation or sometimes omitting appropriate pagination. The online version, though, is completely searchable. The online material includes ephemeral, online-only articles (not listed in THE GRAND CANON).

The Deseret News. A purposeful comparison has been made in this bibliography to include citations from a western regional analog to *The New York Times*, this being the *Deseret News* (Salt Lake City), the oldest continuously published newspaper in Utah, now a daily production. Citations from the *Deseret News* are included as appropriate within the subject-specific sections of the bibliography. The *Deseret News*'s earliest years (1850–1910) are now freely available online[128], and a conscious decision was thus made for THE GRAND CANON to include pertinent citations from these years because, like the *Times*, they cover the period beginning with modern explorations of the region. *Deseret News* (originally a weekly, becoming semiweekly in 1865 and daily in 1899—although earlier it was concurrently a weekly and semiweekly as *The Deseret News* and daily as *The Deseret Evening News*) is cited herein as *Deseret News*; most citations are from the weekly edition, the one posted online. Its citations to 1910 include many articles and notes that relate to the geographical coverage area of THE GRAND CANON. They are important to include herein because they have a Mormon perspective of concerted efforts of church and individuals to colonize and economically develop the resources of the region beyond the Utahn border, from Lees Ferry to deep along the lower Colorado River corridor. And as well, the selection of news items reflects *Deseret News*'s editorial slants on activities in neighbor states and the lower Colorado River corridor. Most telling is the newspaper's own Prospectus, which intended the periodicals to be *documents of record* from the start: "A paper that is worth printing, is worth preserving; if worth preserving, it is worth binding; for this purpose we issue in pamphlet form; and if every subscriber shall preserve each copy of the 'News,' and bind it at the close of the volume, their children's children may read the doings of their fathers, which otherwise might have been forgotten; ages to come."[129] Today, the complementary concept of binding is the searchable digitized page; for the next age.

---

[127] http://www.nytimes.com.

[128] Utah Digital Newspapers, http://digitalnewspapers.org.

Since most of the citations from the *Deseret News* have been taken from the online postings of this newspaper, take note that the pagination reflects the pages as counted in each online issue. This is because the online postings do not usually preserve original pagination. In actuality, the newspaper is paginated, at least in its early years, consecutively through entire volumes. To accommodate this lack of online pagination, notations have been inserted into the citations in this bibliography noting "issue pagination", which begins with page 1 of each issue as denoted in the online postings. Users who refer to an issue will have to count forward from the first page to reach the item in question.

[129] Prospectus. Deseret News. *Deseret News*, Vol. 1, no. 1 (June 15, 1850), p. 1.

Introduction

Newspapers are a valuable resource to the historian. Long-running papers of any town or city are important historical documents, and to researchers who thrill in finding the obscure and unusual anecdote, small-town and out-of-print newspapers are a mine of information. Yet for a very long time their precarious existence and assured demise has been a matter of concern. In discussing "Newspaper Collections", the Kansas State Historical Society worried in 1881:

> It is conceded that nothing so well exhibits the history of the growth of a community, or makes so complete a record of its important events, as the files of its newspapers; yet there is nothing concerning the preservation of which there is so little care.[130]

Newspapers are made to be thrown away. They can be reused in many ways, but ultimately most of them disappear. Only a few might survive, dutifully kept by a library; sometimes by an infatuated collector. Many papers are now known only by their names. Others have been microfilmed and digitized—and so *they* survive. Yet the bibliographical crime of microfilming or digitizing newspapers—*and then* discarding the originals—has been addressed in many venues. It is hardly the purpose here to document these deeds, but only to say that the problem is recognized. In many cases, the copies suffice, although the feel of the original is lost; sometimes, as with the case of microfilms, any color is lost, not to mention that details in resolution or image quality often suffer. Still, it is through the newer media that the original products will be experienced now by most readers.

This list of newspapers is not exhaustive, nor is there any guarantee that all of them have had coverage of events or people of the immediate Grand Canyon or lower Colorado River regions. But within these regions it is likely that newspapers published there have had a higher frequency of canyon- and river-related items than the newspapers of more distant places. Naturally, they will have some measure of robust coverage for their immediate areas. It would be very desireable to compile a separate bibliography of newspaper items—just for the region embraced by this bibliography. However, even this focus would require thousands of hours of reading from online, microfilmed, and original newsprint copies, many of them difficult to find, which imaginatively could be a lifetime's task.

The earliest newspaper of the greater Grand Canyon region appears to have been the semiweekly *Arizona Gazette* (Prescott), beginning in 1866, although the *Arizona Daily Miner* (Prescott) began at about the same time. Several other newspapers started in the late 1860s, and a majority of papers began in the 1870s-1890s; most, however, were short-lived.

---

[130] *Transactions of the Kansas State Historical Society. First and Second Biennial Reports, together with a statement of the collections of the society, from its organization, in 1875, to January, 1881. Vols. I and II* (Geo. W. Martin, Kansas Publishing House, Topeka, 1881), Vol. I, p. 11.

In Yuma, the earliest newspaper was apparently the weekly *Arizona Free Press*, beginning in 1871.

More and more early newspapers from across the country are being made available online; practically, though, most of the existing ones have not been digitized. Some titles may be available on microfilm, but are not digitized. Libraries can assist the researcher in finding the repositories of these newspapers.

This sampling of newspapers of northern Arizona, southern Utah, southern Nevada, and southeastern California were published within the bounds covered by THE GRAND CANON. Pertinent newspapers from Mexico are added.

In addition, these citations are examples of newspaper listings for specific purposes within portions of the area covered by this bibliography:

Camarena, Abel

2005 31.147 Newspapers used for publication of legal notices in the Southwestern Region, which includes Arizona, New Mexico, and parts of Oklahoma and Texas. *Federal Register*, 70(75) (April 20): 20521-20522. [U.S. Forest Service; includes Kaibab National Forest: "Notices for Availability for Comments, Decisions and Objections by Forest Supervisor and North Kaibab District and Tusayan District and Williams District Notices are published in: —"*Arizona Daily Sun*", Flagstaff, Arizona." (p. 20521)]

Montoya, Danny

2015 31.167 Department of Agriculture; Forest Service; Newspapers used for publication of legal notices in the Southwestern Region, which includes Arizona, New Mexico, and parts of Oklahoma and Texas. *Federal Register*, 80(64) (April 3): 18188-18190.

Zepeda, Gilbert

2010 31.148 Newspapers used for publication of legal notices in the Southwestern Region, which includes Arizona, New Mexico, and parts of Oklahoma and Texas. *Federal Register*, 75(72) (April 15): 19609-19610. [U.S. Forest Service; includes Kaibab National Forest: "Notices for Availability for Comments, Decisions and Objections by Forest Supervisor, North Kaibab District, Tusayan District, and Williams District Notices are published in: —"Arizona Daily Sun", Flagstaff, Arizona." (p. 19609)]

In addition, take note of the following compilation of clippings in facsimile for Yuma and vicinity:

Canfield, Kalene

2022 31.282 [COMPILER] *News clippings from Yuma, Arizona, 1859-1874 : includes Fort Yuma, Yuma Depot and Arizona City.* [No imprint], [unpaginated] [*ca.* 400+ pp.]. [Compiler's name appears only on cover and spine. An on-demand publication.] ["Newspapers seen in this book: Arizona Citizen [Tucson], The Arizona Miner [and Arizona Weekly Miner, Prescott], and The Weekly Arizonian [Tucson]" [also Arizona Sentinel, Yuma] (from p. [3] and back cover, with emendations here). Facsimile reproductions of clippings; dates and newspaper titles indicated. Note that these clippings pertain to Yuma-vicinity news as reported in geographically dispersed papers. Apparently produced as a genealogical researcher's reference inasmuch that there is a brief list of family names on p. [3] and back cover.] [*NOTE*: There also is at least one other comparable volume for Searchlight, Nevada, but which was unavailable when an attempt was made to acquire it in 2023, thus it has not been seen. Its format seems to be identical to the Yuma volume.]

See also the end of Part 31 for citations of the informal newspapers prepared by Grand Canyon companies of the Civilian Conservation Corps during the 1930s and 1940.

Newspapers prepared by Grand Canyon companies of the Civilian Conservation Corps during the 1930s and 1940

The Center for Research Libraries (www.crl.edu) provides access to newspapers produced by companies of the Civilian Conservation Corps; usually they were mimeographed and the series short-lived. Robert W. Audretsch's history of the CCC at Grand Canyon[131] includes a synopsis of these productions as recorded by CRL, which is drawn upon and rearranged here for these citations. The dates given are ranges for individual copies noted by CRL's sources. Audretsch notes, "more were likely published."

Titles grouped alphabetically

31.150	*Ace in the Hole*	Company 818	1935 December 25–1936 March 1
31.151	*CCC Company 847, Grand Canyon, Arizona 1936*	Company 847	1936 [yearbook]
31.152	*C.C.C. Yearbook*	Company 819	1933–1934
31.153	*The Call of the Kaibab*	Company 818	1936 September
31.154	*Grand Canyon Echoes*	Company 819	1936 February 15–1940 June
31.155	*The Kaibab*	Company 818	1935 August
31.156	*The Keystone*	Company 3318	1940 August
31.157	*Voice of 847*	Company 847	1937 April 1–1937 September
31.158	*Voice of the Pack*	Company 847	1936 March 15–1937 February 1
31.159	*Watchtower*	Company 2833	1937 January–August

THE GRAND CANON

A WORLDWIDE BIBLIOGRAPHY OF THE GRAND CANYON AND LOWER COLORADO RIVER REGIONS
IN THE UNITED STATES AND MEXICO

32

MARGINALIA RELATING TO THE GRAND CANYON OR LOWER COLORADO RIVER REGION

Items not about the Grand Canyon or Colorado River *per se* but having a venue in the Grand Canyon or related area in the vicinity, items unrelated to but utilizing the Grand Canyon in non-metaphorical senses such as topics used with direct application to the Grand Canyon without occurring there; and occasional items similarly relating to the lower Colorado River region

GO TO VOLUME CONTENTS PAGE
GO TO BIBLIOGRAPHY TABLE OF CONTENTS

OVERVIEW. This part contains citations which are themselves not about the Grand Canyon but refer to the Grand Canyon as a venue—for example, meetings and conferences about subjects other than the Canyon held at Grand Canyon. Similarly there are marginal references to nearby Grand Canyon locales, which are embraced within this bibliography, and significant commemorative uses of the Grand Canyon name. While these citations do not specifically contain information about the Canyon, they are peripherally a part of the history, awareness and responsiveness to the Canyon, emphasizing its cultural reach globally and in human attentions. Similarly, a few items relating to the lower Colorado River are noted here. Occasional items may relate directly to the history of these regions; while not specifically mentioning them, the publication may be used in support of historical studies.

RELATED MATERIAL

As a world wonder, the nominal attribute, "Grand Canyon", has been copied and rephrased for hundreds of other locales the world over, and on other celestial bodies. In some fashion, formally, or far more often informally, these places are called "The Grand Canyon", the "Grand Canyon of" a certain place, and variously as "another" Grand Canyon of one sort or another. The name has also been incorporated into analogies, metaphors, and various neological constructs. For a comprehensive gathering, see Volume 3 of THE GRAND CANON, *Grand Canyon, Colossal Mirror : the Term "Grand Canyon" as Used in Geographical Nomenclature, Analogy, Metaphor, and Neology : with an Appendix on Colorado River Nomenclature*.

DATED PUBLICATIONS, GROUPED BY YEAR

1879 32.100 *Southern Colorado. Historical and descriptive of Fremont and Custer Counties with their principal towns. Cañon City, and other towns, Fremont County. Rosita, Silver Cliff, Ula, and Wet Mountain Valley, Custer County. With a description of the immense mineral regions of Fremont and Custer Counties. Illustrated.* Cañon City, Colorado: Binckley and Hartwell, 136 pp. [See "The Awful Chasm! Wonders of the Grand Cañon of the Arkansas." (pp. 38-42 including two plates). Not pertaining to the region covered by this bibliography, but cited here for its remarkable, extensive prose precisely like that used to describe the Grand Canyon of Arizona, following John Wesley Powell's writings and prior to those of Clarence Edward Dutton. The text even immediately introduces an extensive quotation by "Maj. Pangborn, in the 'Rocky Mountain Tourist' of 1878", referring to him also as "the Major". Further, Grace Greenwood, "the pet author of Coloradoans" is quoted about the Royal Gorge, noting that this "Grand Canyon" is "grander than the Yosemite", and, "If you, reader, come to Colorado, do not fail to see this cañon. It is next to the great cañon of the Columbia river." There are not even any implied references to the Grand Canyon of Arizona. This item could not be overlooked for inclusion in this bibliography.]

1892 32.67 The brush incandescent machines. *Engineering Mechanics*, (September): 242. [See volume index, under "Trade Notices": "Brush Incandescent Machine—Atlantic & Pacific R.R. and Grand Canyon".]

Lansing, Paul, AND Cropper, Ardeth P.

1990 32.108 *Kaibab: a simulated community.* Edina, Minnesota: Alpha Editions (Burgess International Group, Inc.), 2nd ed., 307 [310] pp. [“Kaibab” is a fictitious community contrived to allow students in a variety of human-issues classes to assume roles within the hypothetical setting as a means of interacting within real-life situtations. The authors are affiliated with Northern Arizona University, Flagstaff. The name “Kaibab” is supposed here to be derived from the “Babiak” tribe of Native Americans. Extensive “historical background” on the community and region are also provided.]

Leclair, Steven R., AND Pao, Yoh-Han

1999 32.95 (EDS.) *Artificial Intelligence in Real-Time Control 1998: A proceedings volume from the 7th IFAC Symposium, Grand Canyon National Park, Arizona, USA, 5-8 October 1998.* Pergamon Press. [International Federation of Automatic Control.]

Lewis, C. S. [Lewis, Clive Staples]

1933 32.127 *The pilgrim’s regress : an allegorical apology for Christianity, reason and romanticism.* London: J. M. Dent and Sons, 255 pp. [1st ed. This title in numerous reprintings to date under other imprints and in translations.] [See “Book Five; The Grand Canyon”, “Book Six; Northward Along the Canyon”, “Book Seven; Southward Along the Canyon”, “Book Nine; Across the Canyon”.] [The Grand Canyon is the allegorical representation of *Peccatum Adae*, or the Sin of Adam (see at the end of “Mother Kirk’s Story”, chapter II of Book Five).] [*NOTE*: *The Pilgrim’s Regress* is widely recognized as Lewis’s first religious book and first work of fiction, which of course was formulated after the classic 1678 Christian allegory by John Bunyan, *The Pilgrim’s Progress* [full citation for first ed.: John Bunyan, *The pilgrim’s progress from this world, to that which is to come: Delivered under the similitude of a dream wherein is discovered, the manner of his setting out, his dangerous journey; and safe arrival at the desired countrey.* London: Printed for Nath. Ponder at the Peacock in the Poultrey near Cornhil, 1678]. Given the allegorical nature of Lewis’s *The pilgrim’s regress*, and likewise “The Grand Canyon” in it, since the *real* Grand Canyon is not even a fictional participant it seems pointless for this bibliography to wade into the reservoir of editions, printings, and translations, save to mention that Lewis provided additional details in its 2nd and 3rd editions. Literary scholars and students have closely followed the tales and printings alike of both titles. Refer also to the note with the Wade annotated edition (Lewis, 2014, ITEM NO. 32.128).]

2014 32.128 *The pilgrim’s regress : Wade annotated edition.* (Ed., introduction by David C. Downing; illustrated by Michael Hague.) Grand Rapids, Michigan, and Cambridge, United Kingdom: William B. Eerdmans Publishing Co., xxiv, 239 pp. [See “Mappa Mundi” (p. 3); “Book Five; The Grand Canyon” (pp. 69-89), “Book Six; Northward Along the Canyon” (pp. 91-107), “Book Seven; Southward Along the Canyon” (pp. 109-136); “Book Nine; Across the Canyon (p. 165-177).] [*NOTE*: “Grand Canyon” is dramatically present, and labeled, in the “Mappa Mundi” redrawn for this edition. Lewis’s (1933, ITEM NO. 32.127) original endpapers map does not show it as prominently, nor is it labeled thereon. Lewis’s original map is also figured on p. 218 of this Wade edition.]

The Leipzig Imprints of Balduin Möllhausen's *Reisen in die Felsengebirge Nord-Amerikas bis zum Hoch-Plateau von Neu-Mexico* (1860, 1861)

Balduin Möllhausen's *Reisen in die Felsengebirge Nord-Amerikas bis zum Hoch-Plateau von Neu-Mexico, unternommen als Mitglied der im Auftrage der Regierung der Vereinigten Staaten ausgesandten Colorado-Expedition* ('Travels into the Rocky Mountains of North America to the High Plateau of New Mexico, undertaken as a member of the Colorado Expedition on behalf of the United States Government') was issued under two imprints in Leipzig, both consisting of two volumes. One imprint is that of Otto Purfürst (undated and presumed to be 1860), the other is that of Hermann Costenoble (1861). Alexander Edelmann of Leipzig was the printer for both imprints as well as the lithographs in those volumes.

The *Reisen* is Möllhausen's account of his participation in the Colorado River exploring expedition under the command of Lt. Joseph C. Ives during 1857–1858. The expedition ascended the Colorado River in a purpose-built steamboat, from the river's mouth in the Gulf of California, to Black Canyon. After nearly wrecking the boat there, a brief exploration by skiff reached the confluence of Las Vegas Wash, not far upstream from where today stands Hoover Dam. Returning to Beale's Crossing, a land component of the expedition left the river, traveling eastward to Fort Defiance, New Mexico Territory (in today's Arizona). On that trek they visited the Grand Canyon twice — first a descent to the Colorado River in Peach Springs Canyon and Diamond Creek, and second, a partial descent to Cataract Creek (Havasu Canyon). (See the *Appendix* herein for more information about Möllhausen and the expedition.)

The U.S. Congress published Lt. Ives' formal report of the expedition in 1861, which appeared after the Möllhausen volumes (and after Ives had defected to the army of the Confederate States of America). If the presumed date of the [1860] imprint is correct, it demonstrates that Möllhausen's memoir on the Colorado River expedition was published perhaps nearly a year before Ives' *Report* reached its readers and libraries.

Erſter Band.

Leipzig,
Hermann Coſtenoble.
1861.

Hermann Costenoble imprint (1861). Volume 1 is shown.

One contemporary notice (from 1861) cites an 1860 date, though not the publisher:

> Möllhausen, Balduin v. Reisen in das [*sic*] Felsengebirge Nordamerika's. 2 Thl. 8. Leipzig 1860. [132]
>
> [. . . 2 Thaler. Octavo. Leipzig 1860.]

The price of 2 Thaler for one volume discounts the projected price of 6½–6⅔ Thaler for two volumes that was noted in an advance advertisement from Costenoble *(see farther below)*. It might have been for the less-economically bound Purfürst imprint *(as described later herein)*, then being readied. This notice seems to have been only for the first volume.

Another early announcement, for the Costenoble imprint, described the offering:

> 1 Bd. Leipzig, Costenoble. 1861, XVI u. 455 S. Lex.-8. (n. 3 Thlr. 12 Ngr.) [133]
>
> [1 volume. Leipzig, Costenoble. 1861, xvi and 455 pp. Octavo sheets. (3 Thaler 12 Neu-Groschen.)]

"XVI u. 455 S." corroborates that the pagination is that for Volume 1. The price listed for one volume is in line with the projected price for the two-volume set from Costenoble *(see below)*.

The fact that these notices provide a separate, single-volume price may also indicate that Volume 1 was available in advance of Volume 2, or it may show that review copies of the volume, in advance of both, were distributed.

From December 1860, an anonymously written synopsis of the two-volume *Reisen* from Costenoble cites:

> Leipzig, H. Costenoble, (zwei starke Bände, gr Oct. [groß Octavo]) 1860. [134]
>
> [Leipzig, H. Costenoble, (two hardbound volumes in large octavo) 1860.]

---

[132] Notizen. *Vierteljahrsschrift der Naturforschenden Gesellschaft in Zürich*, Vol. 6 (1861), no. 2, p. 211.

[133] "(2879) Reisen in die Felsengebirge Nord-Amerikas bis zum Hoch-Plateau von Neu-Mexico . . .", *Leipziger Repertorium der deutschen und ausländischen Literatur*, Volume 71 (1860), pp. 19-23. It is possible that the summary, if not provided by the publisher, was written from an advance copy of Volume 1 of the *Reisen*, which is xvi + 455 pp. Further, a cataloging notation in the Harvard University Library copy of this serial states that the earliest livraisons of Vol. 71 of the *Leipziger Repertorium* were received(?) 30 October 1860.

[134] "Balduin Möllhausen's Expedition nach dem Coloradofluss," *Magazin für die Literatur des Auslandes*, Vol. 29, no. 49 (4 December 1860), p. 577.

This could have been a pre-publication announcement for the work that would be available in 1860 through Purfürst, relying upon an announcement from the primary publisher, Costenoble.

For the Costenoble imprint, advertisements were placed inside other publications issued by the firm. For example, the display ad below, which appeared in 1861, was obviously prepared before the Möllhausen volumes had gone to press, since it advertises only a projected price for them and that their collation had as yet not been finalized.

> Im Verlage von Hermann Costenoble in Leipzig erschienen ferner:
>
> Reisen in die Felsengebirge Nord-Amerikas bis zum Hoch-Plateau von Neu-Mexico, unternommen als Mitglied der im Aufstrage der Regierung der Vereinigten Staaten ausgesandten Colorado-Expedition. Von Balduin Möllhausen. Mit 12 vom Verf. nach der Natur aufgenommenen Landschaften, Abbildungen von Indianer-Stämmen, Thier- und Pflanzenbildern in Farbendruck. Eingeführt durch zwei Briefe Alexander von Humboldt's in Facsimile. Zwei starke Bände von circa 65 Bogen Lexicon-Octav. Preis complett circqa 6½ Thlr. bis 6⅔ Thlr. [135]
>
> [Also published by Hermann Costenoble in Leipzig: Travels into the Rocky Mountains of North America to the High Plateau of New Mexico, undertaken as a member of the Colorado Expedition on behalf of the United States Government. By Balduin Möllhausen. With 12 landscapes taken by the author from nature, illustrations of Indian tribes, animal and plant pictures in color print. Introduced by two letters from Alexander von Humboldt in facsimile. Two hardbound volumes of around 65 octavo sheets. Price complete about 6½ Thaler up to 6⅔ Thaler.]

The same promotion also appeared in Volume 4 of the *Literarischer Wegweiser für gebildete Laien*, for 1859–1860, but concluded with more definite information:

> Ferner erschien bei Hermann Costenoble in Leipzig: . . . Zwei starke Bände von 65 Bogen Lexicon-Octav. Preis compl. 6 Thlr. 24 Ngr. [136]
>
> [Also from Hermann Costenoble in Leipzig: . . . Two hardbound volumes of 65 octavo sheets. Price complete 6 Thaler 24 Neu-Groschen.]

---

[135] [Advertisement.] In *Elizabeth Charlotte, herzogin von Orleans : Ein biographischer Roman von A. v. Sternberg. Dritter Band.* (Hermann Costenoble, Leipzig, 1861), p. [263].

[136] Karl Klüpfel, *Literarischer Wegweiser für gebildete Laien. [Vierter Nachtrag] Die Jahre 1859–1860* (Verlag von Gustav Mayer, Leipzig, 1860), p. 94.

In Volume 5 of that series, for 1861–1862, a simple listing is more definite, though it, too, continues to cite the 1860 date:

> "2 Bde. mit 12 Bildern in Farbendruck u. 1 Karte. Lex. 8. (XXVI u. 861 S.) Leipzig 1860, Costenoble. n. 6 Thlr. 24 Ngr. [137]
>
> [2 volumes with 12 color prints and 1 map. Octavo sheets. (xxvi and 861 pp.) Leipzig 1860, Costenoble. 6 Thaler 24 Neu-Groschen.]

In addition to the Leipzig editions, Wagner and Camp also cite, "Howes and Sabin list another German edition, Jena, 1861 . . ." [138] Howes does not specify different imprints for the Leipzig printings. I have not been able to locate the 1861 Jena imprint; however, I provisionally accept it on these authorities, in the absence of contrary or clarifying information.[139]

The Purfürst imprint has been attributed a date of 1860. If correct, this is notable because it will have preceded certainly by many months the publication of the official report of the Colorado River expedition by its commander, Lt. Ives, that was published, by order of Congress, by the U.S. Government Printing Office later in 1861. It thus would also contain the first general and scientific descriptions of the Grand Canyon region, in that Möllhausen's observations would precede those published both by Ives (particularly his "General Report," Part I in the volume) and the "Geological Report" by John Strong

---

[137] Karl Klüpfel, *Literarischer Wegweiser für gebildete Laien. [Fünfter Nachtrag] Die Jahre 1861–1862* (Verlag von Gustav Mayer, Leipzig, 1862), p. 48. [The reference to a "map" is actually a sketch map placed as a figure facing p. 144 of Volume 2 of the *Reisen*, and which illustrates supposed migrations of Native American peoples in the greater Southwest.]

[138] Henry R. Wagner and Charles L. Camp, *The Plains and the Rockies : a Critical Bibliography of Exploration, Adventure and Travel in the American West, 1800-1865* (Revised and enlarged by Robert H. Becker) (John Howell—Books, San Francisco, 4th ed., 1982), p. 636. (The 1920 edition noted, "The preface is dated Potsdam, May, 1860, and the above undated edition probably appeared in that year." [Henry R. Wagner, *The Plains and the Rockies : a Contribution to the Bibliography of Original Narratives of Travel and Adventure, 1800-1865* (John Howell, San Francisco, 1920), p. 146.])

[139] Wright Howes (compiler), *U.S.iana (1650-1950) : a Selective Bibliography in Which are Described 11,620 Uncommon and Significant Books Relating to the Continental Portion of the United States* (R. R. Bowker Co., New York, *for* The Newberry Library, revised, enlarged ed., 1962). Joseph Sabin, *A Dictionary of Books Relating to America, from its Discovery to the Present Time. Volume XII* (Joseph Sabin, New York, 1880), p. 277.

Newberry[140] (Part III in the volume). Möllhausen, however, does credit his geological information to Newberry, for whom he was a field assistant in addition to his artistic duties.

Storm, who misread the German Fraktur in listing one imprint as Otto "Burfurst," indicates, "The probable date of publication is 1860."[141] Storm, and Wagner and Camp, both list undated Purfürst printings. Farquhar[142] cites the 1861 Costenoble imprint only. Howes does not list different imprints, although it is clear from his two citations that he had both the undated Purfürst imprint (for which he listed the date as "[1860?]") and the Costenoble imprint. The Library of Congress offers the date "[1861]" for the Purfürst imprint; the Costenoble imprint does not appear in its catalog. The *National Union Catalog, Pre-1956 Imprints*[143] lists both imprints, including the Library of Congress data for the Purfürst imprint.[144] The undated printing is the only documented Purfürst imprint; the only 1861 dated imprints are those of Costenoble (Leipzig) and, apparently, the Jena imprint of Costenoble cited by Howes and Sabin. The Costenoble imprint noted anonymously in an 1860 synopsis has not been seen, thus it is unknown whether or not the title-page in fact carried a date.

---

[140] John Strong Newberry, "Geological Report" *in* J. C. Ives, *Report upon the Colorado River of the West, explored in 1857 and 1858* (Government Printing Office, Washington, 1861, Part III, 154 pp. [separately paginated part in volume], with four maps in volume pocket) (U.S. 36th Congress, 1st Session, Senate Executive Document [no number].) [The Ives volume also appeared as the identical House Executive Document 90 but omitted the two geological maps.]

[141] Colton Storm (compiler), *A catalogue of the Everett D. Graff Collection of Western Americana* (University of Chicago Press, Chicago, *for* The Newberry Library, 1968), p. 430.

[142] Francis P. Farquhar, *The Books of the Colorado River and the Grand Canyon: a Selective Bibliography* (Glen Dawson, Los Angeles, limited ed., 1953).

[143] Library of Congress; and American Library Association, Resources and Technical Services Division, Resources Committee, National Union Catalog Subcommittee (compilers), *National Union Catalog : Pre-1956 Imprints* (Mansell Information/Publishing Ltd., [London], 1975), Volume 389.

[144] The citation of a *dated* 1861 Purfürst imprint cited in Spamer's *Bibliography of the Grand Canyon and the Lower Colorado River* (Grand Canyon Natural History Association, 2nd ed., 1990) is an error.

The conjectural 1860 date for the Purfürst imprint may have been based by earlier writers on the signed date of Möllhausen's preface, May 1860 (see Volume 1, p. xii), there being sufficient time to publish the book before the end of 1860.

In addition, there are the single-volume pricing notices from 1860, without mention of a publisher's name *(see farther above)*, which seem to have indicated ready or imminent availability. However, at this time I have seen no evidence that indicates even which of the two imprints, Purfürst or Costenoble, was actually the first to be distributed; this despite the fact that p. [456] of Volume 1 is an advertising page for publications from Hermann Costenoble — the page is present in *both* the Costenoble and Purfürst printings. I note here that only the Costenoble imprint was noticed in the "Geographische Literatur" section of an 1861 issue of *Petermanns Geographische Mitteilungen*[145], a definitive contemporary compendium of world geographic information and literature; but the Costenoble imprint may have been the only copy received.

Specific accession dates of this title by libraries or individuals are presently not determined.

The two volumes of the Purfürst imprint that had belonged to historical bibliographer Wright Howes are in the Dechert Collection of the Rare Books Collection in the Van Pelt Library, University of Pennsylvania, Philadelphia. A writer, presumably Howes, has written inside the front cover of Volume 1 (square brackets are those of that writer):

> *Account of the 1857-8 Ives-Newberry Exped.—and has never been tr. into English*
> *Complete with map, facsimile + 12 plates in color ordinarily seen in dated edn. of*
> *1861. Wagner-Camp 362—says this [undated] First Edn was probably pubd in 1860.*

Also written inside this cover is "*Ed. 1.*" Robert Dechert himself annotated,

> *Wright Howes's cop. bought by RD (Chicago, 1952) $40^{00}*

---

[145] "Balduin Möllhausen's Reisen in die Felsengebirge Nord-Amerika's bis zum Hoch-Plateau von Neu-Mexiko, unternommen als Mitglied der im Auftrage der Regierung der Vereinigten Staaten asugesandten Colorado-Expedition" *in* Geographische Literatur [section], *Mittheilungen aus Justus Perthes' Geographischer Ansalt über Wichtige Neue Erforschungen auf dem Gesammtgebiete der Geographie von Dr. A. Petermann* [*Petermanns Geographische Mitteilungen*], 1861, Heft 3, pp. 125, 126.

Two volumes of the Costenoble 1861 imprint were seen in the library of Philadelphia's Balch Institute for Ethnic Studies. A note pencilled inside one volume indicates that the set was purchased for $600.00 in 1972.[146]

A third set of volumes was seen in the library of the American Museum of Natural History (New York City). The set is of mixed imprints: Volume 1 is the Costenoble and Volume 2 is Purfürst. These volumes appear to have originally been already a mixed set in an institution in Hungary, as both volumes include the same stampings and ink marks. On both title-pages a large "605" was penned in the Hungarian repository, then laid over by a piece of paper having on it a heraldic design with a lion and shield; surrounding the overlay is a stamped inked ring. Inside the front covers of both volumes is noted in pencil, apparently by a librarian in the American Museum, "*8/19/1920 collated O.K.*"

In comparing the text and illustrations of the two Leipzig imprints, other than the imprints themselves, and a slight difference in typography on the title-pages, there is no difference between them other than a few points regarding plate placements in the Purfürst printing that do not exactly correspond to the list of illustrations that appears in Volume 2, p. [x], of both imprints. The paper used in the books, and the quality of printing of the lithographs, appear to be the same in the two imprints.

The bindings of the American Museum set differ. Volume 1 (Costenoble) is in boards with somewhat coarsely woven cloth glued to the spine and outside corners; the front and back boards are laid over with green paper, which wraps just to the inside margins of the boards. Volume 2 (Purfürst) has on the front board a trimmed quadrangle of buff-colored paper on which is printed the same text block as that which appears on the title-page but with an ornamental border added. On the copies seen, there is no indication that Volume 1 ever had the title overlay, and the binding of Volume 2 is not handsome.

The Costenoble imprint has been seen in boards with textured royal-blue cloth; a royal coat of arms is gilt embossed on the front covers; and the spine is black cloth, ribbed, with gilt stamping. That the publication was dedicated by Möllhausen to the Prussian prince Friedrich Wilhelm Ludwig, and that there is greater care and expense of binding and plate collation in the Costenoble printing, is circumstantial evidence that this imprint would have been more suitable for presentation copies. That the Purfürst imprint is more economically bound suggests that it is a lower-cost production for wider distribution. Whether or not the miscollation of plates seen in the Wright Howes copies of the Purfürst imprint is consistent in all copies distributed has not been determined, although Wagner and Camp also note miscollated plates. The Dechert Collection copies also contain pencilled annotations on the plate-list page (vol. 2, p. [x]), apparently by Howes, which note miscollated plates.

---

[146] The Balch Institute, dedicated to immigration and ethnic studies, made its first library accessions in 1971. In 2001 the library was transferred to the Historical Society of Pennsylvania, in Philadelphia.

The mixed-imprint American Museum set seems to have been rebound, as noted. Each has dark-green marbled boards; the spines are textured brown cloth with gilt stamping in Fraktur. All three exposed edges of the text block are marbled. The inside front cover of Volume 1 includes an inked bookseller's stamp illustrating a book with the text "Pozsony DRODTLEFF RUDOLF Pressburg" [Rudolf Drodtleff, Pozsony (in Hungarian), Pressburg (in German)[147]].

Another mixed-imprint set (Volume 1, Costenoble; Volume 2, Purfürst) is seen in the Linda Hall Library of Science, Engineering & Technology *(illustrated at the beginning of this pamphlet)*. Each volume carries the "naughty" bookplate of the "Marquis de La Valette Peredon" (Félix de La Valette-Peredon, *le marquis de La Valette*, 1806–1881), thus of identical provenance, but information about the bindings cannot be established, both volumes having been rebound, with boards laid over with brown marbled papers. A librarian's annotation on the front flyleaf of Volume 1 indicates the purchase price, "1750.00 2 vols."

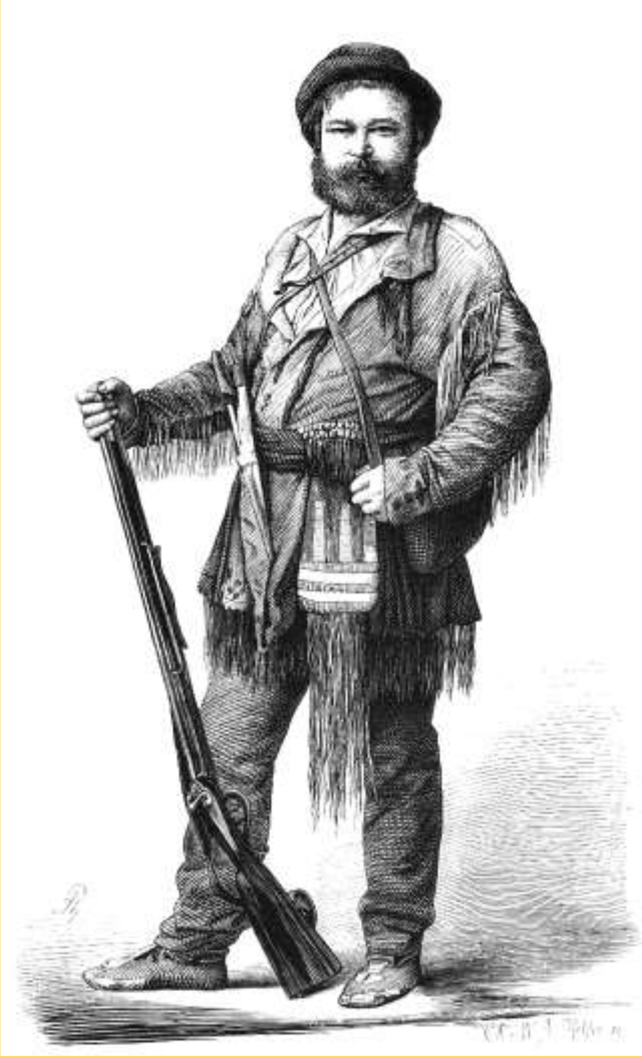
APPENDIX

Background Information on Möllhausen and the Ives Expedition

Heinrich Balduin Möllhausen (1825–1905) left Germany for the first time in 1849 to hunt in the American Midwest, where he supported himself with odd jobs of clerking and commercial painting. Two years later he met up with Friedrich Paul Wilhelm, Herzog von Württemberg, better known in American history as Duke (or Prince) Paul Wilhelm of Württemberg, who with a small entourage had set out to explore the Rocky Mountains. Möllhausen asked to join him, and served as a draftsman. They reached Wyoming, but on the return trip Möllhausen was left behind when there was no more room in a mail coach that took the duke away from a snowstorm that had killed their horses. Balduin barely survived, alone on the prairie for several months, and eventually was rescued by Indians. He later rejoined the duke in New Orleans and returned home to Germany. He was soon introduced to the great adventurer–geographer Alexander von Humboldt and met Carolina Seifert, the daughter of Humboldt's private secretary — or the unmarried Humboldt's own daughter, as some would have it — whom he later married. From then on, Möllhausen was a keen follower of his mentor, and Humbolt provided prefaces and salutary promotions for Balduin's publications.



“Balduin Möllhausen als Trapper”

(‘Balduin Möllhausen as a trapper’)

Engraving from the article, “Die nordamerikanischen Trapper” by “Ein Freitrapper” (‘The North American trapper’ by ‘A Free Trapper’), *Die Gartenlaub* (Leipzig, Jahrgang 1862, No. 29, p. 453). Engraved by X.A. v. W.A. Richter, after a photographic portrait.

Die Gartenlaub editor’s credit: “Der Gütte eines Freundes verbanken wir das obenstehende Portrait des bekannten Reisenden Möllhausen, dessen Fahrten und Abenteuer jetzt mit so viel Interesse gelesen werden. Möllhausen war eine Zeitlang selbst Trapper und hat sich in dieser Eigenschaft photographiren lassen.” (‘To the goodness of a friend we entrust the above portrait of the well-known traveler Möllhausen, whose voyages and adventures are now read with so much interest. Möllhausen was a trapper himself for a while and allowed himself to be photographed in this capacity.’)

His experiences on the prairie gave him a taste for further adventures promised in the American West. With a letter of introduction from Humboldt, Möllhausen returned to America to see if he could join one of the western government-sponsored expeditions then being planned. He was assigned as a draftsman for the 35th parallel Pacific Railroad survey of 1853–1854 under the command of Lt. Amiel Weeks Whipple, which passed through the area south of the Grand Canyon, eventually arriving on the lower Colorado River and proceeding to the west coast. He also provided illustrations for Whipple’s final report (1856).[148] Back in Germany again, he published his own account of the expedition in 1858, *Tagebuch einer Reise vom Mississippi nach den Küsten der Südsee* [Diary of a Journey from the Mississippi to the Coasts of the South Sea *(Pacific Ocean)*], which has seen reprintings and translations.

In 1857, Lt. Joseph C. Ives, U.S. Army Corps of Topographical Engineers, who had also accompanied the Whipple expedition, invited Möllhausen to join him again, on an expedition that this time Ives would command, as the expedition's illustrator and assistant in natural history. After the conclusion of this expedition he returned to Germany for the last time, where in 1861 was published his *Reisen in die Felsengebirge Nord-Amerikas bis zum Hoch-Plateau von Neu-Mexico* [Travels into the North American Rocky Mountains to the High Plateau of New Mexico]. This expedition was (officially) to ascertain the head of navigation of the Colorado River, though it also investigated the extent of Mormon incursions into the regions south of Utah Territory. Once the head of navigation was determined on the trip upriver in the *Explorer*, a small steamboat built in Philadelphia just for this expedition,[149] Ives divided his command into two groups; one returned down the Colorado River, the other, under Ives, traveled eastward overland. Although some intentions were had to explore other areas, the group finally concluded its work at Fort Defiance, New Mexico Territory (in today's Arizona).

At the conclusion of the upriver expedition, Möllhausen accompanied the overland party, which became the first to purposely reach the Grand Canyon in an attempt to ascertain more surely the geographical relationships of the region, most importantly the geographical coordinates of the confluence of the Little Colorado River with the Colorado (which they failed to accomplish due to the impassable side canyons).

In *Reports of Explorations and Surveys, To Ascertain the Most Practicable and Economic Route for a Railroad from the Mississippi River to the Pacific Ocean. Made under the direction of the Secretary of War, in 1853-4, according to Acts of Congress of March 3, 1853, May 31, 1854, and August 5, 1854. Volume III.* (A. O. P. Nicholson, Printer [Washington, 1856], separately paginated sections). (Volume: U.S. 33rd Congress, 2nd Session, House Executive Document 91.) [See Part 1, "Itinerary" [1854], and Part 2, "Report on the Topographical Features and Character of the Country" [1856].]

[149] About the *Explorer*, see a historical review from the perspective of the boat's engineer, by Earle E. Spamer, *Explorer: Andrew J. Carroll on the Colorado River, 1857–1858* (Raven's Perch Media, Philadelphia, 2022), https://ravensperch.org (PDF).

Ives' formal report was published as a U.S. congressional document in Washington, D.C., in 1861.[150] The significance of Möllhausen's work to Grand Canyon–Colorado River history is that it predates the release of Ives' formal report, by several months at least. It constitutes the first-published comprehensive accounting of explorations on the Colorado River and at the Grand Canyon. Möllhausen provided details and perspectives not offered in Ives' report, too.

In Germany, Möllhausen finished his illustrations for Ives' report, a series of watercolors that were used to produce many of the lithographs in that report. Other illustrations were created by Friedrich Wilhelm von Egloffstein, who after having accompanied other expeditions in the West was attached to the Ives expedition as cartographer and illustrator. Möllhausen's watercolors disappeared, but were subsequently rediscovered in the 20th century; they now are in the collections of the Amon Carter Museum of American Art and have been the subject of their own book.[151] Egloffstein, too, along with his maps and illustrations, has also been the subject of recent publications, including a biography centered on his cartographical work.[152]

After Möllhausen published his account of the Colorado River expedition, which was translated in 1867 into Swedish but never into any other language, he settled into a successful life as a writer of adventure stories and novels, many of them set on the American frontiers, with a special, though occasional, emphasis on the Mormon culture.

[150] Joseph C. Ives, *Report Upon the Colorado River of the West, Explored in 1857 and 1858*, Government Printing Office, Washington, 1861 (U.S. 30th Congress, 1st Session, House Document 90 [concurrently produced as an unnumbered Senate Document), 5 parts and four appendices in 1 volume. Accompanying the volume were two large map sheets, drafted by F. W. von Egloffstein; the Senate version added two geological maps overprinted on the first two.

[151] Ben W. Huseman, *Wild River, Timeless Canyons: Balduin Möllhausen's Watercolors of the Colorado* (Fort Worth, Texas, 1995). Huseman's volume is a very detailed catalog of 46 "long-lost" watercolors by Möllhausen that were acquired by the Amon Carter Museum of American Art in Fort Worth, Texas. It is essential reading for all historians of the Ives expedition. The watercolors are also on the museum's website, https://www.cartermuseum.org/artists/heinrich-balduin-mollhausen (last accessed September 26, 2022). Steven Rowan, *The Baron in the Grand Canyon: Friedrich Wilhelm von Egloffstein in the West* (Columbia, Mo., and London, 2012).

[152] Steven Rowan, *The Baron in the Grand Canyon: Friedrich Wilhelm von Egloffstein in the West* (Columbia, Mo., and London, 2012).

For these writings he was known as the “German Cooper,” after the American adventure novelist James Fenimore Cooper.[153]

Möllhausen was in fact the first to publish anything at all about the Colorado River expedition. A brief report by him appeared in a German serial in the fall of 1858,[154] even before J. C. Ives had had a chance to complete his own *preliminary* report on the expedition, which appeared in a year-end summary of U.S. Army activities.[155] Interestingly, Möllhausen’s report dealt mostly with the Grand Canyon leg of the land expedition, overlooking most of the significant upriver run.[156]

Soon afterward, Möllhausen finished and published his two-volume account of the expedition. It also embeds several lengthy reminiscences about his earlier adventures in the American Midwest and elsewhere in the West, as well as his account of the sea journey in 1857 between New York and California (by way of the Panama Railroad) and overland from the west coast to Fort Yuma on the Colorado River, where he joined the river expedition in January 1858.

Appendix II

Variants of Ellsworth L. Kolb's
***Through the Grand Canyon from Wyoming to Mexico* (1914–2018)**

Compiled by Richard D. Quartaroli

The Special Collections Librarian (Emeritus)*, Cline Library, Northern Arizona University*
Flagstaff, Arizona

Go to Kolb listings in bibliography

ELLSWORTH LEONARDSON KOLB (January 4, 1876–January 9, 1960) and his brother, EMERY CLIFFORD KOLB (February 15, 1881–December 11, 1976), rowed down the Green and Colorado Rivers from Green River, Wyoming, to Needles, California, in 1911-1912, documenting their trip on still and motion picture film. In 1913 Ellsworth continued the voyage to the delta. The Macmillan Company (New York) first issued Ellsworth's book about their trip, with "Photographs by the Author and his brother" (as indicated on title-page), in October, 1914. Through 1971, Macmillan issued 27 variants, differing principally in the number and arrangement of plates, and a minor (but contextually significant) emendation to the foreword by Owen Wister. In 1989, the University of Arizona Press (Tucson) reprinted the first edition in facsimile, adding a "new preface" by Barry Goldwater. However, the new printing contained errors, most notably miscrediting and misspelling the author as "Emory L. Kolb". The errors were corrected for later sales of the volume (see description of these two states in the descriptive notes below). Grand Canyon Association issued facsimile reprintings, first in 2007. Print-on-demand products in various formats, offered by several sources beginning in the 2000s, are transient and potentially inconsistent for each printing by a given producer; they are omitted from this table of variants, but Spamer's main bibliography does list the on-demand imprints that have been located. Illustrations of Macmillan imprint variant styles are placed at the end of this Appendix. At least one of the early printings (though precise details are as yet undetermined) were also issued in boxes (see boxed book illustration), presumably to be sold as a gift-box version).

APPENDIX II. VARIANTS OF ELLSWORTH L. KOLB'S *THROUGH THE GRAND CANYON FROM WYOMING TO MEXICO*

This publication holds the second-longest documented record of a Grand Canyon–Colorado River title *continously in print*, appearing in 27 editions/printings under the Macmillan imprint 1914-1971, 57 years. (However, there may have been a hiatus in 1920, as indicated in note "§" for Variant F in the table below.) In later years Emery Kolb was essentially the principal outlet for sales, at Grand Canyon, until his death in 1976. Thus this title was continuously available for at least 62 years. The disposition of remaining copies in Kolb's possession upon his death is not known, and it is not clear whether the work was available from Macmillan at any time thereafter.

Information in this list has also been verified by the late David Hellyer (original proprietor of Five Quail Books, Spring Grove, Minnesota), Daniel Cassidy (Five Quail Books, Prescott, Arizona), Karen Underhill (Special Collections and Archives, Cline Library, Northern Arizona University, Flagstaff, Arizona), and Earle E. Spamer (formerly American Philosophical Society, Philadelphia, Pennsylvania).

Added to this Appendix is a brief historical essay on the editions of this title, "Variants on a Tome: A Journey *Through the Grand Canyon*", which was first published by Quartaroli in 2003.

Table layout modified for THE GRAND CANON from Quartaroli's originally unpublished list; and minor points added by Earle Spamer. Current to January 2025.

APPENDIX II. VARIANTS OF ELLSWORTH L. KOLB'S *THROUGH THE GRAND CANYON FROM WYOMING TO MEXICO*

Description of Columns in Table

ITEM NO.	Item number as cited in THE GRAND CANON (for details see these citations under Kolb in Part 2)
Variant	Identifier for Kolb variants (as also noted in THE GRAND CANON). See end of this Appendix for illustrations of Macmillan variant styles
T.p. Date	Title-page date, at bottom of title-page (absent in variants W–CC)
Verso t.p. Date	Latest date of publication, indicated on title-page verso; month and year
Copyright Date	Copyright date, as indicated on title-page verso; copyright was renewed in 1942. New material in University of Arizona reprint copyright 1989
Printing	Indication of "editions" or reprints, as stated on binding, title-page, and title-page verso:

Repr	Reprint
Nw Ne	"NEW EDITION" gilt, midway on spine; "New Edition" on title-page
Nw Ed	"NEW EDITION" gilt, midway on spine
Ne Rp	"New Edition" on title-page; "Reprinted April, 1927" [for example] on title-page verso
Ne 12	"New Edition" on title-page; "Published October, 1914. Twelfth Printing 1952" [for example] on title-page verso [the number in the table note ("Ne 12" in this example) indicates the printing as specified on leaf]
Paper Re	Paperback reprint (stiff pictorial wraps, facsimile text):

Variant **BB**: University of Arizona Press reprinting, 1989, *first state*. "Emory L. Kolb" listed as author in error [see Cataloging-in-Publication data on title-page verso] and Ellsworth Kolb indicated on title-page as brother; Barry Goldwater's preface (pp. xvii-xx) mistakenly refers to "Emory" [for Emery] Kolb and "Herman" [for Norman] Nevills (p. xviii). This is a facsimile reprint of the October 1914 Macmillan edition (Variant **A)**; however, it is not completely faithful to either of the October 1914 states (Variants **A**, **B**), omitting some illustrations

Variant **CC**: University of Arizona Press reprinting, 1989, *second state*. These are corrected copies of existing stock of Variant **BB**, produced *ca.* September, 1990. Author corrected to "Ellsworth L. Kolb" and brother correctly identified and spelled as Emery C. Kolb. Also, Kolb's and Nevills' given names are corrected in Goldwater preface to read Emery and Norman, respectively

[*Comparison of University of Arizona first and second states*: Variant **BB** perfect-bound, trim size 21.3 × 14 cm. Variant **CC** perfect-bound, trim size 20.9 × 13.6 cm. Compared to **BB** the **CC** text block is tighter in the binding margin, and the top and bottom text margins are smaller; the outside text margins in both states, **BB** and **CC**, are the same. The states show that the wraps of unsold copies of the **BB** printing were removed by cutting off the glued edge (spine) and the erroneous pages or signature removed; then a gathering of reprinted, corrected pages was substituted for the cancelled pages. New wraps were glued to the text block, with the finished trimmed product (**CC**) having the size indicated here. —*E.E.S.*]

Variant **DD**: Grand Canyon Association reprinting, 2007. Facsimile reprint of Variant **A**, with the exception of title-page verso, which is GCA's copyright and publication-data page. A 2008 reprinting = Variant **EE**

Variant **FF**: Grand Canyon Association reprinting, 2007 [3rd printing, 2018 (not stated); date determined by Quartaroli]. Facsimile reprint of Variant **A**, with the exception of title-page verso, which is GCA's copyright and publication-data page. *Other points*: Pagination revised to include plates; cover illustration refigured from Kolb photograph to include skyline of cliff at upper left of photo; cover title typographically reset; ornamental border on cover photo redrawn to a single line; back cover and spine reset; title-page verso data revised and reset, omitting reprinting data and editorial information, addition of Ellsworth Kolb's dedication at top of page, and Grand Canyon Association colophon with pictorial relief, replacing two-tone colophon of earlier printings

(*continued*)

APPENDIX II. VARIANTS OF ELLSWORTH L. KOLB'S *THROUGH THE GRAND CANYON FROM WYOMING TO MEXICO*

***Description of columns in table* (continued)**

cm	Size in centimeters; first number is height of book, second number is thickness of text block (*i.e.* all pages without covers)
No. Plates/Photos	Number of photographic plates used for illustrations, with number of photos contained thereon. Figures do not include frontispiece or pictorial cover
Plate Location	"*insert*": plates interleaved in text; "*end*": plates grouped at end of text
War Format	On p. xvii, "Due to war format all illustrations will be inserted at the end of the text"
Advertisements	Advertisements for other Macmillan Co. books; three pages at end of text
Top Edge Gilt	Top edge of text block gilt
Expeditions Page	Extra leaf between pp. xiv-xv, titled, "Kolb brothers' second expedition", a note about other Kolb expeditions (U.S. Geological Survey expeditions—1921 in Glen Canyon, 1923 in Grand Canyon)
Gilt No.	No. "56640" in gilt at lower right rear cover (also in black print on lower-right rear dust jacket); a printer's or publisher's identification. This number also appears on the back of dust jackets with Variants V–AA
Intro. twofold/dogged	Fourth word of first line of Wister's foreword: "twofold" in original; "dogged" indicates altered version that also omits reference to Santa Fe Railway
Pictorial Cover	Colored picture affixed to front cover. Suffix letters refer to ink color of ornamental border stamped around the picture (Macmillan issues only): *o*–orange; *y*–yellow, which printed on dark blue cloth may produce a color more like chartreuse. (See examples at the end of this Appendix.) Illustration on University of Arizona Press and Grand Canyon Association printings is a photographic reproduction of the paste-on illustration on the Macmillan covers, although the illustration on Grand Canyon Association's unstated 3rd printing (ITEM NO. 2.27889, [2018]) refigures the Kolb photo to include the cliff skyline at upper left
Dust Jacket	It is assumed that Macmillan released all variants with dust jackets. Earlier dust jacket flyleaves and backs have no printing; later dust jackets contain blurbs on the front flyleaf and on the back. See example illustrations at the end of this Appendix. In the table, "yes" indicates that a dust jacket did not contain a printed price; "yes $" indicates that a dust jacket contained a printed price; "yes /" indicates dust jacket seen but with price clip (no intact jacket thus far seen)
Original Cost	Prices quoted from dust jackets seen; earlier variants printed price on spine, most variants printed price on dust jacket flap. Prices seen for dust jackets lacking prices are obtained from contemporary Macmillan advertisements for these eds. (bearing in mind that acquisitions on the used-book market might have replaced a dust jacket from another edition). Price on dust jacket of Variant C appears on the spine (see illustration below). Price information acquired mostly from examination of dust jackets seen in private collections of individuals who hold copies of all variants, and in the Special Collections and Archives, Cline Library, Northern Arizona University. Some pricing information also obtained from contemporary advertisements or book reviews for specific editions. Prices for post-Macmillan imprints are first-release prices
Copies	Press runs known or estimated from acquired evidence. The figures for Variants BB and CC were provided to Quartaroli by another researcher, the data not now available from the publisher; these figures represent the supposed number of Variant BB distributed before the remaining copies were corrected and distributed as Variant CC (see discussion under "Printing", above)

(*table follows*)

(Variant P only)

Examples: **Variant A** **Variant G**

Variations in cloth colors and the colors of the ornamental border and the affixed illustration may vary due to original production specifications, aging of individual copies, and the general effects of previous owners’ care. However, only two ornamental border colors were used (as indicated in the table above), orange and yellow.

Cover and dust jacket examples on these pages from the collection of Earle Spamer except where indicated otherwise.

APPENDIX II. VARIANTS OF ELLSWORTH L. KOLB'S *THROUGH THE GRAND CANYON FROM WYOMING TO MEXICO*

Examples of dust jackets (spines, front covers and front flaps only), showing some style variations and the kinds of condition that may be expected today. Variations in colors may be due to original production specifications, aging, and the general effects of previous owners' care. Not all variants have been seen with dust jackets, although the presumption is made that all Macmillan printings were distributed with dust jackets.

A FOREWORD BY OWEN WISTER

WITH MANY ILLUSTRATIONS

"One of the most exhilarating books of adventure produced in this country is the volume by Ellsworth L. and Emery C. Kolb—*Through the Grand Canyon from Wyoming to Mexico*—which is prefaced with an introduction by Owen Wister. Beautifully illustrated with halftone plates which are in themselves a stirring record of a remarkable achievement, and told with a simplicity and modesty which only serve to enhance the quality of suspense, it is a work calculated to fire the imagination and to set the pulses beating more quickly."—*Detroit Saturday Night.*

***Illustration*: Variant B with dust jacket, in box. *Box top* 7 3/16 × 9 3/16 × ⅞ inches. *Box bottom* (partly damaged) 7^+ × 9 × 1⅝ inches.**
From the collection of Richard D. Quartaroli. *(Quartaroli photo.)*

Some early printings of *Through the Grand Canyon from Wyoming to Mexico* were distributed in white paperboard boxes. The volume fits snugly inside, with a separate lift-off lid with publishing data printed on the outside. Presumably this was marketed for presentation or gift-giving. The photo above depicts the top of the lid *(left)* positioned next to the volume seated inside the box bottom. [See also next page.] In addition to this Variant B, contemporary notices have been seen of the availability of a boxed Variant A (see *Publishers' Weekly*, November 7 and December 5, 1914); the notices describe the volume as published in October and contain 48 plates (thus Variant A).

(*continued*)

APPENDIX II. VARIANTS OF ELLSWORTH L. KOLB'S *THROUGH THE GRAND CANYON FROM WYOMING TO MEXICO*

Care should be taken when identifying "boxed" volumes of *Through the Grand Canyon from Wyoming to Mexico*. The example shown here is a copy of Variant L (1937) inside a plain, tan paperboard box. The volume does not fit as comfortably as in the publisher's presentation box shown on the previous page, indicating that this box is a close-fit commercial product used for mailing; in this case, from Kolb Brothers.

APPENDIX II. VARIANTS OF ELLSWORTH L. KOLB'S *THROUGH THE GRAND CANYON FROM WYOMING TO MEXICO*

The following historical essay regarding the editions of *Through the Grand Canyon from Wyoming to Mexico* appeared as an appendix (pages 171–174) in *The Brave Ones: the journals and letters of the 1911–1912 expedition down the Green and Colorado Rivers by Ellsworth L. Kolb and Emery C. Kolb : including the journal of Hubert R. Lauzon* (transcribed and edited by William C. Suran) (Fretwater Press, Flagstaff, 2003). The essay also displays an early version of the table that is greatly expanded and updated herein.

VARIANTS ON A TOME:
A Journey *Through the Grand Canyon*

by RICHARD D. QUARTAROLI
Special Collections Librarian
Northern Arizona University Cline Library

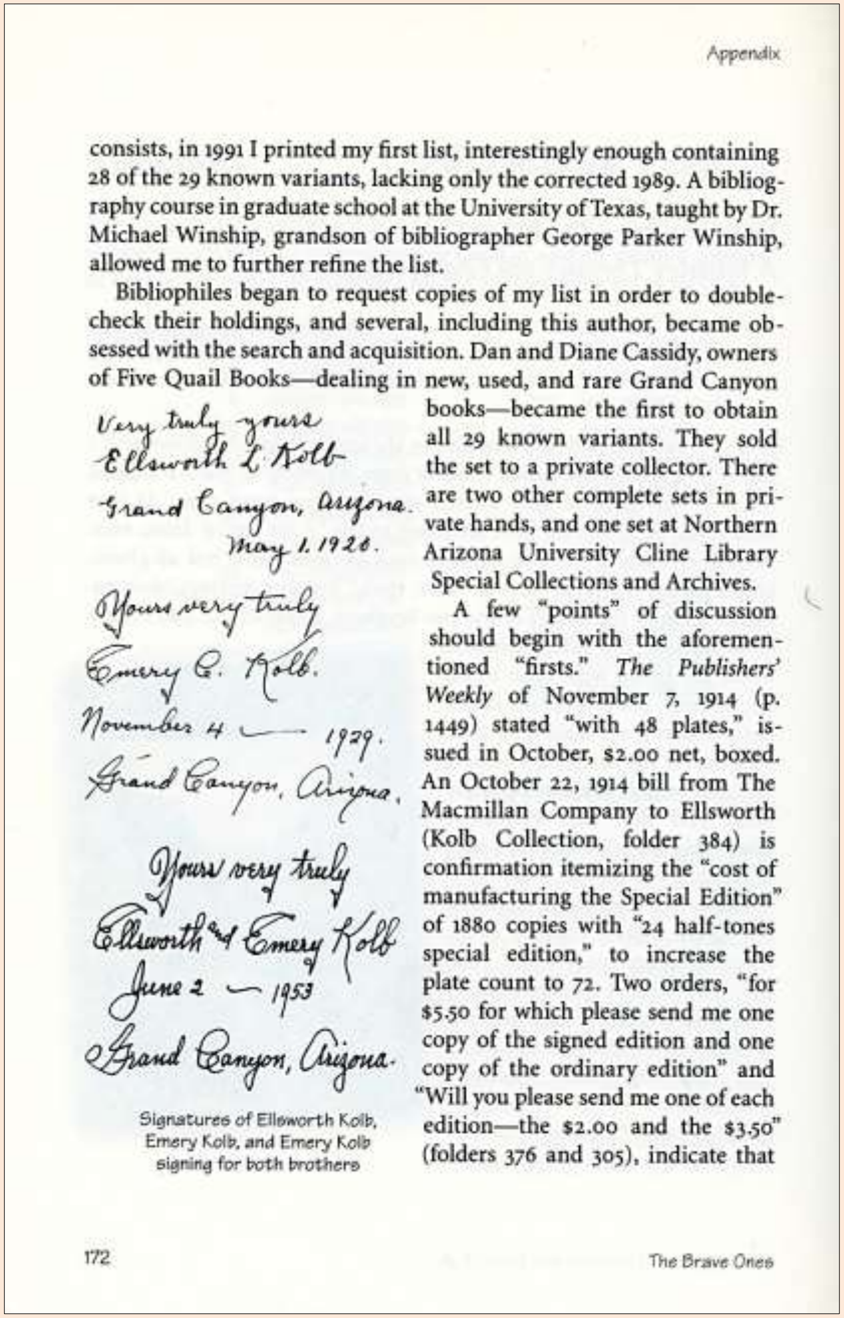
WITH THE 1976 DEATH of Emery, the last Kolb brother, Ellsworth's *Through the Grand Canyon from Wyoming to Mexico* slipped out of print after twenty-seven unique press runs. At that time some book dealers paid attention to the "Kolb" print dates, even describing each of the two October 1914 editions—one has 48 photograph plates, the other 72—as "first, thus," but few distinguished between them or signatures of the two brothers, Ellsworth L. and Emery C. as authors. The elder Ellsworth wrote the book, with both brothers taking photographic credit. Now that you are holding a transcription of the brothers' journals, you may compare them with the book and find that Ellsworth often used Emery's words in publication.

Haunting used-book stores in the 1980s, I grew curious as to which October 1914 "Kolb" was the true first. I began conferring with collectors and dealers, comparing books in libraries, and obtaining others through interlibrary loan. Although lacking many of the "points" of which my bibliography now

Variant A
October 1914 edition

The Journals of Ellsworth and Emery Kolb 171

APPENDIX II. VARIANTS OF ELLSWORTH L. KOLB'S *THROUGH THE GRAND CANYON FROM WYOMING TO MEXICO*



consists, in 1991 I printed my first list, interestingly enough containing 28 of the 29 known variants, lacking only the corrected 1989. A bibliography course in graduate school at the University of Texas, taught by Dr. Michael Winship, grandson of bibliographer George Parker Winship, allowed me to further refine the list.

Bibliophiles began to request copies of my list in order to double-check their holdings, and several, including this author, became obsessed with the search and acquisition. Dan and Diane Cassidy, owners of Five Quail Books—dealing in new, used, and rare Grand Canyon books—became the first to obtain all 29 known variants. They sold the set to a private collector. There are two other complete sets in private hands, and one set at Northern Arizona University Cline Library Special Collections and Archives.

A few "points" of discussion should begin with the aforementioned "firsts." *The Publishers' Weekly* of November 7, 1914 (p. 1449) stated "with 48 plates," issued in October, $2.00 net, boxed. An October 22, 1914 bill from The Macmillan Company to Ellsworth (Kolb Collection, folder 384) is confirmation itemizing the "cost of manufacturing the Special Edition" of 1880 copies with "24 half-tones special edition," to increase the plate count to 72. Two orders, "for $5.50 for which please send me one copy of the signed edition and one copy of the ordinary edition" and "Will you please send me one of each edition—the $2.00 and the $3.50" (folders 376 and 305), indicate that

for $3.50 you received the "special edition," signed, or perhaps with a tucked-in, Ellsworth-signed photograph of both brothers (*author's possession*). The final hardcover price rose to $7.00 in the 1960s.

Textually there appear to be no changes, however after the 1914 variants, "A-C," Owen Wister's "Foreword" is altered. Replacing "twofold courage" with "dogged courage" at the beginning, and removing over 300 words at the end, are the result of a compromise between Emery and the Atchison, Topeka & Santa Fe Railway. Advertisements for other Macmillan books appeared in "A-E," and beginning with "K" a page on the brothers' involvement with the 1920s U.S. Geological Survey river trips is included. From holdings and order records, all hardcover "A-AA" are assumed to have been issued with dust jackets.

World War II rationing and shortage of supplies caused changes in the publication industry. No pictorial color cover occurred in 1944's "P," but reappeared in the next variant after the war, to be removed in "X-AA." "P-T" contained a "War Format" page noting the plates were now at the end of the text rather than inserted within. Plates remained in this location without the note throughout the hardcover of "AA." The number of plates, most containing one photograph but varying up to three, changed in the two "firsts" but returned to 48 in "C," upped to 72 in "D," halved in "E" to 36 for a yet unknown reason, back to 72, then settled on 76 for the remainder of the Macmillan years.

In 1989, the University of Arizona Press reprinted "Kolb" in paperback, using a Cline Library Special Collections loan copy. Not reproducing "all the photographs in the original edition," there is a count of 29 plates, not including the *Frontispiece*. Returning to Wister's original "Foreword," the Press added an "Introduction" by former river runner Barry Goldwater. Since Goldwater knew Emery better, misspelling it Emory, he wrote about him more, leading the editorial staff to incorrectly re-assign authorship in "BB." In "CC," Ellsworth regained prominence.

Since the identification of 29 variants over ten years ago, no additional variants have surfaced. If readers discover others not contained on the accompanying list, also found online in Earle E. Spamer's *Bibliography of the Grand Canyon and Lower Colorado River*, please contact Fretwater Press.

Appendix III

Variants of N. H. Darton's *Story of the Grand Canyon of Arizona* (1917–1987)

Compiled by Earle E. Spamer

Go to Darton listings in bibliography

NELSON HORATIO DARTON (1865–1948) was a geologist with the U.S. Geological Survey. The firm of Fred Harvey commissioned him to prepare a booklet on the geology of the Grand Canyon, first published in September, 1917. Fifty editions (printings) have been documented through 1987, making this title the longest-running among continuously available Grand Canyon–Colorado River titles, at least 71 years. How much longer beyond 1987 that the 50th edition was available is not known.

Copyright and edition information is printed on the bottom of the last page in all variants except the 1st. In the 5th to 33rd eds. the edition number and "Revised and Enlarged Edition" also appear on the title-page, but thereafter only "Revised and Enlarged Edition" is printed there. The text content was occasionally edited, but the geology was never updated except for some minor changes. The format, place of publication, and most notably the cover were changed from time to time. This is a complete itemization of all copies seen. There are variations of illustration placement throughout the series. The illustration as the frontispiece appears in all variants, but "frontispiece" is itemized in the pagination description only when it appears separate from the pagination. Reorganization of illustrations, particularly the maps, is noted, but pagination is unaffected unless indicated otherwise. Variants for which no data are listed (—) have not been seen. See Notes at end of table for details on imprints, volume sizes, and wrap styles. Wrap styles are illustrated at the end of this Appendix.

APPENDIX III. VARIANTS OF N. H. DARTON'S *STORY OF THE GRAND CANYON OF ARIZONA*

ITEM NO.	Ed.	Stated Date	Pagination	Wraps	Notes
21.730	1st	1917 September	[iii], frontispiece, 81	style 1	Title and subtitle: *Story of the Grand Canyon of Arizona : a popular illustrated account of its rocks and origin*. Plain end papers. Maps in front of frontispiece. Frontispiece is photograph, "Zoroaster from the River". Printed by La Rue Printing Co., Kansas City. Copyright on title-page verso.
21.731	2nd	1919 February	75 [80]	style 1	[As above] Printed by Bishop Press
21.732	3rd	1920 January	frontispiece, 75 [80]	style 1	[As above, but no printer indicated]
21.733	4th	1921 March	frontispiece, 75 [80]	style 2	[As above] Maps follow title-page
21.734	5th	1922 April	73 [80]	style 2	"Revised and Enlarged" noted on title-page. Text reset. Maps moved to end of text. [*NOTE*: The notation "Revised and Enlarged" remains in all subsequent eds.]
21.735	6th	1922 October	75 [80]	style 2	Preface included, signed "The Publishers" (pp. 3-4). Frontispiece illustration moved to title-page verso.
21.736	7th	1923	74 [80]	style 2	[As above]
21.737	8th	1925	74 [80]	style 2	[As above]
21.738	9th	1926	74 [80]	style 2	[As above]
21.739	10th	1926	74 [80]	style 3	Cover main title changed: *Story of the Grand Canyon.* Subtitle block on cover as above but omits notice "Published by Fred Harvey". Text reset. Printed by Townsend Printing Co., Kansas City.
21.740	11th	1929	74 [80]	style 4	[As above, but printer not indicated] Subtitle text on cover reset, and "Published by Fred Harvey" restored
21.741	12th	1931	74 [80]	style 5	Sub-title change on cover: *Story of the Grand Canyon of Arizona : how it was made*. Text reset. New title-page verso illustration, photograph of "The View from Hopi Point". Printed by Burd and Fletcher Co., Kansas City.
21.742	13th	1934	74 [80]	style 5	[As above, but printer not indicated]
21.743	14th	1935	74 [80]	style 5	Illustrated end papers. Preface is not signed.
21.744	15th	1936	74 [80]	style 5	[As above]
21.745	16th	1937	74 [80]	style 5	[As above]

Notes

— Information not determined for this table

NA Not applicable

"ITEM NO." refers to the item number as listed in THE GRAND CANON

Main Title

1st–9th eds.	*Story of the Grand Canyon of Arizona*
10th–50th eds.	*Story of the Grand Canyon*

Subtitle

1st–11th eds.	*A Popular Illustrated Account of Its Rocks and Origin*
12th–50th eds.	*How It Was Made*

Spine Title

1st–32nd eds. only	*Story of the Grand Canyon* (Spine titles read from bottom to top, the reverse of American convention)

Imprint

1st–13th eds.	Fred Harvey, Kansas City, Missouri
14th–50th eds.	Fred Harvey, Grand Canyon, Arizona

Volume Size (see *wrap styles* for additional information)

1st–11th eds.	21 cm
12th–32nd eds.	20 cm
33rd–50th eds.	19 cm

Wrap Style — See following page for illustrated guide to styles

Style 1 (1st–3rd eds.): Heavy paper stock; text only; ink colors blue and silver; text block side-stapled, wraps glued; wraps yapped

Style 2 (4th–9th eds.): Heavy paper stock; text only; ink colors gray and silver; text block side-stapled, wraps glued; wraps yapped

Style 3 (10th ed.): Heavy paper stock; pictorial, drawing of Hermit Camp; ink colors black and tan; text block side-stapled, wraps glued; wraps yapped; artwork introduced to cover 4 (and retained in all subsequent eds.)

Style 4 (11th ed.): Heavy paper stock; pictorial, drawing of Hermit Camp; ink colors black and dark tan; text block side-stapled, wraps glued; wraps yapped

Style 5 (12th–22nd eds.): Heavy paper stock; pictorial, drawing of two mounted riders at Colorado River; ink colors black, blue, green, and orange (sky is green); subtitle used for first time, "How It Was Made", and in all eds. hereafter; text block side-stapled, wraps glued

Style 6 (23rd–31st eds.): Heavy paper stock; pictorial, drawing of three mounted riders at Colorado River; Fred Harvey logo substitutes for block printing; ink colors black, red, mauve, and blue (sky is blue); text block side-stapled, wraps glued

Style 7 (32nd ed.): Heavy paper stock; pictorial, drawing of three mounted riders at Colorado River; Fred Harvey logo substitutes for block printing; ink colors black, orange, purple, and blue (sky is blue); saddle-wired, spine title retained despite saddle wiring

Style 8 (33rd–50th eds.): Glossy stock wraps and text block; wraps with pictorial, wrap-around color photograph of South Rim view; saddle-wired, no spine title

REAR FLYLEAF (in this view now pulled away from the side-stapled text block)

Detail of binding in Styles 1–4 (*example from 9th ed., interior view, fully opened to rear*) showing side-stapled text block. In the example shown here the rear flyleaf (gray) has pulled off from the staples but is still glued to the rear-cover yapped wrap. (Yapped wraps are the fashion in which the wraps are larger than and overhang the text block; more noticeable at the right in this view.) Normally this view is not seen when the flyleaves are intact. In an intact copy, the flyleaves are stapled to the text block and the yapped wraps are glued to the flyleaves along strips parallel to the staple zone.

Cover 4
← FOLD →
Cover 1
STORY OF THE GRAND CANYON
← FOLD →

Detail of binding in Style 7 (*exterior view, fully opened*), showing spine title printed on a saddle-wired binding edge, unique to the 32nd edition (*arrows point to wiring.*) Previous editions were perfect-bound, with spine titles printed in the gutter between covers 1 (lower part of view) and 4 (upper part of view). Subsequent editions, also saddle-wired, omit the spine title. Possibly, the 32nd edition had been planned to continue the binding style of previous editions but was reformatted to a more economical wiring.

Appendix IV

Variants of Edwin D. McKee's *Ancient Landscapes of the Grand Canyon Region* (1931–2020)

Compiled by Earle E. Spamer

Go to McKee listings in bibliography

EDWIN DINWIDDIE MCKEE (1906–1984) was the Park Naturalist at Grand Canyon National Park from 1929 to 1939. He later was Assistant Director for Research at the Museum of Northern Arizona, Chairman of the Department of Geology at the University of Arizona, and Research Geologist in the U.S. Geological Survey. In 1931, he privately published a booklet on the geology of the Grand Canyon region, which went through 30 printings to 1985. The text content remains largely the same, but the format, illustrations, printer, and most notably the cover, were changed from time to time. There are variations in title-page content, layout, and typography throughout the series. This is a complete itemization of all copies seen. Variants for which no data are listed (—) have not been seen. See Notes at end of table for explanations of some columns. Styles of cover illustrations are depicted at the end of this Appendix. This book holds the third-longest record for a Grand Canyon-Colorado River title *continuously in print*, from the Kansas and Arizona printers, at least 54 years. A much later, facsimile reprinting was produced in India in 2020, but it is peculiarly reorganized. Regarding the first edition, P. P. Patraw (1931, ITEM NO. 21.7211), remarked, "Mr. Edwin D. McKee, who resigned as Park Naturalist on November 30, 1930, in order that during the winter months he could continue his university studies leading to a doctorate, will be reinstated and resume his duties about April 1, 1931. [¶] During his absence Mr. McKee prepared and published an illustrated handbook entitled 'Ancient Landscapes of the Grand Canyon Region' [see McKee, 1931, item no. 21.2135]. The book comprehensively, yet in simple language, outlines the geologic story of the Zion, Bryce, Petrified Forest, Painted Desert and Grand Canyon formations, and will be found of considerable interest and value by the visitor to these regions." McKee never completed graduate work, but years later received an honorary doctorate from Northern Arizona University.

COLOPHON

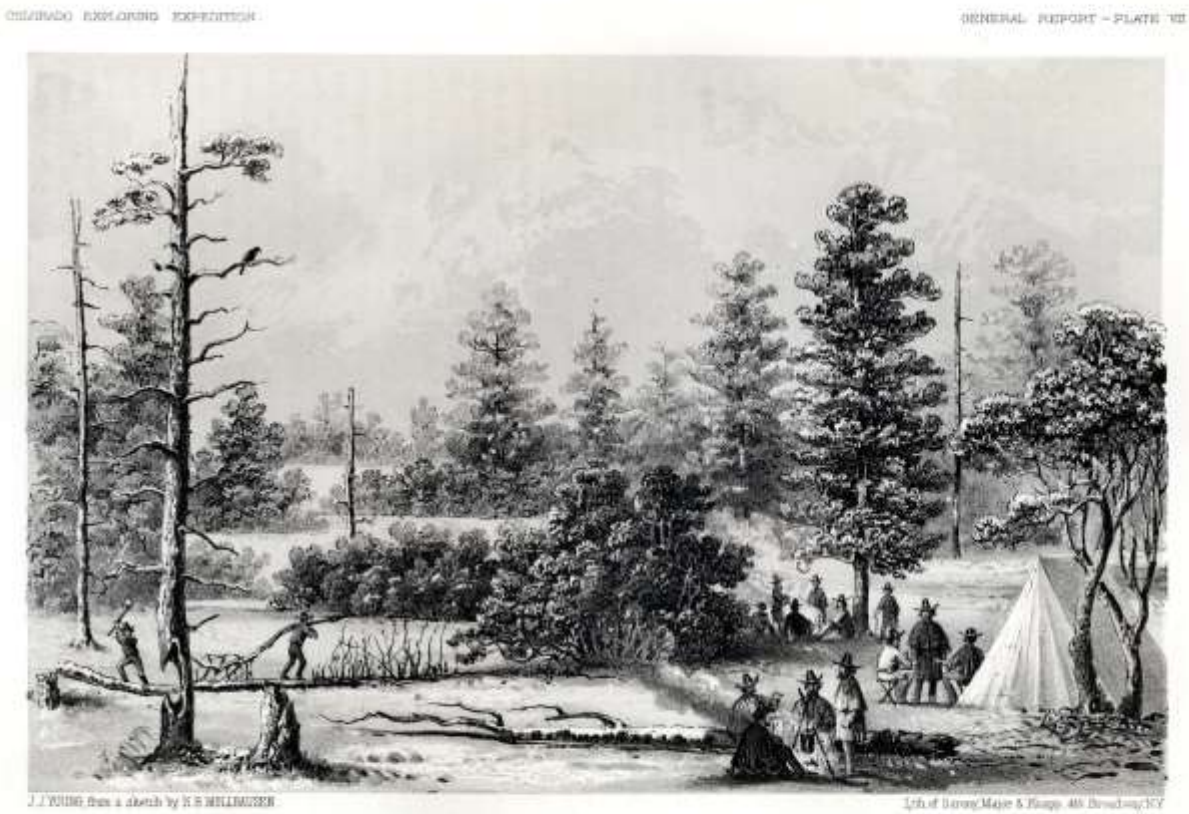
THE GRAND CANON is maintained in Microsoft Word (currently Microsoft Office Professional 2021, using Compatibility Mode to correlate with earlier Word versions in which the document was prepared). All page compositions are created by the author. Word is used rather than another page-making software product so as to ensure a longer life to the page compositions. Even though Word, too, is a proprietary commercial product, it is very widely used and thus its support and longevity is somewhat more assured. For distribution and posting online, the Word document is converted to PDF by Adobe Acrobat Pro 2023. All font libraries used in the Word document are embedded and thus available in the PDF document; all non-Roman orthographies and special characters will be displayed.

The basic font utilized throughout the bibliography is Verdana, selected for its easily read, non-serif design. (This is 9-point Verdana.) Essays and other texts generally use Bookman Old Style, utilizing a more familiar appearance for such kinds of reading texts, without overbearing serifs. Arial and other fonts are also used occasionally. Still more fonts are used in the displays of non-Roman orthographies and for special typographical requirements.

An off-white page color is used to alleviate eye fatigue, except in the sections for the visually impaired, which are displayed in black-on-white to improve contrast; larger fonts are also utilized there.

The regular bibliographical citations herein are displayed in an 8-point font on 11-point line spacing ("8 on 11") in a single column, which offers convenient legibility and allows for easier browsing and reading. In order to more easily identify groups of citations under a first-author's name, horizontal rules are used between these groups; similarly, anonymously written items are grouped in years separated by rules. Such extravagant use of space is warranted because the bibliography is designed to be browsed without undue fatigue or distraction, and the economic concerns of page production such as those for print products are not a consideration in the digital environment.

In its digital format as a PDF document, pages of THE GRAND CANON may be scaled to any screen size (larger or smaller, as the reader wishes) without degrading the resolution, and the work may be viewed in side-by-side pages on-screen using the two-page view feature. Use the display-cover-page-separately function to allow the cover to display by itself, and odd-numbered pages to appear on the right as in conventional book design. The two-page display is, however, not mandatory for the use of this bibliography. Enlarged resolution of graphical images may reveal some degradation due to the original format of an image, and the fact that this PDF is saved using the "Minimum Size (publishing online)" feature so as to allow faster navigability within the browser environment and to avoid file-size limitations on Raven's Perch Media's website provider. Colors are used in some bibliographical citations only as a matter of aesthetic embellishment for visual attention and reader convenience. Colors are not significant to the function of the bibliography. The colored fonts in non-color printouts made from the PDF may stand out somewhat in modified shades of gray.



COLORADO EXPLORING EXPEDITION
GENERAL REPORT – PLATE VII
J. J. YOUNG from a sketch by H. B. MÖLLHAUSEN

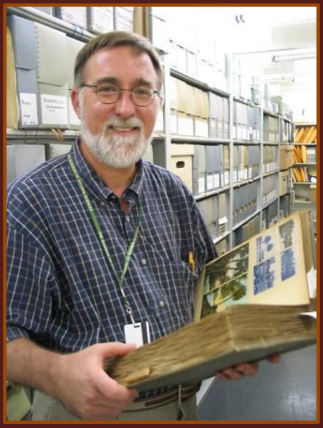
CAMP – COLORADO PLATEAU

The RAVEN'S PERCH MEDIA colophon recalls this bird's habit of gathering and caching objects. Derived from original artwork by Balduin Möllhausen, it is a fine detail from the lithograph delineated by J. J. Young that is "General Report Plate VII" in Joseph C. Ives' *Report Upon the Colorado River of the West, Explored in 1857 and 1858* (Washington, 1861), which depicts a wintry camp just south of the Grand Canyon. The scene was sketched and described by Möllhausen on April 10, 1858, while he was perched in a nearby tree. He noted (in translation here), "a couple of ravens [*paar Raben*] croaked morosely on the bare branches of a dried-up fir tree as they waited impatiently for our departure, so that they could scout around the abandoned campsite for fat morsels." (Möllhausen, *Reisen in die Felsengebirge Nord-Amerikas bis zum Hoch-Plateau von Neu-Mexico, unternommen als Mitglied der im Auftrage der Regierung der Vereinigten Staaten ausgesandten Colorado-Expedition*. Hermann Costenoble, Leipzig, 1861, Vol. 2, p. 83.) Möllhausen's original watercolor painting is now in the Amon Carter Museum of American Art (Fort Worth, Texas; https://www.cartermuseum.org/collection/character-high-table-lands-1988146).

Raven's Perch Media was created in 2018, but Möllhausen's remarks on this very scene were not discovered until the translation was made for *Möllhausen's Grand Canyon*, another Raven's Perch Media production (2022).

About the Author — *inside back cover* ➲

About the Author



My first field of study was geology at Rutgers University in the 1970s. For several years afterward I was in commercial publishing, writing about computer technology — before personal computers. In the early ’80s I began an established period of employment in natural history study collections, first at the New Jersey State Museum, then in the Academy of Natural Sciences of Philadelphia. My 18 years in the Academy’s employ began in 1986; before that I had been for 12 years a student research assistant and volunteer there. While on staff I was at various times a collection manager in several departments and collections — invertebrate paleontology, paleobotany, mineralogy, malacology, general modern invertebrates (a collection of organisms other than mollusks, insects and arachnids), diatoms, and modern botany; and continued to volunteer in vertebrate paleontology. My publications have embraced each of these fields — as well as historical and bibliographical topics about the Grand Canyon and Colorado River regions. Concurrently, for seven years I was editor and managing editor of the Scientific Publications branch of the Academy, which publishes peer-reviewed articles and monographs from authors around the globe in America’s oldest uninterrupted line of serials on natural history, from 1817. My last five years at the Academy was as its Archivist, for which I had studied in the graduate program of Temple University’s Department of History. On leaving the Academy in 2005 I continued my affiliation as an elected Research Associate. For the next 14 years I was Reference Archivist in the research library of the American Philosophical Society, a polymathic institution in Philadelphia founded in 1743 by Benjamin Franklin, whose staff supports the society’s membership, visiting researchers from around the world, and graduate level researchers on society fellowships. Since November 2018 I am enjoying an active retirement continuing all of these interests.

Following two visits to the Grand Canyon in 1974 that included my first canyon hikes, I began work on a bibliography of the canyon and the lower Colorado River country. In 1981, the Grand Canyon Natural History Association (now the Grand Canyon Conservancy) published the first edition as a part of its new Monograph series of scholarly publications. A second edition appeared in 1990, with a supplement in 1993. In January 2000, a completely revised bibliography was placed on the Association’s website, with its own URL, as a searchable database. Frequently updated, it was discontinued in 2021. In 2012, I privately published the first edition of *THE GRAND CANON*, a much-embellished resurrection of the print monograph, in digital format (PDF) that can be viewed in book layout on-screen or printed to paper. The fifth edition (2025), significantly revised, embraces the 16th to 21st centuries and now cites 111,000 items in 115 languages. (The separate *Cartobibliography* includes citations for maps of this period, with extensive chorographical notations.)

In 1989, the 28th International Geological Congress convened in Washington, D.C., which also offered an ambitious series of field trips across the United States, two of them on the Colorado River through Grand Canyon. My first river trip was with an IGC group. In 1990, I began working as a geology interpreter on yearly summer trips in Grand Canyon with a Colorado River outfitter, continuing this until 2001. I participated in two scientific study trips through the canyon under the Glen Canyon Environmental Studies program administered by the U.S. Bureau of Reclamation, on one of which I prospected for living mollusks, the first such investigation ever to have been made along this canyon river. In 1994, I had attended a Penrose Conference sponsored by the Geological Society of America, “From the Inside and the Outside: Interdisciplinary Perspectives on the History of Earth Science.” This conference for the first time brought earth scientists and historians together to discuss how each group approaches research in these complementary fields; from it I developed new perspectives in my research activities, which extended into revisions of the Grand Canyon–Lower Colorado River bibliography. In 2000, I attended a geology symposium at Grand Canyon on “The Colorado River: Origin and Evolution,” the proceedings of which were edited by Richard A. Young and me. In 2012 I was honored with the annual Pioneer Award from the Grand Canyon Historical Society. Among many affiliations I hold life memberships with the Grand Canyon Conservancy, the Grand Canyon River Guides, and the Arizona–Nevada Academy of Science.
